Photographing the Aurora Borealis Andy Long, 2014-01-06 Numerous years back while leading an Alaska brown bears workshop, Andy saw some books of aurora borealis images. He was hooked and a winter trip to Alaska to photograph the incredible beauty presented on the pages of those books was soon to follow. Ever since his initial scouting trip he has been leading workshops yearly to the far north to let others see, experience and photograph this amazing phenomenon. While his true love is wildlife, Andy will tell you his favorite thing to see and photograph is the northern lights. His passion of teaching others about the aurora can now reach more people through this book. Come take a journey to see some beautiful shots of the aurora and learn how you can take shots like this when (not if) offered the chance to visit an area where the sky comes alive with color. When you want to experience this, visit Andy's website and sign up for a northern lights workshop and let him take you to the best spots possible and personally teach you.

Dusk to Dawn, 2nd Edition Glenn Randall, 2024-01-02 Embrace the dark and conquer landscape photography at night! In the past, landscape photography largely ended when the last light of dusk faded from the sky. Today it's only beginning. The latest digital cameras have made it much easier to create images of the landscape at night that film and early digital photographers could only dream of. Equipped with off-the-shelf cameras, more and more photographers are venturing into the night, far beyond the comforting glow of city lights, and returning with spectacular images of places both familiar and unknown that are unlike anything seen before. *Dusk to Dawn: A Guide to Landscape Photography at Night, 2nd Edition*, is your guide to this new photographic world. In it, photographer Glenn Randall—author of the bestselling *The Art, Science, and Craft of Great Landscape Photography*—teaches you how to plan, shoot, and process professional-quality images of the Milky Way, the aurora, lunar eclipses, meteor showers, comets, star trails, and landscapes lit solely by moonlight. In this fully revised and updated second edition, Randall goes deeper into today's technology that allows for great landscape photography at night: from mirrorless cameras that now truly dominate the market (and require a different approach to focusing) to the apps photographers need to know to best prepare for a successful shoot

(Photo Pills, Photo Ephemeris Web). This edition has also been updated with dozens of new photographs from the author, as well as new sections on photographing comets, the zodiacal light, and noctilucent clouds. Throughout the book, Randall emphasizes ways to integrate beautiful depictions of the night sky with equally compelling renditions of the land below it to create complete landscape images that evoke a sense of place—and a sense of wonder. Equipped with the knowledge in this book, you will be able to create your own nocturnal masterpieces. TABLE OF CONTENTS Introduction Chapter 1: Preparing for Night Photography Chapter 2: Tools for Night Photography Chapter 3: Essential Skills for Night Photography Chapter 4: Planning a Milky Way Shoot Chapter 5: Shooting the Milky Way Chapter 6: Processing Night Landscapes Chapter 7: Advanced Techniques for Night Landscapes Chapter 8: Photographing Star Trails Chapter 9: Shooting the Aurora Chapter 10: Photographing Meteor Showers and Comets Chapter 11: Photographing Lunar Eclipses Chapter 12: Photographing Moonlit Landscapes Index

The Northern Light A. Brekke,A. Egeland,2012-12-06 In Nordic literature a remarkable discussion of the northern light appears in Kongespeilet (The

King's Mirror) a thirteenth-century Norwegian chronicle. It is described in vivid detail as the following translated excerpts demonstrate: These northern lights have this peculiar nature, that the darker the night is, the brighter they seem, and they always appear at night but never by day, most frequently in the densest darkness and rarely by moonlight. In appearance they resemble a vast flame of fire viewed from a great distance. It also looks as if sharp points were shot from this flame up into the sky; these are of uneven height and in constant motion, now one, now another darting highest; and the light appears to blaze like a living flame. Three different theories for the origin of the northern light were suggested in this book. Numerous naturally occurring heavenly phenomena have been observed and enjoyed as long as the Earth has been inhabited, but hardly any of them has stirred man's imagination, curiosity and fear as much as the northern light. The northern light is certainly one of the most spectacular of nature's phenomena.

Dancing With Aurora Kimberly Titus, 2020-11-11 When you let your heart dance, You might be surprised where it leads...Aurora Kennedy spent the first seventeen years of her life in the frozen arctic. Once she graduates, she is determined to get on a plane that will take her far from her home in rural Alaska. Her plan does not include getting tied down in a relationship. She suddenly finds herself revising that plan when James Channing transfers to her high school from Arkansas looking like he just stepped off a movie screen. New in town, James realizes he has a lot to learn about life on the

last frontier. Aurora advises James on how to adjust to their small town and even smaller school. The last thing she needs is to fall for a guy right before she has her ticket to a new life in an out-of-state college, but then again, James might be the perfect person to help her prepare for what waits outside Alaska. Spending time with James leaves Aurora with an impossible choice. Would love be enough to melt her frozen heart

Through the Night Sky DK,2020-09-08 A beautifully illustrated collection of nonfiction stories featuring the many wonders that exist in the night sky. Beginning with a sunset and ending at dawn, Through the Night Sky shines a light on the magical events taking place in the darkness above. Unlike an astronomy book that focuses on eye-popping facts and figures about the universe, Through the Night Sky features a series of incredible stories that take place in the sky at night. Track a colony of bats as they fly through the twilight to pollinate the flowers of the mysterious baobab tree, follow a family into the wilderness to gaze at the constellations, watch whales swimming through chilly Arctic waters under the gentle glow of the Northern Lights, then chart the journey of a ship navigating by the stars. Through the Night Sky is a beautiful book that spans a wide range of subjects, including

everything from nocturnal animals or revelers watching fireworks illuminate the night, to celestial objects such as the moon, planets, stars, and meteor showers--all under the vast night sky.

Northeastern Minnesota All-Outdoors Atlas & Field Guide Sportsman's Connection ,2016-08-27 Sportsman's Connection Northeastern Minnesota All-Outdoors Atlas & Field Guide contains maps created at twice the scale of other road atlases, which means double the detail. And while the maps are sure to be the finest quality you have ever used, what makes this eBook unique is all the additional information. Your favorite outdoor activities including fishing lakes and streams, hunting, camping, hiking and biking, snowmobiling and off-roading, paddeling, skiing, golfing and wildlife viewing are covered in great depth with helpful editorial and extensive tables, which are all cross-referenced and indexed to the map pages in a way that's fun and easy to use.

Letters to India Cynthia Wales Tuthill,2009-05 Dr. Tuthill began writing her exquisite travel stories in honor of her best friend, the astronaut Kalpana Chawla, who tragically perished in the crash of the space shuttle Columbia in 2003. Tuthill's first collection of stories, Letters from Africa, lovingly chronicles thrilling safari trips taken throughout southern Africa over the past five years. This new collection of stories represents an eclectic mix of letters written for Kalpana's sisters in India, detailing Tuthill's other fascinating travel experiences. The stories range from scuba

diving with manta rays to searching for exotic birds, from a frigid night spent in the Ice Hotel in Sweden to raising funds for breast cancer research with a grueling 60-mile walk. Throughout these stories we experience Tuthill's passion for life and adventure, for animals and wild places, and her concern for conducting a life as ecologically sensitive as possible. The colors, the sounds, and the scents are so realistically portrayed that it feels as if you are there with Tuthill throughout her travels, culminating in a captivating and poignant trip to visit Kalpana's sisters in India, commemorating the 5th anniversary of the shuttle disaster.
