Tax Reform Australia. Treasury, Peter Costello, 1998

**The Impact of the New Tax System on Australian Federalism** David Hamill, 2006 Through this analysis of the development and implementation of ANTS and its implications for federal state financial relations, light is shed on the processes by which institutional change occurs within the Australian federation.

**Taxing Times** John Quiggin, 1998 Taxation is perhaps the longest-running subject for debate in Australian politics. In this book John Quiggin argues that a GST on its own will not restore the credibility of the tax system.

**Reform of the Australian Taxation System** Paul Keating, 1985

**Australian Tax Reform in Retrospect and Prospect** John G. Head, Monash University. Centre of Policy Studies, 1989 Conference papers contributed by various authors. Topics include: Overview and international perspectives; Income tax reform; Consumption taxes, sales tax reform and tax mix change; Tax incidence and economic effects: estimates and methodology. Some of the delivered articles: Taxation of fringe benefits by D.J. Collins; International aspects of tax reform in Australia by Richard M. Bird; U.S. tax reform by Charles E. McLure; New Zealand tax reform by R.J. Stephens; A value added tax for Australia by G.M. Bascand; Changes in Australian tax incidence between 1975-76 and 1984-85 by N.A. Warren.

Taxploitation Peter Saunders, 2006 In this new book, ten eminent authors explain why and how Australia's system of personal income tax needs reforming. The total tax take in Australia is around the OECD average, but tax on people's incomes is well above average. High income taxes undermine national prosperity. The top rate is out of line with most other western countries, which have been moving to lower and flatter rates. Because the threshold at which people start to pay tax is well below subsistence, people are taxed before they have earned enough to keep body and soul together. The interaction of tax and welfare creates dispiritingly high 'effective marginal tax rates' which deter people on welfare from looking for work and penalize low-wage families whenever they try to increase their take-home pay. The system is riddled with distortions and disincentive effects. There are so many special allowances, exemptions, credits, offsets and write-offs that tax law has become almost indecipherable, and gross amounts of money and time get spent trying to reduce liability to tax. Most really-high earners are paying a lower rate of tax than workers earning little more than average income. Retirement savings are viciously taxed, and because tax brackets are not indexed to inflation, the total tax-take increases year by year without anybody even realizing it. Outside of the federal government there is a mounting demand that something radical needs to be done to tackle these problems. This book looks at the options and demonstrates that the case for radical reform is now unanswerable. The Contributors: Peter Burn - National Senior Adviser, Australian Industry Group Lauchlan Chipman - Professor Emeritus, University of Wollongong and Central Queensland University Sinclair Davidson - Associate Professor, RMIT University Terry Dwyer - Consultant and Visiting Fellow, Australian National University John Humphreys - Independent Policy Analyst Barry Maley - Senior Fellow, Centre for Independent Studies Andrew Norton - Research Fellow, Centre for Independent Studies Alex Robson - Lecturer in Economics, Australian National University Peter Saunders - Social Research Director, Centre for Independent Studies Geoffrey de Q Walker - Professor Emeritus, University of Queensland, Barrister-at-law

Australian Taxation Policy Peter D. Groenewegen, 1987

**Australia's Future Tax System** Chris Evans, Richard Krever, Peter Mellor, 2010 The Review of Australia's Future Tax System, led by the Secretary to the Treasury Ken Henry and undertaken in 2008 and 2009, was a major and unique event in the context of taxation policy in Australia. It has already - indirectly and inadvertently - contributed to the downfall of at least one Prime Minister in 2010 through its ill-fated proposal for a minerals resources rent tax. But its implications go well beyond short term politics. It promises to have significant influence on the course of tax reform and the shape of Australian society over the years ahead. Its vision projects well into the middle years of the twenty first century. This volume brings together the thoughts of leading tax economists and other specialists from Australia and around the world on the future prospects for the Australian tax system based upon a warts and all review of the Review from a variety of perspectives. In a wide-ranging analysis it highlights the opportunities and challenges that lie ahead, lays bare some of the shortcomings of the Review, identifies real strengths, compares the process of tax reform in Australia with developments in other countries, and explores the likely implications of the proposals set out in the Review for the equity, efficiency and simplicity of the Australian tax system. All those interested in an understanding of the Australian tax system and its future prospects will find this a stimulating and rewarding read.

