Virtual Art Oliver Grau, 2004-09-17 An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima Porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 *The Battle of Sedan*, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but

also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

Telematic Embrace Roy Ascott,2003 Annotation Telematic Embrace combines a provocative collection of writings from 1964 to the present by the preeminent artist and art theoretician Roy Ascott, with a critical essay by Edward Shanken that situates Ascott's work within a history of ideas in art, technology, and philosophy.

Rave Culture and Religion Graham St John,2004-06-01 The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and Nevada's Burning Man festival. Contributors examine raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. Rave Culture and Religion will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies.

On Art and Science Shyam Wuppuluri,Dali Wu,2019-11-02 Einstein once remarked After a certain high level of technical skill is achieved, science and art tend to coalesce in aesthetics, plasticity, and form. The greatest scientists are always artists as well. In this volume, some of the world's leading thinkers come together to expound on the interrelations between sciences and arts. While one can segregate art and place it outside the scientific realm, it is, nevertheless, inextricably linked to our essential cognitive/emotional/perceptual modalities and abilities, and therefore lies

alongside and in close contact with the method of science and philosophy. What inspiration can scientists draw from art and how can scientific spirit foster our understanding and creation of aesthetic works? How are art and science grounded in our cognition? What role does perception play in science and art? Are criteria for beauty in art and science the same? How does evolution shape our understanding of art? How do science, art and scientifico-artistic frameworks shape society as a whole and help us address its pressing issues? The epistemological and ontological aspects haunt artists, philosophers and scientists alike. The essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life.

Igniting the Sixth Sense Eric Pepin, 2013-08-04 Igniting the Sixth Sense deals with the magnetic sense that allows birds, whales, bees and many other animals to detect and use magnetic fields in ways that seem impossible for humans. Yet, we possess this same natural ability. What happens if you combine a modern human with an active, magnetic sensory? They display skills and abilities that seem, at times, super-human--Publisher.

Ritual Abuse and Mind Control Orit Badouk Epstein, 2018-03-22 People who have survived ritual abuse or mind control experiments have often been silenced, accused of lying, mocked and disbelieved. Clinicians working with survivors often find themselves isolated, facing the same levels of disbelief and denial from other professionals within the mental health field. This report - based on proceedings from a conference on the subject - presents knowledge and experience from both clinicians and survivors to promote understanding and recovery from organized and ritual abuse, mind control and programming. The book combines clinical presentations, survivors' voices, and research material to help address the ways in which we can work clinically with mind control and cult

programming from the perspective of relational psychotherapy.

Transcending the Matrix Mike Franco,2020-02-11 This book has two parts. Part I exposes seven false Secret Society New World Order constructs. Part II exposes the true nature of reality and what we need to do to Transcend this carbon matrix when we die. The chapters in part one are: The Sumerian Swindle. Reveals the Anunnaki, genetically engineers of the Nordic race. Explains how and why the money handlers ripped-off the Sumerian text to create the Old Testament. The Problem with Scientism. Exposes how the Secret Societies hide the hand of God in Creation via their false theories. The Creation of Islam. Quotes the work of the whistleblower and former Jesuit Alberto Rivera who reveals the Catholic Church's hand in the creation of Islam. Antarctica: Beginning of the End. Nazi alien bases. The formation of the UN, NASA, CIA and a New World Order, and the advent of Deep Underground Military Bases. The New World Order. 9/11. JFK. Fluoride. Chemtrails.UFO's. Zionism. And the technology explosion, transhuman agenda that seeks to turn us all into the IoT and replace humans with an Ai-brain interface hybrid by 2030. Flat Earth. Explains why this will never be revealed, how, why, where, and proof our electromagnetic simulation requires a flat, motionless Earth. The Climate Change Hoax. Explains how weather warfare, geoengineering, Chemtrails, and HAARP cause climate change. Why this hoax is being promoted, and how it fits into the NOW plans for 2030. The

chapters in part two are: Our Electric, Holographic Reality. We live in an electromagnetic simulation. This chapter provides proof. Gods Divine Algorithm. Our creator is not an old man sitting in the clouds, our creator is a code that adjudicates everything according to laws based on positive and negative energy, in due time. Eternity is a long time. Simulations without end await, until we get it right. Belief System Lifehacks. Concepts that help make life easier. Mandela Effect. How, why. One of the proofs we live in an editable simulation. Phillip K Dick's warning for mankind. PKD's books were not science fiction. They were written by an entity that hijacked his consciousness, and entity with access to alt realities, the past, and the future. Her warnings of an evil Empire hijacking our Republic and creating a global Ai run police state are about to come to fruition by 2030. True Principles. Do this positive thing, that that positive result. Easy! Transcending the Matrix. Explains how doing x, y, and z can free your soul from getting stuck in this simulation for life after life, and instead, level up to higher consciousness. Part II deals with the true nature of what we call abject reality. I provide evidence, as evidence not belief or theories equates to truth. The main reason I am writing this book is because I experienced lucid dreams where entities beyond the veil exposed profound sacred truths I feel I must share.

