Being Black in the Ivory Shardé M. Davis, 2024-02-27 When Sharde M. Davis turned to social media during the summer of racial reckoning in 2020, she meant only to share how racism against Black people affects her personally. But her hashtag, BlackintheIvory, went viral, fostering a flood of Black scholars sharing similar stories. Soon the posts were being quoted during summer institutes and workshops on social justice, equity, diversity, and inclusion. And in fall 2020, faculty assigned the tweets as material for course curriculum. This curated collection of original personal narratives from Black scholars across the country seeks to continue the conversation that started with BlackintheIvory. Put together, the stories reveal how racism eats its way through higher education, how academia systemically ejects Black scholars in overt and covert ways, and how academic institutions—and their individual members—might make lasting change. While anti-Black racism in academia is a behemoth with many entry points to the conversation, this book marshals a diverse group of Black voices to bring to light what for too long has been hidden in the shadow of the ivory tower.

Zapotecs on the Move Adriana Cruz-Manjarrez,2013-05-06 Through interviews with three generations of Yalálag Zapotecs ("Yaláltecos") in Los Angeles and Yalálag, Oaxaca, this book examines the impact of international migration on this community. It traces five decades of migration to Los Angeles in order to delineate migration patterns, community formation in Los Angeles, and the emergence of transnational identities of the first and second generations of Yalálag Zapotecs in the United States, exploring why these immigrants and their descendents now think of themselves as Mexican, Mexican Indian immigrants, Oaxaqueños, and Latinos—identities they did not claim in Mexico. Based on multi-site fieldwork conducted over a five-year period, Adriana Cruz-Manjarrez analyzes how and why Yalálag Zapotec identity and culture have been reconfigured in the

United States, using such cultural practices as music, dance, and religious rituals as a lens to bring this dynamic process into focus. By illustrating the sociocultural, economic, and political practices that link immigrants in Los Angeles to those left behind, the book documents how transnational migration has reflected, shaped, and transformed these practices in both their place of origin and immigration.

Trauma and Recovery in Early North African Christianity Scott Harrower, 2024-04-22 Powerful religious elements for living in the aftermath of trauma are embedded within North African Christian hagiographies. The texts of (1) The Passion of Perpetua and Felicity, (2) The Account of Montanus, Lucius, and their Companions, and (3) The Life of Cyprian of Carthage are stories that offered post traumatic pathways to recovery for its historical readership. These recovery-oriented beliefs and behaviors promoted positive religious coping strategies that revolved around a sense of safety, re-establishing community relationships, an integrated sense of self, and a hopeful story beyond trauma. This book vividly demonstrates that hagiographies played a vital therapeutic role in helping early Christian trauma survivors recover and flourish in the aftermath of disastrous persecutions.

Transmedia Creatures Francesca Saggini,Anna Enrichetta Soccio,2018-10-19 On the 200th anniversary of the first edition of Mary Shelley’s *Frankenstein*, *Transmedia Creatures* presents studies of *Frankenstein* by international scholars from converging disciplines such as humanities, musicology, film studies, television studies, English and digital humanities. These innovative contributions investigate the afterlives of a novel taught in a disparate array of courses - *Frankenstein* disturbs and transcends boundaries, be they political, ethical, theological, aesthetic, and not least of media, ensuring its vibrant presence in contemporary popular culture. *Transmedia Creatures* highlights how cultural content is redistributed through multiple media, forms and modes of production (including user-generated ones from “below”) that often appear synchronously and dismantle and renew established readings of the text, while at the same time incorporating and revitalizing aspects that have always been central to it. The authors engage with concepts, value systems and aesthetic-moral categories—among them the family, horror, monstrosity, diversity, education, risk, technology, the body—from a variety of contemporary approaches and highly original perspectives, which yields new connections. Ultimately, *Frankenstein*, as evidenced by this collection, is paradoxically enriched by the heteroglossia of preconceptions, misreadings, and

overreadings that attend it, and that reveal the complex interweaving of perceptions and responses it generates. Published by Bucknell University Press. Distributed worldwide by Rutgers University Press.

Chess Skill in Man and Machine P. W. Frey, 2012-12-06 Ten years of intensive effort on computer chess have produced notable progress. Although the background information and technical details that were written in 1975 for the first edition of this book are still valid in most essential points, hardware and software refinements have had a major impact on the effectiveness of these ideas. The current crop of chess machines are performing at unexpectedly high levels. The approach epitomized by the series of programs developed by David Slate and Larry Atkin at Northwestern in the middle 1970s (i. e. , a sophisticated search algorithm using very little chess knowledge) was expected to reach an asymptotic level of performance no higher than that of a class A player (USCF rating between 1800 and 2000). This perspective was argued quite vigorously by Eliot Hearst in Chapter 8 of the first edition and was held at that time by many chess experts. Subsequent events have clearly demonstrated that the asymptotic performance level for this type of program is at least as high as the master level (USCF rating between 2200 and 2400). Current discussions now focus upon whether the earlier reservations were wrong in principle or simply underestimated the asymptote. If there is a real barrier which will prevent this type of program from attaining a world championship level of performance, it is not evident from the steady progress which has been observed during the last decade.
