A History of Greek-Owned Shipping Gelina Harlaftis, 2005-08-17 Greek-owned shipping has been at the top of the world fleet for the last twenty years. Winner of the 1997 Runciman Award, this richly sourced study traces the development of the Greek tramp fleet from the mid-nineteenth century to the present day. Gelina Harlaftis argues that the success of Greek-owned shipping in recent years has been a result not of a number of entrepreneurs using flags of convenience in the 1940s, but of networks and organisational structures which date back to the nineteenth century. This study provides the most comprehensive history of development of modern Greek shipping ever published. It is illustrated with numerous maps and photographs, and includes extensive tables of primary data.

Technology and Science for the Ships of the Future A. Marinò, V. Bucci, 2018-06-22 In 1974, a scientific conference covering marine automation group and large vessels issues was organized under the patronage of the Technical Naval Studies Centre (CETENA) and the Italian National Research Council (CNR). A later collaboration with the Marine Technical Association (ATENA) led to the renaming of the conference as NAV, extending the topics covered to the technical field previously covered by ATENA national conferences. The NAV conference is now held every 3 years, and attracts specialists from all over the world. This book presents the proceedings of NAV 2018, held in Trieste, Italy, in June 2018. The book contains 70 scientific papers, 35 technical papers and 16 reviews, and subjects covered include: comfort on board; conceptual and practical ship design; deep sea mining and marine robotics; protection of the environment; renewable marine energy; design and engineering of offshore vessels; digitalization, unmanned vehicles and cyber security; yacht and pleasure craft design and inland waterway vessels. With its comprehensive coverage of scientific and technical maritime issues, the book will be of interest to all those involved in this important industry.

**Boiotia in the Fourth Century B.C.** Samuel D. Gartland,2017-01-16 The region of Boiotia was one of the most powerful regions in Greece between the Peloponnesian War and the rise of Macedonian power under Philip II and Alexander the Great. Its influence stretched across most of the Greek mainland and, at times, across the Aegean; its fourth-century leaders were of legendary ability. But the Boiotian hegemony over Greece was short lived, and less than four decades after the Boiotians defeated the Spartans at the battle of Leuktra in 371 B.C., Alexander the Great destroyed Thebes, Boiotia's largest city, and left the fabric of Boiotian power in tatters. Boiotia in the Fourth Century B.C. works from the premise that the traditional picture of hegemony and great men tells only a partial story, one that is limited in the diversity of historical experience. The breadth of essays in this volume is designed to give a picture of the current state of scholarship and to provide a series of in-depth studies of particular evidence, experience, and events. These studies present exciting new perspectives based on recent archaeological work and the discovery of new material evidence. And rather than turning away from the region following the famous Macedonian victory at Chaironeia in 338 B.C., or the destruction of Thebes three years later, the scholars cover the entire span of the century, and the questions posed are as diverse as the experiences of the Boiotians: How free were Boiotian communities, and how do we explain their demographic

resilience among the catastrophes? Is the exercise of power visible in the material evidence, and how did Boiotians fare outside the region? How did experience of widespread displacement and exile shape Boiotian interactivity at the end of the century? By posing these and other questions, the book offers a new historical vision of the region in the period during which it was of greatest consequence to the wider Greek world. Contributors: Samuel D. Gartland, John Ma, Robin Osborne, Nikolaos Papazarkadas, P. J. Rhodes, Thom Russell, Albert Schachter, Michael Scott, Anthony Snodgrass.

Arctic Shipping Frédéric Lasserre, Olivier Faury, 2019-09-05 This book considers both the present state of Arctic shipping and possible future trends with reference to the various sectors of maritime transportation: cruise tourism, container traffic and bulk shipping. Ports are analysed as tools that support the strategies of coastal states to foster the development of resource extraction, enhance the attractiveness of Arctic shipping lanes and enable the control of maritime activities through coast guard deployment. The aim of this book is to draw a picture of the trends of Arctic shipping. How is traffic evolving in Canada's Arctic, or along the Northern Sea Route? Are there significant differences between bulk and container shipping segments when considering the Arctic market? How are the ports and the hinterland developing and what are the strategies behind those? How is the legal framework shaping the evolution of maritime transportation? The contributors to this book consider all of these questions, and more, as they map out the prospects for Arctic shipping and analyse in detail the development of Arctic shipping as a result of multi-variable interactions. This book will be key reading for industry professionals and post-graduate students alike.

**Financing the Athenian Fleet** Vincent Gabrielsen, 2010-11-01 To meet the enormous expenses of maintaining its powerful navy, democratic Athens gave wealthy citizens responsibility for financing and commanding the fleet. Known as trierarchs—literally, ship commanders—they bore the expenses of maintaining and repairing the ships, as well as recruiting and provisioning their crews. The trierarchy grew into a powerful social institution that was indispensable to Athens and primarily responsible for the city's naval prowess in the classical period. *Financing the Athenian Fleet* is the first full-length study of the financial, logistical, and social organization of the Athenian navy. Using a rich variety of sources, particularly the enormous body of inscriptions that served as naval records, Vincent Gabrielsen examines the development and function of the Athenian trierarchy and revises our understanding of the social, political, and ideological mechanisms of which that institution was a part. Exploring the workings, ships, and gear of Athens' navy, Gabrielsen explains how a huge, costly, and highly effective operation was run thanks to the voluntary service and contributions of the wealthy trierarchs. He concludes with a discussion of the broader implications of the relationship between Athens' democracy and its wealthiest citizens.

*Ancient Civilization* Arthur Mayer Wolfson, 1916

*Rulers of the Sea* John Nash, 2023-12-04 This is a study of sea power and maritime strategy in the Classical Greek world. More than just a study of navies and battles, it examines how the sea was used to influence events ashore and how the use of naval power combined with land power had a defining

impact on the period. After an examination of the oft-overlooked practical issues of navigation and administration, the book explores the idea of a 'maritime consciousness' in Greece and how this shaped the way the Greeks engaged in war. Naval operations from the Persian Wars down to the rise of Thebes are examined at the operational and strategic level, including a catalogue of the hundreds of different maritime operations from the 5th and 4th centuries BCE. Further, while the great sea power Athens is most prominent, it looks at other city-states to examine how they utilised sea power. This new approach uses modern theory to highlight some enduring lessons of sea power. It demonstrates that Classical scholars should embrace sea power as an important concept in the Greek world. Modern scholars of naval and strategic studies should cast their gaze further back in time when looking for lessons in sea power. This book helps to bridge the scholarship between these two disciplines.
