It Didn't Start with You Mark Wolynn,2016-04-26 A groundbreaking approach to transforming traumatic legacies passed down in families over generations, by an acclaimed expert in the field Depression. Anxiety. Chronic Pain. Phobias. Obsessive thoughts. The evidence is compelling: the roots of these difficulties may not reside in our immediate life experience or in chemical imbalances in our brains—but in the lives of our parents, grandparents, and even great-grandparents. The latest scientific research, now making headlines, supports what many have long intuited—that traumatic experience can be passed down through generations. *It Didn't Start with You* builds on the work of leading experts in post-traumatic stress, including Mount Sinai School of Medicine neuroscientist Rachel Yehuda and psychiatrist Bessel van der Kolk, author of *The Body Keeps the Score*. Even if the person who suffered the original trauma has died, or the story has been forgotten or silenced, memory and feelings can live on. These emotional legacies are often hidden, encoded in everything from gene expression to everyday language, and they play a far greater role in our emotional and physical health than has ever before been understood. As a pioneer in the field of inherited family trauma, Mark Wolynn has worked with individuals and groups on a therapeutic level for over twenty years. *It Didn't Start with You* offers a pragmatic and prescriptive guide to his method, the Core Language Approach. Diagnostic self-inventories provide a way to uncover the fears and anxieties conveyed through everyday words, behaviors, and physical symptoms. Techniques for developing a genogram or extended family tree create a map of experiences going back through the generations. And visualization, active imagination, and direct dialogue create pathways to reconnection, integration, and reclaiming life and health. *It Didn't Start With You* is a transformative approach to resolving longstanding difficulties that in many cases, traditional therapy, drugs, or other interventions have not had the capacity to touch.

The Demons of the Sea William Stephens Hayward,1874

The Conquest of America Tzvetan Todorov,1999 The Conquest of America is a fascinating study of cultural confrontation in the New World, with implications far beyond sixteenth-century America. The book offers an original interpretation of the Spaniards' conquest, colonization, and destruction of pre-Columbian cultures in Mexico and the Caribbean. Using sixteenth-century sources, the distinguished French writer and critic Tzvetan Todorov examines the beliefs and behavior of the Spanish conquistadors and of the Aztecs, adversaries in a clash of cultures that resulted in the near extermination of Mesoamerica's Indian population.

How to Make Good Things Happen: Know Your Brain, Enhance Your Life Marian Rojas Estapé,2021-05-18 An empowering journey through the mechanisms of the mind from one of the world's leading mental health experts. For those in pursuit of a better life, psychiatrist Marian Rojas Estapé presents the essential guide to neuroscience-driven mindfulness. Understanding your brain, managing your emotions, and being aware of your responses to stressors can give you greater self-control. Rather than a gimmicky guidebook, this is a thorough look at how our brains react to stress, threats, hyperstimulation, and the vices of our digital age. With proven techniques backed by solid, up-to-date psychiatric research, Estapé teaches us how to make the best of our lives. Combining science, psychology, and philosophy, Estapé delivers practical advice about how we can cultivate a happy existence. This includes understanding the parts of the brain, setting healthy goals and objectives, strengthening willpower, cultivating emotional

intelligence, developing assertiveness, avoiding excessive self-criticism and self-demand, and mastering the proven art of optimism.

The Moral Molecule Paul J. Zak, 2012 Why are men less faithful than women? Why are some people altruists and others cold-hearted bastards? Why do some businesses succeed while others collapse? In his entertaining and groundbreaking book, Paul Zak uses neuroscience and the fundamentals of economics to answer essential questions about human nature and explore exactly what goodness is.

The Mule Juan Eslava Galán, 2008-02-26 Critically acclaimed throughout Spain, and now available for the first time in English, this tender, satirical novel vividly captures the intrinsic absurdity of war—and the joys of true friendship in a place where it is difficult to distinguish man from beast. Juan Castro Pérez is a simple muleteer caught in the brutal Spanish Civil War. Never far from his closest companion—a stray mule named Valentina whom he is determined to keep for himself after the war—Juan engages in the low-brow drinking escapades, long shots at love, and an otherwise droning existence shared by his compatriots. As he lies, cheats, and steals to protect Valentina during his improbable odyssey home, Juan unwittingly “fights” for both sides—and becomes a reluctant and unlikely hero of the people, exploited by opportunistic journalists desperately trying to convince the Spanish public that the war is under control, when it is anything but.... From the Trade Paperback edition.

Lasker's Manual of Chess Emanuel Lasker, 2013-04-15 Great chess master shares his secrets, including basic methods of gaining advantages, exchange value of pieces, openings, combinations, position play, aesthetics, and other important maneuvers. More than 300 diagrams.

