H. G. Wells

The War of the Worlds H. G. Wells, 2004-09 An unnamed protagonist, whose suburban London home is in the path of Martian invaders, provides a fast-paced, exceptionally realistic narrative of the invaders' fantastic appearances, sophisticated technology, and increasingly bloodthirsty advances. Science fiction buffs will welcome this large print edition of a great classic that pioneered the genre.

The War of the Worlds H. G. Wells, 2014-08-01 When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

The World Set Free H. G. Wells, 2021-03-14T21:37:23Z After learning of atomic physics, H. G. Wells began to think of its

potential impact on human society. In *The World Set Free*, atomic energy causes massive unemployment, shaking the already fragile social order. The ambitious powers of the world decide to seize the opportunity to compete for dominance, and a world war breaks out, echoing the looming Great War about to ignite in 1914. Waking to the catastrophe, humanity begins the hard search for a way into a better future. The novel traces a soldier, an ex-king, a despot, and a sage through a profound transformation of human society, and we gain a window into Wells' own thoughts and hopes along the way. With one prophetic stroke, Wells gives the first detailed depiction of atomic energy and its potential destructive power, and predicts the use of the air power in modern warfare. He may have even directly influenced the development of nuclear weapons, as the physicist Leó Szilárd, shortly after reading the novel in 1932, then conceived of harnessing the neutron chain reaction critical to the development of the atom bomb. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

The War of the Worlds – H.G. Wells H.G. Wells, 2021-06-10 **The War of the Worlds** (1898), by H. G. Wells, is an early science fiction novel which describes an invasion of England by aliens from

Mars. It is one of the earliest and best-known depictions of an alien invasion of Earth, and has influenced many others, as well as spawning several films, radio dramas, comic book adaptations, and a television series based on the story. The 1938 radio broadcast caused public outcry against the episode, as many listeners believed that an actual Martian invasion was in progress, a notable example of mass hysteria.

The War of the Worlds Peter J. Beck, 2016-08-25 First published in 1897, H.G. Wells's alien invasion narrative *The War of the Worlds* was a landmark work of science fiction and one that continues to be adapted and referenced in the 21st century. Chronicling the novel's contexts, its origins and its many multi-media adaptations, this book is a complete biography of the life – and the afterlives – of *The War of the Worlds*. Exploring the original text's compelling sense of place and vivid recreation of Wells's Woking home and the concerns of fin-de-siècle Britain, the book goes on to chart the novel's immediate international impact. Starting with the initial serialisations in US newspapers, Peter Beck goes on to examine Orson Welles's legendary 1938 radio adaptation, TV and film adaptations from George Pal to Steven

Spielberg, Jeff Wayne's rock opera and the numerous other works that have taken their inspiration from Wells's original. Drawing on new archival research, this is a comprehensive account of the continuing impact of *The War of the Worlds*.

H.G. Wells Ivor Brown, 1929

The War of the Worlds H G Wells, 2020-04-02 No one would have believed in the last years of the nineteenth century that this world was being watched keenly and closely by intelligences greater than man's and yet as mortal as his own; that as men busied themselves about their various concerns they were scrutinised and studied, perhaps almost as narrowly as a man with a microscope might scrutinise the transient creatures that swarm and multiply in a drop of water. With infinite complacency men went to and fro over this globe about their little affairs, serene in their assurance of their empire over matter. It is possible that the infusoria under the microscope do the same. No one gave a thought to the older worlds of space as sources of human danger, or thought of them only to dismiss the idea of life upon them as impossible or improbable. It is curious to recall some of the mental

habits of those departed days. At most terrestrial men fancied there might be other men upon Mars, perhaps inferior to themselves and ready to welcome a missionary enterprise. Yet across the gulf of space, minds that are to our minds as ours are to those of the beasts that perish, intellects vast and cool and unsympathetic, regarded this earth with envious eyes, and slowly and surely drew their plans against us. And early in the twentieth century came the great disillusionment. The planet Mars, I scarcely need remind the reader, revolves about the sun at a mean distance of 140,000,000 miles, and the light and heat it receives from the sun is barely half of that received by this world. It must be, if the nebular hypothesis has any truth, older than our world; and long before this earth ceased to be molten, life upon its surface must have begun its course. The fact that it is scarcely one seventh of the volume of the earth must have accelerated its cooling to the temperature at which life could begin. It has air and water and all that is necessary for the support of animated existence. Yet so vain is man, and so blinded by his vanity, that no writer, up to the very end of the nineteenth century, expressed any idea that intelligent life might have developed there far, or indeed at all, beyond its earthly level. Nor was it generally understood that since Mars is older than our

earth, with scarcely a quarter of the superficial area and remoter from the sun, it necessarily follows that it is not only more distant from time's beginning but nearer its end.

We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned

from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

The War of the Worlds Illustrated H G Wells,2020-07-09 The War of the Worlds is an episode of the American radio drama anthology series The Mercury Theatre on the Air directed and narrated by actor and future filmmaker Orson Welles as an adaptation of H. G. Wells's novel The War of the Worlds (1898). It was performed and broadcast live as a Halloween episode at 8 p.m. on Sunday, October 30, 1938, over the Columbia Broadcasting System radio network. The episode became famous for allegedly causing panic among its listening audience, though the scale of that panic is disputed, as the program had relatively few listeners.

The War of the Worlds "Annotated" Herbert George Wells,2020-11-22 The War of the Worlds is a science fiction novel by English author H. G. Wells, first serialised in 1897 by Pearson's Magazine in the UK and by Cosmopolitan magazine in the US. The novel's first appearance in hardcover was in 1898 from publisher

William Heinemann of London. Written between 1895 and 1897, it is one of the earliest stories to detail a conflict between mankind and an extraterrestrial race. The novel is the first-person narrative of both an unnamed protagonist in Surrey and of his younger brother in London as southern England is invaded by Martians. The novel is one of the most commented-on works in the science fiction canon. The plot has been related to invasion literature of the time. The novel has been variously interpreted as a commentary on evolutionary theory, British imperialism, and generally Victorian superstitions, fears, and prejudices. Wells said that the plot arose from a discussion with his brother Frank about the catastrophic effect of the British on indigenous Tasmanians. What would happen, he wondered, if Martians did to Britain what the British had done to the Tasmanians? At the time of publication, it was classified as a scientific romance, like Wells's earlier novel *The Time Machine*. *The War of the Worlds* has been both popular (having never been out of print) and influential, spawning half a dozen feature films, radio dramas, a record album, various comic book adaptations, a number of television series, and sequels or parallel stories by other authors. It was most memorably dramatised in a 1938 radio programme directed by and starring

Orson Welles that allegedly caused public panic among listeners who did not know the Martian invasion was fictional. The novel has even influenced the work of scientists, notably Robert H. Goddard, who, inspired by the book, helped develop both the liquid-fuelled rocket and multistage rocket, which resulted in the Apollo 11 Moon landing 71 years later.
