**Atmospherics** Lohren Green,2014 Poetry. ATMOSPHERICS is a prose poetry textbook that brings sensual life to the reference work. Encompassing topics as varied as the flow of time in museums, the play of momentum through a sports event, and the expression of food in dreams, it studies how anything ever comes to feel like anything in particular at all. The hypothesis of this science is poetries. And so it is through poetries, some terse and esoteric, others diagrammatically elaborate, that the text explores the endlessly variable topic of atmosphere. Concept and specificity, voice and structure, shape and movement, multiplicity and coalescence, absorption and expression: many of the questions of poetry are also the questions of atmosphere. ATMOSPHERICS represents the confluence of poetry and philosophy, and of learning and teaching—a writing that meditates between concepts and particularity, pushing an expressive phenomenology beyond the resolution of experience into a very quietly strange world where there is wonder at the mood of a city street, the cry of a trumpet, the turn of an event.

*Handbook of Atmospheric Electrodynamics* Hans Volland,1995-04-27 The participation of such diverse scientific and technical disciplines as meteorology, astronomy, atmospheric electricity, ionospheric and magnetospheric physics, electromagnetic wave propagation, and radio techniques in the research of atmospheric means that results are published in scientific papers widely spread throughout the literature. This Handbook collects the latest knowledge on atmospheric and presents it in two volumes. Each chapter is written by an expert in his or her field. Topics include the physics of thunderclouds, thunder, global atmospheric electric currents, biological aspects of sferics, and various space techniques for detecting lightning within our own atmosphere as well as in the atmospheres of other planets. Up-to-date applications and methodology are detailed. Volumes I and II offer a comprehensive discussion that together will serve as an important resource for practitioners, professionals, and students alike.

A New Technique for Obtaining the Spectral Analysis of Atmospheric Arriving from Particular Directions W. L. Taylor,H. M. Burdick,L. W. Eichacker,1968 This paper describes the fundamentals of basic equipment employed in a new system designed to measure VLF attenuation rates using atmospheric. New techniques were developed to record the spectral components of transient signals arriving from within an adjustable azimuthal sector. The apparatus was operated during several periods of high thunderstorm activity to determine its accuracy and dynamic range.

Atmospheric Turn in Culture and Tourism Michael Volgger,Dieter Pfister,2019-11-29 Combining ideas of sustainable development, strategic marketing and branding with space design and architecture, this volume offers contemporary perspectives on the development and impact of 'atmospheric quality' in tourism and hospitality service situations. Topics discussed include: silent airports, ambient odours and, co-created atmospheres.

An Atmospheric of the City Ross Chambers,2015 An Atmospheric of the City traces Charles Baudelaire's evolution from a writer who practices a form of fetishizing aesthetics in which poetry works to beautify the ordinary to one who perceives background noise and disorder--the city's version of a transcendent atmosphere--as evidence of the malign work of a transcendent god of time, history, and ultimate destruction--

Atmospheric Electricity J. Alan Chalmers,2015-12-04 Atmospheric Electricity brings together numerous studies on various aspects of atmospheric electricity. This book is composed of 13 chapters that cover the main problems in the field, including the maintenance of the negative charge on the earth and the origin of the charges in thunderstorms. After a brief overview of the historical developments of atmospheric electricity, this book goes on dealing with the general principles, results, methods, and the MKS system of the field. The succeeding chapters are devoted to some aspects of electricity in the atmosphere, such as the occurrence and detection of ions, the air-Earth conduction current, and point-discharge and precipitation currents. These topics are followed by discussions on the maintenance of the Earth's charge; the correlation of Earth's charge with thunderstorm activity and current; and mechanism of charge transfer in nonstormy rain and snow. The concluding chapters consider the phenomena of thunder cloud and the lightning discharge. These chapters also examine various theories in understanding the separation of Earth's charge. This book will be of value to physicists, atmospheric scientists, and researchers in the allied fields.

**Impact of Store Atmospheric on Impulse Buying Behavior Regarding Shopping Goods in Pakistan** Irfan Sabir,2015-09-17 Master's Thesis from the year 2014 in the subject Business economics - Offline Marketing and Online Marketing, grade: 3.5, , language: English, abstract: Currently all the businesses are facing cut throat competition and companies and retailers are using different components of store atmospheric to attract the customers and to get competitive edge in the market by differentiating themselves from their competitors and consequently to be successful in the market. Current research is among very few on the components of store atmospheric and Impulse Buying in Pakistan. It will be helpful for producers, retailers and marketers by providing them roadmap to develop different strategies to increase sales and ultimately getting a larger market share by influencing buying decision making process of the consumers. Quantitative research approach has been used in this study and data has been collected through survey research method in which adapted questionnaire is used as instrument of survey. The sample size was 600 consisting of different cities (Islamabad, Lahore, Okara, Sahiwal, Pakpattan, Arifwala and Multan). Research data has been analyzed by applying descriptive statistical techniques through SPSS software. Descriptive statistics, pie graphs, scatter diagram, correlation and linear regressions tests have been applied to draw the results of the study. Results of the study have shown that the questionnaire is reliable to measure the constructs. Correlation values show that store layout, point of purchase displays, atmospheric and human factors have positive moderate correlation with impulse buying behavior. The results of regression analysis have shown that store layout, point of purchase displays, atmospheric and human factors have significant impact on impulse buying behavior. The study has some limitations as well; data has been collected through adapted questionnaire although there are other instruments as well to measure the constructs. In this study mere quantitative research approach has been used, while a mixed method approach can also be used to measure the constructs. The study has been conducted in only seven cities of Pakistan therefore it will be difficult to generalize the results of the study.
