Directory of Solar-terrestrial Physics Monitoring Stations - M. A. Shea,1984 The solar-terrestrial environment is monitored by a wide variety of scientific sensors located throughout the world and on space platforms. This second edition of the Directory of Solar-Terrestrial Physics Monitoring Stations presents detailed information for 1163 sensors used to monitor this environment. The scientific disciplines covered are solar and interplanetary phenomena, ionospheric phenomena, flare-associated events, geomagnetic variations, aurora, cosmic rays, airglow, and miscellaneous related phenomena such as atmospheric ozone. The following summary station tables are also given: master station list, alternate name list, listing by subdiscipline, and a list of stations closed since the first directory was published in 1977. In addition, a status report summarizes the relative decrease in solar-terrestrial physics monitoring activities since 1976.

Keywords: Solar-terrestrial physics; Solar phenomena; Solar activity; Cosmic rays; Aurora; Geomagnetic activity; Ionospheric phenomena; Solar-terrestrial data; Solar-terrestrial monitoring; Interplanetary phenomena; Solar flares; and Airglow.

Russian-English Dictionary of Idioms, Revised Edition Sophia Lubensky,2013-01-01 This is the most innovative, comprehensive, and scholarly bilingual dictionary of Russian idioms available today. It includes close to 14,000 idioms, set expressions, and sayings found in contemporary colloquial Russian and in literature from the nineteenth century to the present. The Russian idioms are provided with many English equivalents to render idioms in various contexts. Illustrative examples are cited to show how the idioms are used in context. Each entry also contains a grammatical description of the idiom, a definition—an innovative feature for a bilingual dictionary—and stylistic and usage information. A most notable part of the work is the alphanumeric index that makes finding the right expression very easy.

Annals of the International Geophysical Year W. J. G. Beynon,2013-10-22 Annals of the International Geophysical Year, Volume 48: Bibliography and Index contains bibliography of articles published in connection with the International Geophysical Year (IGY). The preparatory and operational phases of the IGY occupied nearly a decade and the data accumulated in the many scientific disciplines by workers in some 67 countries will provide material for publication for many years. The references have been assembled from information supplied by a wide variety of sources. These references have been grouped into 21 sections, of which Sections I-XIV followed the discipline grouping adopted during the IGY. Within each section references have been arranged in alphabetical order according to the name of the principal author. Anonymous articles are listed at the end of each section, again arranged in alphabetical order by title. In the

scientific literature, author's names originally printed in Cyrillic symbols sometimes appear with several different spellings because of the use of different transliteration systems. In the present Bibliography an attempt has been made to achieve consistency by using the same transliteration system throughout. This book will prove useful to geophysicists and researchers who are interested in the accomplishments of the International Geophysical Year.

Aurora's East-West Football Rivalry Steve Solarz, 2014-08-05 For over 120 years, the people of Aurora, Illinois, have gathered together to watch East Aurora and West Aurora High Schools square off in what is now Illinois' longest-running football rivalry. Since first taking to the gridiron in 1893, the schools have laid claim to mythical state championships, represented Illinois in intra-sectional games and pioneered night football. Alumni from these storied rivals include college all-Americans, Hall of Fame coaches, decorated war heroes, an Olympic medalist, a charter member of the NFL, numerous successful high school coaches, outstanding businessmen and civic leaders, including former mayors of Santa Monica, California, and Des Moines, Iowa. Author Steve Solarz pored over the records of more than two thousand games to produce a work that is both an encyclopedic resource and a passionate account of a celebrated tradition.

Why Elephants Cry John T. Hancock, 2023-05-29 *Why Elephants Cry* is a fascinating frolic through the literature and evidence surrounding the use of unusual behavior of animals to measure and predict the environment. The role of animals, from the smallest ant to the biggest elephant, as predictors of environmental changes is framed around the climate crisis, which highlights the increasingly important part that animals will have to play in the future. Renowned biologist Professor John T. Hancock collects anecdotal stories and myths along with scientific evidence, demonstrating that observation of animals can be of tangible use. He looks at the measurement of the air temperature using ants, crickets and snakes, and goes on to assess the evidence that the observation of a wide range of animals can predict the weather or the imminent eruption of volcanoes and earthquakes. Evidence of animals being able to predict lunar and solar events, such as lunar cycles and the Northern Lights, is also considered. This is the only time that all this literature has been brought together in one place, a fascinating reference for anybody interested in animals and the environment. The book is also an ideal supplementary textbook for students studying animal behaviour.