Transhumanism David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution, by maximizing the use of scientific technologies, to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction, featured in such films as 2001: A Space Odyssey, Blade Runner, the Terminator series, and more recently, The Matrix, Limitless, Her and Transcendence. However, as its adherents hint at in their own publications, transhumanism is an occult project, rooted in Rosicrucianism and Freemasonry, and derived from the Kabbalah, which asserts that humanity is

evolving intellectually, towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself, in the form of living machines, or artificial intelligence. Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK-Ultra, the CIA's "mind-control" program. MK-Ultra promoted the "mind-expanding" potential of psychedelic drugs, to shape the counterculture of the 1960s, based on the notion that the shamans of ancient times used psychoactive substances, equated with the "apple" of the Tree of Knowledge. And, as revealed in the movie Lucy, through the use of "smart drugs," and what transhumanists call "mind uploading," man will be able to merge with the Internet, which is envisioned as the end-point of Kabbalistic evolution, the formation of a collective consciousness, or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human knowledge, and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the "God" of occultism, or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.

The Dream Drugstore J. Allan Hobson, 2002-08-23 An investigation into the brain's chemistry and the mechanisms of chemically altered states of consciousness. In this book, J. Allan Hobson offers a new understanding of altered states of consciousness based on knowledge of how our brain chemistry is balanced when we are awake and how that balance shifts when we fall asleep and dream. He draws on recent research that enables us to explain how psychedelic drugs work to disturb

that balance and how similar imbalances may cause depression and schizophrenia. He also draws on work that expands our understanding of how certain drugs can correct imbalances and restore the brain's natural equilibrium. Hobson explains the chemical balance concept in terms of what we know about the regulation of normal states of consciousness over the course of the day by brain chemicals called neuromodulators. He presents striking confirmation of the principle that every drug that has transformative effects on consciousness interacts with the brain's own consciousness-altering chemicals. In the section called The Medical Drugstore, Hobson describes drugs used to counteract anxiety and insomnia, to raise and lower mood, and to eliminate or diminish the hallucinations and delusions of schizophrenia. He discusses the risks involved in their administration, including the possibility of new disorders caused by indiscriminate long-term use. In The Recreational Drugstore, Hobson discusses psychedelic drugs, narcotic analgesia, and natural drugs. He also considers the distinctions between legitimate and illegitimate drug use. In the concluding Psychological Drugstore, he discusses the mind as an agent, not just the mediator, of change, and corrects many erroneous assumptions and practices that hinder the progress of psychoanalysis.

Synthetic Super Intelligence and the Transmutation of Humankind Wes Penre, 2021-02-06

We live in an era of rapidly advancing technology. Artificial Intelligence (AI) is becoming more and more prominent in our daily lives, leading us closer and closer to what the technocrats in Silicon Valley and elsewhere call The Singularity. None of this should be new to most people, as it is discussed everywhere in the Media, and famous people are telling us how wonderful this Brave New World will be. But what does the Singularity really entail, when we investigate what the technocrats are telling us and what they are giving us in form of nanotechnology. This book is going into detail about the transformation of mankind from a biological human to a nanotechnological cyborg. This is

not a secret; it is what is openly promoted. Even nature itself will be transformed into AI, if the technocrats will get their way. They promise us eternal life, claiming they can replace our vital organs with nanotechnology, and we will live forever. If this is how it works, is it really what we want? What are the pros and cons with nanotechnology? What will happen to you, as a soul, when your consciousness is uploaded into a Cloud; something that is currently happening with all of us? This book discusses what the technocrats promise us and what they are not telling us. What are they actually planning for us in the near future? It is time to take a sober look at where we are heading and decide if this is what we want. Last but not least, this book will also discuss who are most likely behind the entire technocratic movement, and how it has been planned for a very long time.

Mastering the Core Teachings of the Buddha Daniel Ingram,2020-01-20 The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. Its easy to feel overawed, at first, by

Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.
