*Business Transformations in the Era of Digitalization* Mezghani, Karim, Aloulou, Wassim, 2019-01-22 In order to establish and maintain a successful company in the digital age, managers are digitally transforming their organizations to include such tools as disruptive technologies and digital data to improve performance and efficiencies. As these companies continue to adopt digital technologies to improve their businesses and create new revenues and value-producing opportunities, they must also be aware of the challenges digitalization can present. *Business Transformations in the Era of Digitalization* is a collection of innovative research on the latest trends, business opportunities, and challenges in the digitalization of businesses. Highlighting a range of topics including business-IT alignment, cloud computing, Internet of Things (IoT), business sustainability, small and medium-sized enterprises, and digital entrepreneurship, this book is ideally designed for managers, professionals, consultants, entrepreneurs, and researchers.

*Influence of FinTech on Management Transformation* Sghari, Amira, Mezghani, Karim, 2020-11-27 Digital financial services are starting to become increasingly popular with consumers, thereby fostering a favorable climate for digital entrepreneurship: mobile payment, Blockchain, etc. Research trying to understand and explain this phenomenon focuses on FinTech. Some scholars regard “FinTech” as financial innovations that upset the market while others view them as startups, based on financial innovations, that have changed the ecosystem. There are many open-ended questions about FinTech’s business models, how it relates to blockchain, and whether this is a collaborative relationship between traditional financial players or a competitive relationship. Noting the lack of research work on these themes, this book attempts to shed light on this area to bridge the gap between the discourse of practitioners and the literature. *Influence of FinTech on Management Transformation* is an innovative reference book that defines FinTech and its ecosystem as well as concepts in relation to management transformations caused by FinTech and shares new theoretical and empirical frameworks, useful experiences, and best practices to deal with new technological changes. The chapters are divided into three interrelated sections: “Insights From the Blockchain Technology”; “Managerial and Cultural Transformations in the Era of FinTech”; and “Empirical Experiences and Applications.” This book is a valuable reference tool for financial planners/advisors, managers, accountants, financial analysts, compliance experts, practitioners, researchers, academicians, and students interested in the influence of FinTech on management transformation.

*Mobile Platforms, Design, and Apps for Social Commerce* Pelet, Jean-Éric, 2017-05-17 While social interactions were once a personal endeavor, more contact is now done virtually. Mobile technologies are an ever-expanding area of research which can benefit users on the organizational level, as well as the personal level. *Mobile Platforms, Design, and Apps for Social Commerce* is a critical reference source that overviews the current state of personal digital technologies and experiences. Highlighting fascinating topics such as M-learning applications, social networks, mHealth applications and mobile MOOCs, this publication is designed for all academicians, students, professionals, and researchers that are interested in discovering more about how the use of mobile technologies can aid in human interaction.

**Financing Africa** Samuel Munzele Maimbo, Issa Faye, Thouraya Triki, 2011-09-07 Financing Africa takes stock of Africa's financial systems in light of recent changes in the global financial system --including the greater risk aversion of international investors, a shift in economic and financial powers towards emerging markets and the regulatory reform debate - and the increasing role of technology. Using a wider and more detailed array of data than previous publications, we observe a trend towards financial deepening, more stability and more inclusion leading up to the crisis; serious challenges, however, continue, including limited access to financial services, focus on short-term contracts and hidden fragility, related to weak regulatory frameworks, undue government interference and governance deficiencies. Our policy analysis therefore focuses on (i) expanding outreach, (ii) fostering long-term finance and (iii) improving regulation and supervision. We identify the positive role of innovation and competition, a stronger focus on non-traditional financial service providers, and more emphasis on demand-side constraints as priority areas for policy actions. Specifically, competition from new players outside the banking system, including telecomm companies can increase outreach with technological innovation that changes the economics of retail finance. Moving beyond national stock exchanges that are not sustainable in most African countries towards regional solutions and over-the-counter trades can help foster long-term finance, as can addressing governance challenges in contractual savings institutions, including life insurance companies and pension funds. Finally, there is a need to look beyond supply-side constraints towards users of financial services, focusing more on financial literacy of households and firms, but also consumer protection. In formulating policy messages, we carefully distinguish between different country groupings, differentiating -- among others -- between low- and middle-income and small and larger economies, with a special focus on resource-based economies and post-conflict countries. This book reaches out to both policy makers concerned about a more inclusive and effective financial system and other stakeholders, including practitioners and development partners. With this book we aim to contribute to the on-going financial sector debate on Africa, with the ultimate goal of faster economic development and poverty reduction.

