The Fall of Tripura Ganesan, 2016-08-23 The Fall of Tripura weaves the magical threads of eighteen-year-old Nakul's rollercoaster adventure as he accidentally resurrects a deadly civilization from India's mystical past. This novel is infused with action, adventure and romance that drive its Science-Fiction and Mythological Fantasy based plot through the perils of an enchanting parallel universe. Nakul, a second generation Indian-American and Yale sophomore, had always harbored a fascination for India's mythological origins replete with tales of exotic demigods and tyrannical demons who ruled the primordial subcontinent. However, one fated academic expedition in the hallowed soils of Tibet would change Nakul's life forever and effectively plunge the human world into a hellish abyss. Nakul discovers a relic whose lustrous veneer conceals a deadly curse to resurrect an ancient demonic race known as the Danavas who lord over the colossal three-city flying kingdom of Tripura. These prodigious titans of the legendary Atlantean lineage would stop at nothing to seize the earth and subjugate its racially inferior human inhabitants. Nakul, as the fate anointed one, must plunge into the forbidden subterranean realm of the Danavas known as Atala to retrieve a celestial super-weapon that alone could annihilate Tripura. He must race against time in this seemingly impossible endeavor before Tripura's rulers attain total invulnerability and unleash their unstoppable reign of terror over earth.

The Automotive Industry and European Integration A. J. Jacobs, 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

The Haze Problem in Southeast Asia Helena Varkkey, 2015-07-16 Despite the efforts of Southeast Asian governments and of ASEAN, transboundary haze continues to be a major environmental problem in Southeast Asia. This book demonstrates that the issue is complex, and explains why efforts to solve the problem in purely political terms are ineffective, and likely to continue to be ineffective. The book shows how state-led, state-incentivised agribusiness development lies at the heart of the problem, leading to a large rise in palm oil production, with extensive clearing of forests, leading to deliberate or accidental fires and the resulting haze. Moreover, although the forest clearing is occurring in Indonesia, many of the companies involved are Malaysian and Singaporean; and, further, many of these companies have close relationships with the politicians and officials responsible for addressing the problem and who thereby have a conflict of interest. The author concludes by discussing the huge difficulties involved in overturning this system of 'patronage politics'.

killing for culture David Kerekes,David Slater,2016-06-03 Unlike images of sex, which were clandestine and screened only in private, images of death were made public from the onset of cinema. The father of the modern age, Thomas Edison, fed the appetite for this material with staged executions on film. Little over a century later the executions are real and the world is aghast at brutalities freely available online at the click of a button. Some of these films are created by lone individuals using shaky camera phones: Luka Magnotta, for instance, and the teenagers known as the Dnipropetrovsk maniacs. Others are shot on high definition equipment and professionally edited by organized groups, such as the militant extremists ISIS. KILLING FOR CULTURE explores these images of death and violence, and the human obsession with looking — and not looking — at them. Beginning with the mythology of the so-called ‘snuff’ film and its evolution through popular culture, this book traces death and the artifice of death in the ‘mondo’ documentaries that emerged in the 1960s, and later the faux snuff pornography that found an audience through Necrobabes and similar websites. However, it is when videos depicting the murders of Daniel Pearl and Nick Berg surfaced in the 2000s that an era of genuine atrocity commenced, one that has irrevocably changed the way in which we function as a society.
