**Tectonic Evolution of the Moroccan High Atlas: A Paleomagnetic Perspective** Pablo Calvín,Antonio M. Casas-Sainz,Teresa Román-Berdiel,Juan J. Villalaín,2023-01-29 This book presents a significant amount of structural, paleomagnetic and magnetic fabric data in the Central High Atlas (Morocco). The authors thoroughly described and analyzed the present-day structure of this intraplate chain through 22 of cross-sections, potential field data analysis and 3D reconstruction. In addition, the authors propose a palinspastic reconstruction of the structure of the basin at 100 Ma (i.e., post-extension and pre-compression) to finally evaluate its Mesozoic and Cenozoic geodynamic evolution. This books presents (1) a unique three-dimensional model at the chain scale, (2) an analysis of the ca. 100 Ma remagnetization, to perform palinspastic restorations of most representative structures, (3) as well as the interpretation of the magnetic fabrics in order to unravel the tectonic or deformation setting that the rocks underwent in different parts of the basin. This book is of interest to structural geologists in Northern Africa, the Mediterranean and Iberia, as well as to those interested in inverted intraplate basins and paleomagnetists from around the planet. Also, this book is intended to help students to understand better the geological evolution of the Atlas and therefore Morocco and surrounding areas.

Portrait Of Linguists Thomas A. Sebeok,2002-08-15 Portrait of Linguists is the standard biographical work in the history and theory of linguistics and a resource for all scholars of 18th, 19th and early 20th-century Western linguistics. Edited by Thomas A. Sebeok, this text contains articles by eminent scholars in English, French and German. Ninety-one biographies are featured, including Wilhelm von Humboldt, Jacob Grimm, Franz Bopp, Sir William Jones and Max Muller. They constitute a mass of information on the leading figures in linguistics, and include bibliographical information in addition to revealing the authors' thoughts on the various schools of linguistics. Arranged chronologically by subjects' year of birth, this two-volume work is also indexed at the end of volume 2 and is a valuable storehouse of information on the seminal figures in the mainstream of Western linguistics.

**ATLAS of Tadrart Acacus rock art. A UNESCO World Heritage site in southwestern Libya** Savino di Lernia,Marina Gallinaro,2022-12-30 The rock art sites of the Tadrart Acacus in southwestern Libya were inscribed on the UNESCO World Heritage List in 1985, largely owing to the activities started in 1955 by Fabrizio Mori, founder of the Libyan-Italian Mission in the Tadrart Acacus and Messak. Since the beginning, the Department of Antiquities of Tripoli and Sebha, Libya, and Sapienza University of Rome, Italy, have worked in the region nearly without interruption until 2011. This book presents the archive of the rock art sites, identified and recorded by the Italian Mission and by independent scholars, as described and critically assessed by the authors within the framework of the ASArt-DATA project (the European Union’s Horizon 2020 research and innovation programme). The contributions introducing the catalogue contextualize the environmental, archaeological, and cultural aspects of the engravings and paintings. They include chapters addressing the historical, cultural, and diplomatic issues involved in the long-term bilateral scientific cooperation.

*La création de l'École de médecine du Nord de l'Ontario* Geoffrey Tesson,Geoffrey Hudson,Roger Strasser,2010 Rural and remote communities have long been challenging health care settings that rely on distant metropolises to supply their health workforce. The Northern Ontario School of Medicine, a pioneering faculty of medicine founded in 2005, was established to realise the potential of the rich learning environments found in such communities. This is the story of the establishment of a school of medicine that is part of a growing trend toward providing medical education that responds to the needs of remote populations and produces resourceful physicians capable of meeting those needs. Twelve contributors highlight the various aspects of the school's development and the unique opportunities it offers. The first new medical school in Canada in over thirty years, the Northern Ontario School of Medicine provides a blueprint for those interested in an innovative approach to medical education. This collection provides a fascinating and detailed account of the challenges and rewards faced by those who insisted on creating a patient-centred, community-based, and culturally sensitive learning environment for the physicians of tomorrow.

*International Review of Biblical Studies, Volume 55 (2008-2009)* Bernhard Lang,2010-03-08 Formerly known by its subtitle “Internationale Zeitschriftenschau für Bibelwissenschaft und Grenzgebiete”, the International

Review of Biblical Studies has served the scholarly community ever since its inception in the early 1950's. Each annual volume includes approximately 2,000 abstracts and summaries of articles and books that deal with the Bible and related literature, including the Dead Sea Scrolls, Pseudepigrapha, Non-canonical gospels, and ancient Near Eastern writings. The abstracts – which may be in English, German, or French - are arranged thematically under headings such as e.g. “Genesis”, “Matthew”, “Greek language”, “text and textual criticism”, “exegetical methods and approaches”, “biblical theology”, “social and religious institutions”, “biblical personalities”, “history of Israel and early Judaism”, and so on. The articles and books that are abstracted and reviewed are collected annually by an international team of collaborators from over 300 of the most important periodicals and book series in the fields covered.

Evolution Education Around the Globe Hasan Deniz,Lisa A. Borgerding,2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America,Middle East, Far East, South East Asia, Australia, and New Zealand.Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

**Continental Evolution: The Geology of Morocco** André Michard,Omar Saddiqi,Ahmed Chalouan,Dominique Frizon de Lamotte,2008-09-26 Morocco is one of the most fascinating lands in the world from the point of view of its geological structure and evolution. Our knowledge on the geology of the country has been greatly improved during the last decades, based on numerous seismic profiles and boreholes, seismological analysis of focal mechanisms, seismic tomography, gravimetric/geodetic modelling and, on the other hand, based on a big National Program of Geological Mapping including modern geochemical analyses (trace elements) and reliable isotopic datings (<sup>39</sup>Ar-<sup>40</sup>Ar, U-Pb zircon, Sm-Nd, etc). Moreover, a number of academic studies have been performed in relation with the increasing number of Moroccan universities. Accordingly, there was an utmost urgency to undertake a new treatise of Moroccan geology which could substitute for the classical *Eléments de géologie marocaine*, published in 1976 by A. Michard in the *Notes et Mémoires du Service géologique du Maroc* (re-edited twice since 1976, with more than 6000 copies sold, and... translated in Japanese for engineers!). A new treatise has been prepared between April 2006 and July 2007 under the coordination of A. Michard, assisted by O. Saddiqi, and A. Chalouan, by a wide panel of authors from Morocco, France or Belgium among the best connoisseurs of the country. In order to emphasize the general interest of the book, we finally retain the following title: *Continental Evolution: The Geology of Morocco. Structure, Stratigraphy, and Tectonics of the Africa-Atlantic-Mediterranean Triple junction*. The editing and production of this book was supported by the following organisations: The Geological Society of France (SGF) The National Office of Hydrocarbons and Mines of Morocco (ONHYM) The International Lithosphere Program (ILP)
