Directory of World Cinema: Australia and New Zealand 2 Ben Goldsmith, Mark David Ryan, Geoff Lealand, 2015-04-01 Building on and bringing up to date the material presented in the first instalment of *Directory of World Cinema: Australia and New Zealand*, this volume continues the exploration of the cinema produced in Australia and New Zealand since the beginning of the twentieth century. Among the additions to this volume are in-depth treatments of the locations that feature prominently in the countries' cinema. Essays by leading critics and film scholars consider the significance of the outback and the beach in films, which are evoked as a liminal space in *Long Weekend* and a symbol of death in *Heaven's Burning*, among other films. Other contributions turn the spotlight on previously unexplored genres and key filmmakers, including Jane Campion, Rolf de Heer, Charles Chauvel and Gillian Armstrong. Accompanying the critical essays in this volume are more than one hundred and fifty new film reviews, complemented by film stills and significantly expanded references for further study. From *The Piano* to *Crocodile Dundee*, *Directory of World Cinema: Australia and New Zealand 2* completes this comprehensive treatment of a consistently fascinating national cinema.

The Media and Communications in Australia Stuart Cunningham, Sue Turnbull, 2020-07-16 Traditional media are being reshaped by digital technologies. The funding model for quality journalism has been undermined by the drift of advertising online, demarcations between different forms of media are rapidly fading, and audiences have fragmented. We can catch up with our favourite TV show on a tablet, social media can be more important than mainstream radio in a crisis, and organisations large and small have become publishers in their own right on apps. Nevertheless mainstream media remain powerful. *The Media and Communications in Australia* offers a systematic introduction to this dynamic field. Fully updated and revised to take account of recent developments, this fourth edition outlines the key media industries and explains how communications technologies are impacting on them. It provides a thorough overview of the main approaches taken in studying the media, and includes an expanded 'issues' section with new chapters on social media, gaming, apps, the environment, media regulation, ethics and privacy. With contributions from some of Australia's best researchers and teachers in the field, *The Media and Communications in Australia* remains the most comprehensive and reliable introduction to media and communications available. It is an ideal student text, and a reference for teachers of media and anyone interested in this influential industry.

Life in the Stocks Matt Stocks,2022-03-08 In the last few years, the podcast industry has really boomed. Every journalist and celebrity worth their salt now has their own. But what makes Life In The Stocks special? Well, for one thing it's the eclectic pool of speakers from a wide range of creative disciplines. It's also the rawness, honesty, and vulnerability of the conversations that Matt Stocks shares with his guests: the interviews are completely candid, unchecked, and authentic. For the purpose of this book, Life In The Stocks: Veracious Conversations with Musicians & Creatives Vol. 2, Matt collected highlights from the first eighteen months of the podcast, and presented the anecdotes, musings, and observations in a new format, to tell new stories and tie them together in a way that takes the reader on an emotional journey—from early childhood memories to the dizzying heights of fame, via creative enterprises, experimentation with mind-altering substances, battles with mental health, spiritual contemplations, the meaning of life, death, and a whole lot more. Full of inspirational, entertaining, shocking, tragic, heart-warming, and hilarious tales, Life In The Stocks Vol. 2 is much more than just a collection of interview transcripts: it is an insight into the minds of some of America's most enduring underground artists and an exploration of the history of alternative culture in the US, filtered via the perspective of someone from the UK. In short, it's a unique and special cultural commentary, and one you will not want to put down.

Radio's New Wave Jason Loviglio,Michele Hilmes,2013-06-19 Radio's New Wave explores the evolution of audio media and sound scholarship in the digital age. Extending and updating the focus of their widely acclaimed 2001 book The Radio Reader, Hilmes and Loviglio gather together innovative work by both established and rising scholars to explore the ways that radio has transformed in the digital environment. Contributors explore what sound looks like on screens, how digital listening moves us, new forms of sonic expression, radio's convergence with mobile media, and the creative activities of old and new audiences. Even radio's history has been altered by research made possible by digital and global convergence. Together, these twelve concise chapters chart the dissolution of radio's boundaries and its expansion to include a wide-ranging universe of sound, visuals, tactile interfaces, and cultural roles, as radio rides the digital wave into its second century.

Rhythm, Play and Interaction Design Brigid M. Costello,2018-04-03 There are rhythms of action and response to all human-computer interactions. As we click, swipe, tap and sway to their beats, these rhythms intersect with the rhythms of our everyday lives. Perhaps they synchronize, perhaps they disrupt each other or maybe they dance together. Whatever their impact our experience of these rhythms will colour our experience of an interaction design. In playful interactive applications, rhythm is especially crucial because of the role it performs in building and maintaining the precarious spirit of play. Play involves movement and this movement has a rhythm that drives the experience. But what is the character of these rhythms of play and how can they be used in the design of interactive applications? These questions are the focus of this book. Drawing on traditions of rhythmic design practice in dance, performance, music and architecture, this book reveals key insights into practical strategies for designing playful rhythmic experience. With playful experiences now being incorporated into almost every type of computer application, interaction design practitioners and researchers need to develop a deeper understanding of the specific character of rhythms within play. Written from a designer's perspective, with interviews from leading creative artists and interaction design practitioners, Rhythm, Play and Interaction Design will help practitioners, researchers and students understand, evaluate and create rhythmic experiences.
