**The Studio SOS Book** Paul White, Hugh Robjohns, Dave Lockwood, 2013-05-29 Professional studio design is a specialized science, with more than a touch of black magic thrown in. Over the past few years, Sound on Sound magazine has made one trip each month to a reader's studio. These visits have demonstrated that it is fairly simple to make a huge improvement to an untreated project-studio room, without spending a fortune. However, they've also proven that beginners' attempts at DIY acoustic treatments often cause more problems than they solve. Utilizing knowledge from dozens of visits to readers' home and project studios, the SOS team imparts easy-to-understand, organized troubleshooting advice. Learn how to rid yourself of monitoring problems and get an accurate monitoring system, how to enhance the sound of your recording space, and how to perfect your instrumental and vocal recordings. Decrease the time you spend re-recording and mixing, simply by improving your room with advice from the guys who have seen it all when it comes to make-do small studios. Contains: A structured look at the problems that most often plague small studios, with individual studio case studies addressing each issue Real solutions that you can both afford and implement; no thousand-dollar investments or idealized studio designs that don't work with your space! Case studies that look at small studios' specific problems, with additional break-

outs tips that address quick fixes to common problems

**Chasing Sound** Susan Schmidt Horning, 2013-12-15 How technically enhanced studio recordings revolutionized music and the music industry. In Chasing Sound, Susan Schmidt Horning traces the cultural and technological evolution of recording studios in the United States from the first practical devices to the modern multi-track studios of the analog era. Charting the technical development of studio equipment, the professionalization of recording engineers, and the growing collaboration between artists and technicians, she shows how the earliest efforts to capture the sound of live performances eventually resulted in a trend toward studio creations that extended beyond live shows, ultimately reversing the historic relationship between live and recorded sound. Schmidt Horning draws from a wealth of original oral interviews with major labels and independent recording engineers, producers, arrangers, and musicians, as well as memoirs, technical journals, popular accounts, and sound recordings. Recording engineers and producers, she finds, influenced technological and musical change as they sought to improve the sound of records. By investigating the complex relationship between sound engineering and popular music, she reveals the increasing

reliance on technological intervention in the creation as well as in the reception of music. The recording studio, she argues, is at the center of musical culture in the twentieth century.

**RA The Book Vol 3** Roger D'Arcy, Hugh Flynn, 2015-02-02 Volumes 1 and 2 of this three part series focus on private, in house and commercial recording studios, mastering and cutting rooms and Recording Architecture's built output from 1987 to 2002 with technical chapters covering work stages A to H (including details of sound isolation, acoustic treatment, electrical power and ventilation/air conditioning). This third and final volume concentrates on post production studios (including film mix theatres), educational facilities (including research) and the years 2003 to 2010 together with work stages J to M (including technical furniture and audio monitor accommodation). Together, the three eBooks cover the entire contents of the hard back edition of *RA: The Book* but they have been edited and compiled to function as stand-alone volumes. Established by Roger D'Arcy and Hugh Flynn on April 1st 1987 Recording Architecture has risen to become one of the premier recording studio design companies in the world. First Commissioned by ex Def Leppard guitarist Pete Willis for Blue Room studios in Sheffield swiftly followed by projects such as Hulgrave Hall, for composer Keith Hopwood the company has grown to design key installations around the world. Now for the first time they will be publishing a history of these ground breaking designs covering all aspects of architectural, acoustic and interior design of these studios and spaces specifically related

to sound on a project by project basis. In a Career spanning Three decades Recording Architecture has virtually unrivalled experience in the design of studios which range in size and purpose from classical orchestral, residential, mixing, mastering, post production, film dubbing, video editing and rehearsal studios over 40 countries worldwide. Stating his desire to expand awareness with the new book Roger D Arcy states Over the years, and perhaps surprisingly, the only available books on recording studio design seem to have been written by individuals with little or no qualified background in Architecture or design in the field - we are trying show the detailed architectural/acoustic input behind a successful design with each studio study showing drawings in large format . This is not a theoretical guide but a detailed presentation of tried and tested techniques as applied to real, built projects in many of the case studies, the actual drawings issued for construction are reproduced. The examples illustrate not only what we think should be done but what was in fact physically (and successfully) implemented in a wide variety of situations from small, private project studios to large, commercial land mark studios such as Lansdowne and CTS. Examples range in scope from individual spaces and rooms to multi studio facilities and cover the two principal strands of recording and mixing: MUSIC studios recording (tracking), mixing and mastering (including cutting) project to orchestral in scale examples have been taken from the private, commercial and educational sectors. POST PRODUCTION studios voice over (dubbing), FX recording ( Foley ), film mix studios (dubbing theatres) from small voice over studios for TV to large Dolby Premier Certified film mix theatres. Contents include hundreds of photographs together with detailed plans and construction drawings - including comprehensive specifications of materials and techniques - showing exactly how these environments were created.
