Local and Semi-global Approaches to the Extraction of 3D Anatomical Landmarks from 3D Tomographic Images Sönke Frantz, 2001

Proceedings of the 1st International Conference on New Materials, Machinery and Vehicle Engineering J. Xu, Y. Cai, M. El Mansori, 2022-05-06 New materials are constantly being developed which may improve or transform many aspects of our lives, and nowhere is this more exciting than in the fields of vehicle and machinery technology. This book presents the proceedings of the 2022 International Conference on New Materials, Machinery and Vehicle Engineering (NMMVE 2022), held as a virtual event due to the COVID-19 pandemic and travel restrictions, from 18 - 20 March 2022. NMMVE 2022 provides an international forum for researchers and engineers to present and discuss recent advances, new techniques, and applications in the fields of new materials, machinery and vehicle engineering, and attracts academics, scientists, engineers, postgraduates, and other professionals from a wide range of universities and institutions. A total of 121 submissions were received, from which 48 were accepted for inclusion in the conference and proceeding after a rigorous, standard single-blind reviewing process. The papers are grouped into 3 sections: machinery (30 papers); new materials (11 papers); and vehicle engineering (7 papers). Providing an overview of the latest developments in these fields, the book will be of interest to all those wishing to know more about new materials and machine and vehicle engineering.

Video Production 101 Antonio Manriquez, Thomas McCluskey, 2014-12-23 The need for students and young professionals to be effective communicators and media creators has never been so essential as it is today. Crafting multimedia messages across a variety of platforms is the key growth skill of the 21st century, and strong visual and verbal communication skills, media literacy, and technical proficiency all play a critical role. Video Production 101: Delivering the Message introduces and explores the roles of story development, producing, directing, camerawork, editing, sound design, and other aspects key to media creation. After each topic is explored students develop their skills with hands-on activities in each chapter, such as making a video self-portrait, visual poem, public service announcement, promotional video, short fiction film, and documentary. The authors include videos so readers can watch and learn some of the more visually-oriented concepts. Video Production 101 teaches the way students want to learn – in a project-based and results oriented structure, covering the process of media creation in all its varieties. Accessible

and engaging, this book is the ultimate guide for anyone who wants to take control and clearly, effectively, and powerfully deliver his or her message to the world using video.

Perspectives on Digital Pathology M. García-Rojo,B. Blobel,A. Laurinavicius,2012-08-28 Multimedia information and digital images are increasingly important in the field of healthcare, but establishing an adequate technological framework for their management, and workable international standards to ensure compatibility and interoperability, are crucial if they are to be employed effectively. This book presents the main research efforts of EURO-TELEPATH, an initiative of the European Corporation in Science and Technology (COST) Action, IC0604. This program began in November 2007, and ran until November 2011. Its aim was to develop the standards and solutions necessary to represent, interpret, browse and retrieve digital medical images, while preserving their diagnostic quality for clinical purposes, education and research. At the end of the project, the most relevant researchers in the field of digital pathology – many of whom had been active members of EURO-TELEPATH – were asked to contribute to a book which would compile the main research efforts of the European COST Action consortium. The book is divided into six parts. The first is an introduction to the instruments and activities of COST. This is followed by sections dealing with: the state-of-the-art in pathology; pathology business modeling; standards and specifications in pathology; the analysis, processing, retrieval and management of images; technology and automation in pathology; and strategic developments and emerging research. As well as being a comprehensive overview of the IC0604 COST program, the book includes a selection of papers from American and Japanese researchers working in the same field.

Neural Nets WIRN09 Bruno Apolloni,Simone Bassis,Francesco Carlo Morabito,2009 This book reports the proceedings of WIRN09, the 19th Italian Workshop of the Italian Society for Neural Networks (SIREN). Neural networks explore thought mechanisms that efficient computational tools and a representative physics of our brain share together and that ultimately produce the loops of our thoughts. The general approach is to see how these loops run and which tracks they leave.

Intelligent Environments 2017 C. Analide,P. Kim,2017-08-18 The term Intelligent Environments (IEs) refers to the physical spaces in which IT and other pervasive computing technologies are integrated and used to achieve specific goals for the user, the environment or both. The ultimate objectives of IEs are enriching user experience, enabling better management and increasing user awareness of that environment. This book presents the proceedings of the 13th International Conference on Intelligent Environments, held in Seoul, Korea, in August 2017. The conference provides a multidisciplinary collaborative forum for researchers and practitioners from computer science, electronic engineering, building architecture, art and design, sociology, government and education to present theoretical and practical results related to the development and applications of Intelligent Environments. IE'17 focuses on the development of advanced Intelligent Environments, as well as other newly emerging and rapidly evolving topics. The book also includes the proceedings of the following associated workshops, held during the first 2 days of the conference, which emphasize the multi-disciplinary and transversal aspects of IEs: the 6th International Workshop on the Reliability of Intelligent Environments (WoRIE'17); the 1st International Workshop on Intelligent Systems for Agricultural Production and Environmental Protection (ISAPEP'17); the 1st Workshop on Citizen Centric Smart Cities Solutions (CCSCS'17); and the 1st International Workshop on Advanced Multiple Access in Mobile Telecommunications (AMAMT'17). Providing a state-of-the-art overview of the discipline, this book will be of interest to professionals from a diversity of fields whose work involves the development or application of Intelligent Environments.

Artificial Intelligence Research and Development D. Riaño, E. Onaindia, M. Cazorla, 2012-10-12 One hundred years after the birth of Alan Turing, the great pioneer of computer science, artificial intelligence has become so much a part of everyday life that it is hard to imagine the world without it. This book contains papers from the 15th International Conference of the Catalan Association of Artificial Intelligence (CCIA 2012), held at the Universitat d'Alicant, Spain, in October 2012. Since 1994 the Catalan Association of Artificial Intelligence (ACIA) has fostered cooperation between researchers in artificial intelligence within the Catalan speaking community. The annual CCIA is its international conference, a platform where not only researchers from Catalan speaking countries, but also those working in artificial intelligence worldwide, have found a place to show, discuss and publish the results of their researches and developments. The 23 papers presented here, which include contributions from the AI community all over the world, cover topics such as KDD, DM and machine learning; natural language processing and recommenders; computer vision; robotics; AI for optimization problems and AI applications in the real world. The book also includes the contributions of the two invited keynote speakers at the conference - Oscar Cordón and Eduardo Nebot - which respectively address the subjects of real-world applications of soft artificial intelligence, and challenges of automation and safety in field robotics.