**The Mobile Revolution** Andrew Pearson, 2010-10-19 The Mobile Revolution details how the mobile phone is not only transforming the way people communicate with each other but also how advertisers and marketers are communicating with them. Through SMS text messaging, mobile users can order pizzas, receive mobile coupons, initiate phone calls from click-to-call messages, as well as sign up for text-for-rewards campaigns or text reminders. In the near future, mobile users will be able to take pictures of a movie poster and instantly download ringtones associated with that film.

**Proceedings of the 3rd International Conference of Economics and Management (CIREG 2016) Volume II** Houcine Berbou, Aziz Fassouane, Mustapha Belaisaoui, 2020-04-06 This book brings together papers presented at the 3rd Conference of Research in Economics and Management (CIREG) held in Morocco in May 2016. With a focus on the challenges of SMEs and innovative solutions, they highlight the contribution of researchers in the fields of business and management, with all their micro and macro-economic aspects. They shed light on the universal scientific vision of the importance of SMEs with answers relevant to their local context and adapted to their specific national situation. The relevance of SME research lies in its heuristic value of analyzing change, rather than in constructing a category, a particularly useful empirical concept. This third volume is focused on marketing and human resources.

**Competition Market Study of Tunisia's Retail Banking Sector** OECD, 2023-12-14 This market study provides an assessment of competition in three broad areas of the retail banking sector in Tunisia: current accounts, bank loans for micro, small and medium enterprises and mobile payment services. The report identifies areas where competition is not working as well as it could, reducing customers mobility and access to finance and limiting the competitive pressure that fintech companies can exert on traditional banks.

*Intelligent Systems* Amit Sheth, Amit Sinhal, Abhinav Shrivastava, Amit Kumar Pandey, 2021-07-21 This book contains the latest computational intelligence methodologies and applications. This book is a collection of selected papers presented at International Conference on Sustainable Computing and Intelligent Systems (SCIS 2021), held in Jaipur, India, during February 5–6, 2021. It includes novel and innovative work from experts, practitioners, scientists, and decision-makers from academia and industry. It covers selected papers in the area of artificial intelligence and intelligent systems, intelligent business systems, machine intelligence, computer vision, Web intelligence, big data analytics, swarm intelligence, and related topics.

*The Report: Tunisia 2017* Oxford Business Group, Tunisia’s GDP totalled TD84.3bn (€36.2bn) in 2015, expanding at a rate of 0.8%, down from growth of 2.3% the year before. The fall was due to a variety of external factors, including two terrorist incidents that negatively affected the tourism sector in particular and shook business confidence more generally. However, growth picked up somewhat in 2016, standing at 1%, 1.4% and

1.3% in the first, second and third quarters of the year, respectively, and is expected to maintain this upward trend in 2017, supported by greater export competitiveness. Moves to bolster the economy through reforms, such as the new investment law and plans to tackle wider structural issues, are likely to help to raise growth to higher levels than those witnessed in recent years, as should the improvement in security since the 2015 attacks, though the extent of this will depend in part on whether or not the economy of the country's main export destination and tourism source market – the eurozone – can emerge from its own recent slowdown.

A History of Mobile in 22 Objects Margaret McCrummen Fowler,2020 Museums exist to tell histories through objects. In a new publication and corresponding exhibition A History of Mobile in 22 Objects (October 30, 2020 - December 31, 2021), the History Museum of Mobile has endeavored to tell a very big history through a decidedly small number of objects. Twenty-two unexpected and compelling artifacts from the museum's collection weave together over 300 years of Mobile history, from the pre-Colonial era to the 21st-century port. Together, they are an accessible, object-based guide to Mobile history--
