Catalogue of a Most Valuable Collection of Rare Atlases and Separate Maps Carefully Described ... Vilhelm Borgen,1899

An Atlas of Geographical Wonders Gilles Palsky, Jean-Marc Besse, Philippe Grand, Jean-Christophe Bailly, 2019-09-24 This is the first book to catalog comparative maps and tableaux that visualize the heights and lengths of the world's mountains and rivers. Produced predominantly in the nineteenth century, these beautifully rendered maps emerged out of the tide of exploration and scientific developments in measuring techniques. Beginning with the work of explorer Alexander von Humboldt, these historic drawings reveal a world of artistic and imaginative difference. Many of them give way—and with visible joy—to the power of fantasy in a mesmerizing array of realistic and imaginary forms. Most of the maps are from the David Rumsey Historical Map Collection at Stanford University.

Historical Atlas William Robert Shepherd, C S Hammond & Company, 2023-07-18 This atlas presents a

comprehensive collection of historical maps that detail the political boundaries, population, and geography of various regions throughout history. The maps include important dates, battles, and historical events, providing readers with a vivid understanding of the evolution of different civilizations over time. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Reference World Atlas DK, 2013-10-01 A beautifully clear, detailed, and fully revised and updated guide, DK's Reference World Atlas gives a superb overview of all the world's regions. Providing a detailed reference map set, the atlas also features computer-generated terrain-modeled maps and the landscapes, bringing an all-new dimension to cartography. This ninth edition of DK's respected Reference World Atlas includes all recent border, place name, and flag changes from around the world, including the emerging state of South Sudan.

Collecting Old Maps Francis J. Manasek, Marti Griggs, Curt Griggs, 2015-02-15 The highly anticipated second edition of *Collecting Old Maps* is completely revised and expanded with over 400 color illustrations. While maintaining the original approach to the nuts and bolts of map collecting, there is new information on collecting in the digital age, building and disposing of a collection, papermaking history, and the mythological figures, symbols and allegory used in cartography. The most significant change to this new edition is the Map Gallery, which is more comprehensive and profusely illustrated in full color. Nearly 200 maps were assembled to illustrate the five-century evolution of printed maps and how they changed both artistically and technically in response to various cultural and market influences. They illustrate the progression from the simple woodcuts of the incunabula period to the elegant copperplate engravings of Renaissance Italy, then to the Baroque Dutch compositions, the refined style of scientific cartographers, and finally the technically advanced, but sometimes whimsical, approach of 20th-century mapmakers. These maps represent a broad range of geographic regions, cartographic importance, and prices. Rather than focusing on the rare and obscure, these are maps that can be collected today.

A List of Geographical Atlases in the Library of Congress Library of Congress. Map Division, Philip Lee Phillips, 1920 Accession list of atlases received by the Library of Congress from 1909-1973. Volumes 3-6 each contain their own index.

The Map Book Peter Barber, 2005-01-01 Chronicles the historical development of maps and mapping from the Bronze Age to the present, collecting some 175 maps spanning ten millennia that represent the progress of civilization and technology, from military plans that depict enemy positions, to the famed London Underground layout, to the digitally enhanced renderings of today.

The Map Catalog Joel Makower, Cathryn Poff, Laura Bergheim, 1990 This unique sourcebook for map lovers is newly revised in a third edition that includes more maps than ever before. In addition to a profusion of road maps, aerial maps, geological maps, historical maps, weather maps, nautical maps, military maps, census maps, and astronomical maps, this third revised edition contains: -- the most current maps of Russia and Eastern Europe; -- a new section on the age of exploration; -- the most up-to-date information about map software; -- a completely new section on how to have a professional map made; -- the latest information about the new generation of maps based on the 1990 census. Whether you want maps of airports or zip codes, highways, hurricanes, or hidden treasure, The Map Catalog is the book for you. From the Trade Paperback edition.

The History of Cartography, Volume 4 Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987, the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment, the highly anticipated fourth volume, offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans, both at home and in overseas territories, from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic projects became possible under the aegis of powerful states. Yet older mapping practices persisted: Enlightenment cartography

encompassed a wide variety of processes for making, circulating, and using maps of different types. The volume's more than four hundred encyclopedic articles explore the era's mapping, covering topics both detailed—such as geodetic surveying, thematic mapping, and map collecting—and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries.

Atlas of the Great Plains Center for Great Plains Studies, Stephen J. Lavin, Fred M. Shelley, J. Clark Archer, 2011-07 Explores the history of the Great Plains through more than three hundred full-color maps and extensive explanatory text.

The Atlas of Atlases Phillip Allen, 1997 This atlas reference reproduces some pages from five centuries of atlas-making, accompanied by cartographic and historical commentary. The maps are taken from Birmingham Central Library, one of Britain's foremost historical atlas collections.

Cartographica Extraordinaire David Rumsey, Edith M. Punt, 2004 David Rumsey's collection of historical maps is one of the largest and most complete of its kind. The maps selected for this book tell a hundred distinct, exciting, important and sometimes controversial stories, along two main paths of inquiry: how did a continental wilderness become a civilization, and how has the development of cartographic science changed the ways we perceive, describe, study and use that land? - book jacket.
