Optical Cavities for Optical Atomic Clocks, Atom Interferometry and Gravitational-Wave Detection Miguel Dovalé Álvarez,2019-08-10 Devised at the beginning of the 20th century by french physicists Charles Fabry and Alfred Perot, the Fabry-Perot optical cavity is perhaps the most deceptively simple setup in optics, and today a key resource in many areas of science and technology. This thesis delves deeply into the applications of optical cavities in a variety of contexts: from LIGO's 4-km-long interferometer arms that are allowing us to observe the universe in a new way by measuring gravitational waves, to the atomic clocks used to realise time with unprecedented accuracy which will soon lead to a redefinition of the second, and the matterwave interferometers that are enabling us to test and measure gravity in a new scale. The work presented accounts for the elegance and versatility of this setup, which today underpins much of the progress in the frontier of atomic and gravitational experimental physics.

The Age of the Atom (1900 – 1946) Charlie Samuels,2010-08-01 In the first half of the 20th century, science transformed the lives of everyone. New forms of transportation shrank the world. Mass communication brought people closer together. Scientists explored the potential of particles so small that no one had ever seen them--Page 4 of cover.

Her Space, Her Time Shohini Ghose,2023-10-17 An exciting new title in the vein of Hidden Figures, which tells the inspiring stories of long-overlooked women physicists and astronomers who discovered the fundamental rules of the universe and reshaped the rules of society. Women physicists and astronomers from around the world have transformed science and society, but the critical roles they played in their fields are not always well-sung. Her Space, Her Time, authored by award-winning quantum physicist Shohini Ghose, brings together the stories of these remarkable women to celebrate their indelible scientific contributions. In each chapter of the book, Ghose explores a scientific topic and explains how the women featured in that chapter revolutionized that area of physics and astronomy. In doing so, she also addresses particular aspects of women's experiences in physics and astronomy: in the chapter on time, for instance, we learn of Henrietta Leavitt and Margaret Burbidge, who helped discover the big bang and the cosmic calendar; in the chapter on space exploration, we learn of Anigaduwagi (Cherokee) aerospace scientist Mary Golda Ross, who helped make the Moon landings possible; and in the chapter on subatomic particles, we learn of Marietta Blau, Hertha Wambacher, and Bibha Chowdhuri, who contributed to the discovery of the building blocks of the universe, and, in doing so, played a crucial role in determining who gets to do physics today. Engaging, accessible, and timely, Her Space, Her Time is a collective story of scientific innovation, inspirational leadership, and overcoming invisibility that will leave a lasting impression on any reader curious about the rule-breakers and trendsetters who illuminated our understanding of the universe. Great Irish Heroes - Fifty Irishmen and Women Who Shaped the World Stuart Pearson,2016-04-07 How did the Irish independence movement lead directly to the invention of the modern submarine? Who was the Irish 'Queen'

of Paraguay whose delusions of grandeur caused the destruction of her adopted country? Who escaped execution for participating in the Easter Rising of 1916, only to go on and be elected to the UK Parliament in London? Whose belief in reform through non-violent means became the inspiration for Mahatma Ghandi, Nelson Mandela and Martin Luther King? The answers to these questions and more can be found in the pages of Great Irish Heroes, covering over a thousand years of Irish history and encompassing outstanding leaders in a broad range of pursuits, including literature, mathematics, sport, religion, entertainment and politics. Ireland has for centuries produced a great number of exceptional, heroic men and women far out of proportion to the island's small population and geographical size. It is also true to say that few nations have been so shaped by their history, a history with which the country still resonates today. In this companion volume to his Great Scottish Heroes, Stuart Pearson examines the lives and careers of fifty of the greatest Irishmen and women from St Columba to Brian O'Driscoll, Brian Boru to Pierce Brosnan. In doing so, he shows how this remarkable island race has contributed so much to our world, and continues to do so to this day.

