Learning to Program with Visual Basic Patrick G. McKeown, Craig A. Piercy, 2001-08-31 Visual Basic has begun to replace COBOL as an introductory programming language due to its ease of use and the near universal move to the Windows operating system. McKeown and Piercy's text addresses the need for a text that offers an adequate balance between the demonstration of the Visual Basic interface and teaching programming logic that the reader must know regardless of the language. The goal of this book is to achieve a balance between demonstrating the power and excitement of Visual Basic and the need to teach traditional programming logic.

Intuitive Eating, 2nd Edition Evelyn Tribole, M.S., R.D., Elyse Resch, M.S., R.D., F.A.D.A., 2007-04-01 We've all been there—angry with ourselves for overeating, for our lack of willpower, for failing at yet another diet that was supposed to be the last one. But the problem is not you, it's that dieting, with its emphasis on rules and regulations, has stopped you from listening to your body. Written by two prominent nutritionists, Intuitive Eating focuses on nurturing your body rather than starving it, encourages natural weight loss, and helps you find the weight you were meant to be. Learn: *How to reject diet mentality forever *How our three Eating Personalities define our eating difficulties *How to feel your feelings without using food *How to honor hunger and feel fullness *How to follow the ten principles of Intuitive Eating, step-by-step *How to achieve a new and safe relationship with food and, ultimately, your body With much more compassionate, thoughtful advice on satisfying, healthy living, this newly revised edition also includes a chapter on how the Intuitive Eating philosophy can be a safe and effective model on the path to recovery from an eating disorder.

Refusal to Eat Nayan Shah, 2022-01-04 The first global history of hunger strikes as a tactic in prisons, conflicts, and protest movements. The power of the hunger strike lies in its utter simplicity. The ability to choose to forego eating is universally accessible, even to those living under conditions of maximal constraint, as in the prisons of apartheid South Africa, Israeli prisons for Palestinian prisoners, and the detention camp at Guantánamo Bay. It is a weapon of the weak, potentially open to all. By choosing to hunger strike, a prisoner wields a last-resort personal power that communicates viscerally, in a way that is undeniable—especially when broadcast over prison barricades through media and to movements outside. Refusal to Eat is the first book to compile a global history of this vital form of modern protest, the hunger strike. In this enormously ambitious but concise book, Nayan Shah observes how hunger striking stretches and recasts to turn a personal agony into a collective social agony in conflicts and contexts all around the world, laying out a remarkable number of case studies over the last century and more. From suffragettes in Britain and the US in the early twentieth century to Irish political prisoners, Bengali prisoners, and detainees at post-9/11 Guantánamo Bay; from Japanese Americans in US internment camps to conscientious objectors in the 1960s; from South Africans fighting apartheid to asylum seekers in Australia and Papua New Guinea, Shah shows the importance of context for each case and the interventions the protesters faced. The power that hunger striking unleashes is volatile, unmooring all previous resolves, certainties, and structures and forcing supporters and opponents alike to respond in new ways. It can upend prison regimens, medical ethics, power hierarchies, governments, and assumptions about gender, race, and the body's endurance. This book takes hunger strikers seriously as decision-makers in desperate situations, often bound to disagree or fail, and captures the continued frustration of authorities when confronted by prisoners willing to die for their positions. Above all, Refusal to Eat revolves around a core of moral, practical, and political questions that hunger strikers raise, investigating what it takes to resist and oppose state power.
