The DNA of Executive Protection Site Security Tibi J. Roman, 2022-03-18 An in-depth read in relation to executive protection with a focus on site security, *The DNA of Executive Protection - Site Security* is essential for anyone new to executive protection or requiring advanced instruction on major event planning. If you want to excel as an executive protection professional, you need a thorough understanding of site security protocols, vulnerabilities, and best practices. An executive's activities are all site based, where the VIP is either at a site, arriving or departing from a site, or travelling through one. Thus, the backbone, or DNA of executive protection is site security. Need a tool to assist with site security assessment and planning? This book includes: 1. Six activity-based categories to help determine when site security resources are warranted 2. Effective ways to establish and build relationships with each of the seven site stakeholder groups 3. Information on access control and accreditation, including assessment of examples 4. Two new protective assessment tools: the facility selection assessment and the strategic site arrival and departure assessment 5. A comprehensive guide to site vulnerability assessments, to identify, review, and evaluate physical security vulnerabilities 6. Effective actions to take if an adversary gains access to the event site 7. A detailed site security guide that outlines 60-areas a site commander should have considered and covered off on game day. As site commander, your goal is to be the security subject matter expert at your event site. This book will help you achieve that goal.

Reliable JavaScript Lawrence D. Spencer, Seth H. Richards, 2015-06-29 Create more robust applications with a test-first approach to JavaScript. *Reliable JavaScript, How to Code Safely in the World's Most Dangerous Language* demonstrates how to create test-driven development for large-scale JavaScript applications that will stand the test of time and stay accurate through long-term use and maintenance. Taking a test-first approach to software architecture, this book walks you through several patterns and practices and explains what they are supposed to do by having you write unit tests. Write the code to pass the unit tests, so you not only develop your technique for structuring large-scale applications, but you also learn how to test your work. You'll come away with hands-on practice that results in code that is correct from the start, and has the test coverage to ensure that it stays correct during subsequent maintenance. All code is provided both in the text and on the web, so you can immediately get started designing more complete, robust applications. JavaScript has graduated from field-validation scripts to full-scale applications, but many developers still approach their work as if they were writing simple scripts. If you're one of those developers, this book is the solution you need to whip your code into shape and create JavaScript applications that work. Write more concise and elegant code by thinking in JavaScript. Test the implementation and use of common design patterns. Master the use of advanced JavaScript features. Ensure your code's conformance to your organization's standards. If you're ready to step up your code and develop more complete software solutions, *Reliable JavaScript* is your essential resource.

HCI International 2018 – Posters' Extended Abstracts Constantine Stephanidis, 2018-07-08 The three-volume set CCIS 850, CCIS 851, and CCIS 852 contains the extended abstracts of the posters presented during the 20th International Conference on Human-Computer Interaction, HCI 2018, which took place in Las Vegas, Nevada, in July 2018. Event Information Systems Markus Heuchert, 2021-04-15 Events are an essential element of society. Advancing digital technologies and the ongoing globalization has put forward a variety of different business, leisure, or scientific events that need to be managed in order to take place. As a result of the proliferation of digital technology, IT systems are an indispensable part of this management process. Amid this pandemic crisis, these systems have become increasingly important due to the relocation of events into the virtual sphere. Since every event entails different requirements, event management systems need to be very flexible. In contrast to other application systems, this flexibility is needed during use as the requirements of future events are not known during the initial selection and roll-out of the software. This calls for an intensified dialogue between the business and IT to match technical possibilities with practical requirements. Currently, adequate means to support this dialogue are lacking. To this end, this dissertation presents a reference model that encompasses the essential processes and data structures in the domain. In 36 application cases, the reference model is instantiated and evaluated. Practitioners and researchers are the intended audiences of this work. Researchers may use it as a foundation to design novel IT artifacts in the domain. Practitioners benefit from the first

comprehensive tool to support the design and use of digital technology in event management.

Employability and Skills Development in the Sports, Events, and Hospitality Industry Nadda, Vipin, Arnott, Ian, Sealy, Wendy, Delaney, Emma, 2022-06-24 To enter the sports, events, and hospitality industry, it is necessary to develop and hone certain skills to ensure competitiveness. These skills must be studied further to educate those interested in pursuing a career in these fields on what it takes to begin this long process and enhance their employability. *Employability and Skills Development in the Sports, Events, and Hospitality Industry* provides insight into current professionals working in the sports, events, tourism, and hospitality industry and considers the skills and qualifications necessary to work within or enter the industries. Covering key topics such as hard skills, volunteerism, virtual events, and educational institutions, this reference work is ideal for event managers, coaches, property owners, entrepreneurs, industry professionals, researchers, academicians, scholars, educators, and students.