*Land Tax in Australia* Vince Mangioni, 2015-12-22 Land Tax in Australia demonstrates how land tax operates and is administered across State and local governments in Australia. International expert Vincent Mangioni reviews the current status and emerging trends in these taxes in Australia and compares them with the UK, USA, Canada, Denmark and New Zealand. Using substantial original research, the author sets out what Australia must do through practice and policy to reform and bring this tax into the 21st Century. The need for fiscal reform and strengthening the finances of Australia's sub-national government is long overdue. These reforms aim to minimise the taxpayer revolts encountered in previous attempts at land tax reform, while improving tax effort in line with other advanced OECD countries. This book provides an essential resource for all property professionals working in development, valuation, law, investment, as well as accountants, tax economists and government administrators. It is highly recommended for students on property, taxation, legal and social science courses.

**Taxation for Australian Businesses** Rod Caldwell, 2014-10-20 Simplify tax and save money with streamlined bookkeeping Small businesses are often just that—small. Bookkeeping may be done by a professional outside the company, but more often falls to an employee or the business owner, who may or may not be well-schooled in the intricacies of tax law and business regulations. Tax time can end up costing small businesses a

fortune in either professional fees or missed deductions every year. What if you could simplify the process and save money? Taxation for Australian Businesses: Understanding Australian Business Taxation Concessions is the ultimate guide to tax for the small business owner. Author Rod Caldwell, 20-year veteran of the Australian Taxation Office, leads you through the process of managing your books and keeping more straightforward records to simplify the process of filing tax. The introduction of the GST and the new tax system involves a lot of new work for business owners, but Taxation for Australian Businesses eases the way by explaining the intricacies of applicable tax law, fully updated to parallel the May 2014 budget. Topics include: Business structures, accounting systems, and cash accounting FBT, private versus domestic use, and when to record a payment Motor vehicles, the GST, and depreciation Owners salary, end of period processing, and how to account for stock trading The book explains everything you need to know and ties it all together to show you how to put the information into practice. No jargon, no textbooks, just common sense and reason. If you would like to get your bookkeeping straightened out and get back to your business, Taxation for Australian Businesses: Understanding Australian Business Taxation Concessions is the one guide that will get you there quickly.

**Artful Aussie Tax Dodger** Lex Fullarton,2017-05-30 In The Artful Aussie Tax Dodger, Lex Fullarton studies the impact of 100 years of taxation legislation in Australia, from 1915 to 2016. He finds that despite the lessons of a century of taxpayers and administrators' actions and reactions, old habits are hard to break. Driven by the winds of various political and social interests, Australia embarked on a century of tax reform from the moment when its first Income Tax Assessment Act was introduced. Fullarton discusses the oldest of tax planning entities, the British Trust, the introduction of Australia's 'reformed' consumption tax, its VAT, referred to as Goods and Services Tax, an analysis of tax avoidance schemes, and finally government taxation reform. This book looks at how Australia's tax legislation was grounded, added to, avoided, and evolved, until it went 'Back to the Future'. It is a collection of studies compiled from experience and research conducted over twenty years of involvement in taxation law in rural and remote Australia.

**Australia's Cash Economy: A Troubling Issue for Policymakers** Christopher Bajada,2017-11-22 This title was first published in 2002: Very little is known on the Australian underground economy. Only speculation has offered estimates of its size - around ten per cent of GDP. This book provides comprehensive research on the topic for Australia, including the suggestion that the underground economy exhibits strong fluctuations. The text has three central objectives: to understand why a suspiciously large amount of currency remains outstanding and cannot be explained by legitimate transactions alone. Secondly, to examine factors that motivate individuals to participate in the underground economy and the consequences they may have on the business cycle, on the quality of the National Accounts and on taxation revenue. And finally, to examine whether households or businesses are contributing most to the underground economy and whether the new tax system, introduced in July 2000, will have any impact on underground activities in Australia.