Walkscapes Francesco Careri, 2017-12-20 Walkscapes deals with strolling as an architecture of landscape. Walking as an autonomous form of art, a primary act in the symbolic transformation of the territory, an aesthetic instrument of knowledge and a physical transformation of the 'negotiated' space, which is converted into an urban intervention. From primitive nomadism to Dada and Surrealism, from the Lettrist to the Situationist International, and from Minimalism to Land Art, this book narrates the perception of landscape through a history of the traversed city.

Why Nations Fail Daron Acemoglu, James A. Robinson, 2013-09-17 Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that

underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? *Why Nations Fail* will change the way you look at—and understand—the world.

The Tupac Amaru Rebellion Charles F. Walker, 2014-04-08 Charles Walker examines the largest rebellion in the history of Spain's American empire, led by Latin America's most iconic revolutionary, Tupac Amaru, and his wife. It began in 1780 as a multiclass alliance against European-born usurpers but degenerated into a vicious caste war, leaving a legacy that still influences South American politics today.

War at the Edge of the World Ian James Ross, 2016-06-07 A Roman centurion sent to the empire's distant northern edge encounters treachery beyond Hadrian's Wall in this historical epic series debut. Roman Britain, Fourth Century AD. Once a soldier in an elite legion from the Danube, newly promoted centurion Aurelius Castus now finds himself stuck in the provincial backwater of Britannia. Just beyond Hadrian's Wall are a savage people allied with Rome known as the Picts. When their king dies under mysterious circumstances, an envoy must be sent to negotiate with their new leader. And Castus is selected to command the envoy's bodyguard. What starts as a simple diplomatic mission ends in bloody tragedy. As Castus and his men fight for their lives, the legionnaire discovers that nothing about his doomed mission was ever what it seemed. The first book in Ian James Ross's *Twilight of Empire* series, *War at the Edge of the World* is an exciting debut from an author as gifted at telling a story as he is at bringing the Late Roman Empire to life.

The Gutenberg Galaxy Marshall McLuhan, 1962-01-01 Since its first appearance in 1962, the impact of *The Gutenberg Galaxy* has been felt around the world. It gave us the concept of the global village; that phrase has now been translated, along with the rest of the book, into twelve languages, from Japanese to Serbo-Croat. It helped establish Marshall McLuhan as the original 'media guru.' More than 200,000 copies are in print.

The reissue of this landmark book reflects the continuing importance of McLuhan's work for contemporary readers.

Philosophy of Liberation Enrique Dussel, 2003-12-02 Argentinean philosopher, theologian, and historian Enrique Dussel understands the present international order as divided into the culture of the center -- by which he means the ruling elite of Europe, North America, and Russia -- and the peoples of the periphery -- by which he means the populations of Latin America, Africa, and part of Asia, and the oppressed classes (including women and children) throughout the world. In 'Philosophy of Liberation,' he presents a profound analysis of the alienation of peripheral peoples resulting from the imperialism of the center for more than five centuries. Dussel's aim is to demonstrate that the center's historic cultural, military, and economic domination of poor countries is 'philosophically' founded on North Atlantic ontology. By expressing supposedly universal knowledge, European philosophies, argues Dussel, have served to equate the cultural standards, modes of behavior, and rationalistic orientation of the West with human nature and to condemn the unique characteristics of peripheral peoples as nonbeing, nothing, chaos, irrationality. Hence, Western philosophies have historically legitimated and hidden the domination that oppressed cultures have suffered at the hands of the center. Dussel probes multinational corporations, the communications media, and the armies of the center with their counterparts among the Third World elite. The creation of a just world order in the future, according to Dussel, hinges on the liberation of the periphery, based on a philosophy that is able to think the world from the perspective of the poor and to reclaim the Third World's distinct cultural inheritance, which is imbedded in the popular cultures of the poor. Apart from the liberation of the periphery, there will be no future: the center will feed itself on the sameness it has ingrained within itself. The death of the child, of the poor, will be its own death. This is a disquieting but stimulating book for scholars and advanced students of philosophy, ethics, liberation theology, and global politics.

The Great Sea David Abulafia, 2011-06-01 Connecting Europe, Asia, and Africa, the Mediterranean Sea has been for millennia the place where religions, economies, and political systems met, clashed, influenced and absorbed one another. In this brilliant and expansive book, David Abulafia offers a fresh perspective by focusing on the sea itself: its practical importance for transport and sustenance; its dynamic role in the rise and fall of empires; and the remarkable cast of characters-sailors, merchants, migrants, pirates, pilgrims-who have crossed and re-crossed it. Ranging from prehistory to the 21st century, The Great Sea is above all a history of human interaction. Interweaving major political and naval developments with the ebb and flow of trade, Abulafia explores how commercial competition in the Mediterranean created both rivalries and partnerships, with merchants acting as intermediaries between cultures, trading goods that were as exotic on one side of the sea as they were commonplace on the other. He stresses the remarkable ability of Mediterranean cultures to uphold the civilizing ideal of *convivencia*, living together. Now available in paperback, The Great Sea is the definitive account of perhaps the most vibrant theater of human interaction in history.
