*Food consumption in Kiribati* Troubat,N., Sharp, M.K.,2021-11-22 This report presents the main results derived from the analysis of the food data collected in the 2019/20 HIES to inform current patterns on food and nutrient consumption in Kiribati. Based on this analysis around one I-Kiribati in 12 does not have access to the amount of dietary energy needed to maintain a normal, active and healthy life. This prevalence is further confirmed by the analysis of the food insecurity experience scale data collected in the KHIES, which found that one I-Kiribati in 12 spent a whole day without eating in the last 12 months. The data further reveals that one I-Kiribati in three had to compromise on the quality of the food they could access because of a lack of money or other resources. To develop the policies that will be needed to guide the country through the achievement of the Sustainable Development Goals, data are needed. Whenever possible, indicators are given at national level and for sub-groups of the population.

**New Jersey Marriage Records, 1665-1800** William Nelson,1900 This is perhaps the most frequently consulted book in New Jersey genealogy. It was originally published in 1900 as Vol. XXII of the Archives of the State of New Jersey, and it remains today the principal authority on early New Jersey marriages. All told it contains approximately 30,000 entries (15,000 marriages), giving place of residence and date of marriage. The bulk of the work derives from marriage bonds and licenses formerly located in the Secretary of State's office but now on file in the New Jersey State Library. The balance--perhaps an additional 5,000 entries--were extracted from the marriage records of churches and counties in New Jersey. For the sake of simplicity the marriages are arranged in two alphabets, male and female.