Big Sky Alien Mail Order Brides Box Set Collection 1: Original Trilogy +1 Elsa Jade, 2023-03-11 The original Big Sky Brides, all in one place! Adventure and romance together in high-speed pursuit of Happily Ever Afters throughout the universe. If you've been looking for love in all the wrong galaxies, find your alien mate with the Intergalactic Dating Agency! ALPHA STAR She just wanted a quiet place to hide from the world. Instead, she found adventure with a sexy alien seeking his mate and a once-in-a-lifetime chance for a cosmic love... Recovering from a traumatic concussion, Zoe Nazario fears she'll never trust her own senses again. So when she stumbles over a shiny chrome cube, she laughs off its chirpy announcement that she's the lucky bride of an alien prince. Aliens? Love? Yeah, no. Better to be dazed and confused—and alone—than desperately delusional. Sinclarion "Sin" Fifth-Moon Jax feels most at home roaming the infinite stars with his cybernetic enhancements and princely privilege to protect his misfit spaceship crew. But his imperial great-grandmother, despairing of his free-flying ways, demands he settle down to claim his solar system inheritance—and the Big Sky Intergalactic Dating Agency has already identified his perfect match in Sunset Falls, Montana, Earth! Grudgingly resigned to seizing the woman of his destiny, Sin instead gets an innocent Earther girl—who rejects him utterly. But when he realizes an interstellar menace is stalking his reluctant bride, he can't just leave her behind...even if his five mating rings threaten to lock with desire when she's near. The small-town Earther girl and the arrogant alien prince must join forces to survive a vast and treacherous universe, but what happens when they find that Sin's inheritance might be a lie—and so is his perfect match with Zoe? RED SHIFT Unmated drakling shifters are one of the hottest threats in the universe, as everyone knows...everyone except this one drakling with amnesia and the innocent Earther girl trapped with him! Banished from his homeworld for refusing a mate that would tame his fiery beast, Honey the drakling followed his wandering prince into battle and then—more terrifying yet—into courtship. But then espresso-induced amnesia leaves him marooned in the backwater wilds of Big Sky Country, Montana, Earth, lost and alone but for a female with hair as dark as the night skies and hidden sparks in her eyes. Tisha Beauchamp just wanted a weekend in her granny's remote cabin with her girlfriends to figure out her life plan. No one said a thing about an early snowstorm or invading aliens! And now she's stuck in the mountains by herself—until her one-woman pity party gets crashed by a wild, red-haired man with no memories, strange dragon-ish tattoos, and a scorching touch... Though he has forgotten his name, his beast, and the freedom of space, the feverish urge to claim Tisha grows stronger with every night under the pale light of Earth's solitary moon. But if he finds his way back to his ship and himself, how can he burn forever with his bold, bright Earther girl? DARK MATTER While it is a verifiable reality that the universe is vast and strange, no one in all those lightyears could ever love an emotionless, soul-sucking space vampire. Unless there are deeper truths out there somewhere... The secretive, ancient species of the vrykoly were designed to pilot the deathly cold distances of space, and Ivan has never known anything else; even his dreams have always been black and empty. Though he guides the Sinner's Prayer to a neglected little planet to find brides from the Intergalactic Dating Agency, Ivan dispassionately considers bonding and mating to be irrational pursuits. But when his captain and first officer find incandescent love with the extraordinary females of Earth, this vrykoly is forced to wonder if he was—dare he say it?—wrong. After the tragic death of her first love, Montana river guide Delaney Nazario thought she'd be alone forevermore. So she quietly signed up with the Big Sky matchmaking outpost in Sunset Falls, hoping an alien will whisk her away. Instead it was her two roommates who found their mates—also staving off an attack by interstellar mercenaries trying to kidnap Earth women. Now Del is being guarded by a silent, hulking, scary vrykoly—who might be the only being in the universe she could never, ever date. But while there are deeper truths in the universe, there is also secret menace. And Big Sky's only hope is a space vampire who's never felt anything and an Earther girl who feels too much. AFTER BURN When Vaughn Quay's older sister goes missing in Big Sky Country, she's willing to risk everything to hunt down the only man who seems to know anything about the mysterious mail order bride agency that closed under suspicious circumstances. Except Vaughn is risking more than her life—she's discovering a universe of danger and desire she never knew existed. Dejo Jinn, sole proprietor of Jinn Data Recovery, just wants to steal—no, sorry, not steal, recover—the data left behind at the abandoned Intergalactic Dating Agency when it was forced to close after mistakenly losing some brides. He has no interest in revealing his extraterrestrialness to a clueless if distractingly curvy Earther, but after they are attacked and she sees his green blood, his secret is outed. Now reluctant partners, he'll have the chance to steal—sorry, recover—the valuable data and she'll get her sister back. Assuming they don't end up dead. Or worse yet, end up dating. _____ For readers who love: alien mail order bride science fiction romance intergalactic dating agency fated mates prince royalty mercenary starship captain dragon shifter shapeshifter ginger cinnamon roll space vampire alpha male warrior strong woman heroine action adventure fast read fun steamy happily ever after HEA first love and books by Ruby Dixon, Honey Phillips, Tana Stone, Anna Hackett, Celia Kyle, Zoey Draven, Suzanne Wright, Celeste King, and Ava Ross.

Conquering Resources: The Growth and Decline of the PLA's Science and Technology Commission for National Defense Benjamin C. Ostrov,Richard P. Suttmeier,2019-07-26 This case study seeks to explain how organizations grow and the limits to that growth when an organization engaged in policy implementation lacks the resources necessary to achieve policy goals. The discussion of the basis of conflict that emerges from this study is of lasting significance. For years, studies of this issue have pointed to various models of factionalism, stressing the informal character of the groups involved. In Professor Ostrov's study, however, conflict is shown to have a supra-Cultural Revolutionary institutional basis in this and other key units.
