Travis S. Taylor, Bob Boan

Alien Invasion Travis S. Taylor, Bob Boan, 2011-06-01 What if there really are aliens and they do attack? Read what two scientists reveal in this how-to survival manual for the space age. Some events (such as a deliberate asteroid strike) produce such a massive setback to life, the Earth and humanity that we must understand and prepare for them, even if the chances are low that they'll come about. But where to begin? Drs. Travis S. Taylor and Bob Boan are experienced scientists, physicists with expertise in both defense and military signal intelligence and experience working with the Department of Defense and NASA. These two intellectual heavyweights take us on an amazing journey through what we do³/₄and do not³/₄know about how to defend ourselves from space. Sure, that day may never come in our lifetimes³/₄but everyone should have a copy of this lying around just in case. . . . Alien Vs. 101st Airborne Hunter Frye, 2018-10-08 This is a story about an alien species coming to earth one hundred thousand years ago to mine for fossil fuels. The most important thing the aliens did was engineering the early stages of mankind as a slave-labor force to assist the aliens in procuring more fossil fuels to build cities back on their home planet. After the aliens mined what they needed for their home world, they taught mankind how to use our natural resources, to increase agriculture production, and how to build our own cities. While mining fossil fuels which are useful in electricity, wealth building, and cosmic space travel, the aliens were placing humans all around the world so that one day they would observe them fighting each other for resources, expansion, and religious rule. The aliens observe the warfare as entertainment. This leads to men and women being hunted for Predator sport. The aliens abduct the 101st Airborne to an alien hunting planet. The 101st Airborne will be forced to do anything to survive and avoid a painful demise from being the alien's prey. The 101st Airborne will engage with other

abducted groups from the world and ultimately combine forces for one epic, final battle against their captors!

The Aliens Are Here Fraser A. Sherman, 2022-10-10 Aliens: They have taken the form of immigrants, invaders, lovers, heroes, cute creatures that want our candy or monsters that want our flesh. For more than a century, movies and television shows have speculated about the form and motives of alien life forms. Movies first dipped their toe into the genre in the 1940s with Superman cartoons and the big screen's first story of alien invasion (1945's *The Purple Monster Strikes*). More aliens landed in the 1950s science fiction movie boom, followed by more television appearances (*The Invaders*, *My Favorite Martian*) in the 1960s. Extraterrestrials have been on-screen mainstays ever since. This book examines various types of the on-screen alien visitor story, featuring a liberal array of alien types, designs and motives. Each chapter spotlights a specific film or TV series, offering comparative analyses and detailing the tropes, themes and cliches and how they have evolved over time. Highlighted subjects include *Eternals*, *War of the Worlds*, *The X-Files*, John Carpenter's *The Thing* and *Attack of the 50-Foot Woman*.

UFOs, Chemtrails, and Aliens Donald R. Prothero, Timothy D. Callahan, 2017-08-02

UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.
