Six Men Built the Modern Auto Industry Richard Alan Johnson,

This is the story of six extraordinary men who each built something from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again.- The compelling story of the global car business

over the past half-century.- A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men- Full of business revelations at the highest level, written by a journalist operating at the heart of the industry- Global appeal that shows how automotive groups in the USA, Europe and Asia have influenced each other- A business story interlaced with personal details that explains why the six were determined to be successfulAbout the AuthorFor two decades, Richard Johnson has worked for Crain Communications, publisher of the world's leading automotive business publications. Founding editor of Crain's Automotive News Europe, he has been a reporter and editor for the group in Detroit, Tokyo, Frankfurt and London. He is currently a senior editor with Automotive News in Detroit and regularly talks to the most senior executives in the leading car manufacturing groups.

Age of Auto Electric Matthew N. Eisler, 2022-12-06 The electric vehicle revival reflects negotiations between public policy, which promotes clean, fuel-efficient vehicles, and the auto industry, which promotes high-performance vehicles. Electric cars were once as

numerous as internal combustion engine cars before all but vanishing from American roads around World War I. Now, we are in the midst of an electric vehicle revival, and the goal for a sustainable car seems to be within reach. In *Age of Auto Electric*, Matthew N. Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental, energy, and economic policy imperatives that informed a protracted reappraisal of the automobile system. These factors drove the electric vehicle revival, argues Eisler, hastening automaking's transformation into a science-based industry in the process. Challenging the common assumption that the electric vehicle revival is due to the development of better batteries, *Age of Auto Electric* instead focuses on changing environmental and socioeconomic conditions, energy and environmental policies, systems of energy conversion and industrial production, and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades. Eisler describes a world in transition from legacy to alternative energy-conversion systems and the promises, compromises, new problems, and unintended consequences that enterprise has entailed.

The AUTO UNION-DKW Guide Keith Ayling, 2016-06-17 “Tell me its pedigree and I’ll tell you what kind of car it is!” According to legend, this pungent comment was made by the great Tazio Nuvolari when a manufacturer asked him to drive a new car in the German Grand Prix. West Germany’s Auto Union products—the front-wheel-drive DKW 750 and the larger Auto Union S-1000 series—are direct descendants of the famous Auto Union racing cars that Nuvolari was later to drive to victory in the British and German Grand Prix races, and which literally cleaned up on the racing tracks of Europe before World War II ended peaceful competition between great automobile marques. These were the cars that would do 205 mph, weighed a mere 2,508 pounds, and were constructed with what one writer describes as an “unearthly kind of superior craftsmanship ...” (1961 - Keith Ayling)

Six Men Who Built the Modern Auto Industry Richard A. Johnson, 2010-11 Henry Ford II -- visionary autocrat and the grandson of the founder of Ford Motor Co. Soichiro Honda -- founder of Honda, who revolutionized Japanese automaking. Lee Iacocca -- father of the Mustang and savior of Chrysler. Eberhard von Kuenheim -- founder of the modern BMW. Bob Lutz -- a driving force at Chrysler, GM, and BMW. Ferdinand Piech -- architect of

the Volkswagen Group. The lives and careers of these six men were profoundly intermingled; they competed and collaborated, even hired and fired one another. This book tells their stories in their own words, showing how their fresh approaches to design, engine, mfg., and sales and marketing reshaped their respective car co. and, had a significant impact on the soc. in which they lived. Legendary German Cars Peter Ruch, 2011 German cars are synonymous with quality and prestige. A strong claim can be made that automobile transportation was primarily invented in Germany, which today is still home to some of the most important names in the international auto industry. This book retraces the story of some of the most significant German automakers and their models, covering over a hundred years of history, and presenting legendary creations that have left their mark on the auto's evolution and in the hearts of many enthusiasts. German manufacturers have always played an essential role in the automobile sector, at first with names such as Horch, Auto-Union and Maybach, and later with brands like Audi, BMW, Mercedes Benz and Porsche, which today are considered among the world's most prestigious for quality, style and performance. This book presents the most

important models in German car manufacturing history, from the Benz-Patent-Motorwagen 1 of 1886 through the race cars of the pre-war period, the cars of the economic boom, and the ever-famous Porsche 911 and the brand new bestsellers from Stuttgart, Munich and Ingolstadt.

Ludicrous Edward Niedermeyer,2019-08-20 Tesla is the most exciting car company in a generation . . . but can it live up to the hype? Tesla Motors and CEO Elon Musk have become household names, shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long-established automakers, and, to many industry observers, Tesla is defining the future of the industry. But behind the hype, Tesla has some serious deficiencies that raise questions about its sky-high valuation, and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful, zero-defects approach of other car manufacturers, even as it struggles to mass-produce cars reliably, and with minimal defects. While most car manufacturers struggle with the razor-thin margins of mid-priced sedans, Tesla's strategy requires that the Model 3 finally bring it to profitability, even as the high-priced Roadster and Model

S both lost money. And Tesla's approach of continually focusing on the future, even as commitments and deadlines are repeatedly missed, may ultimately test the patience of all but its most devoted fans. In *Ludicrous*, journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day-to-day realities of the company—and the cars it produces. Blending original reporting and never-before-published insider accounts with savvy industry analysis, Niedermeyer tells the story of Tesla as it's never been told before—with clear eyes, objectivity and insight.

Car Wars John J. Fialka, 2015-09-22 The resurgence of the electric car in modern life is a tale of adventurers, men and women who bucked the complete dominance of the fossil fueled car to seek something cleaner, simpler and cheaper. Award-winning former Wall Street Journal reporter John Fialka documents the early days of the electric car, from the M.I.T./Caltech race between prototypes in the summer of 1968 to the 1987 victory of the

Sunracer in the world's first race featuring solar powered cars. Thirty years later, the electric has captured the imagination and pocketbooks of American consumers. Organizations like the U.S. Department of Energy and the state of California, along with companies from the old-guard of General Motors and Toyota as well as upstart young players like Tesla Motors and Elon Musk have embraced the once-extinct technology. The electric car has steadily gained traction in the U.S. and around the world. We are watching the start of a trillion dollar, worldwide race to see who will dominate one of the biggest commercial upheavals of the 21st century. Drawing from the last decade of his 26-year career at the Wall Street Journal, where he covered energy and environmental matters, ClimateWire founder and industry insider John Fialka brings to life this thrilling and important story about America's rejection and second obsession with the electric car.

Elon Musk Walter Isaacson, 2023-09-12 #1 New York Times non-fiction bestseller #2 Sunday Times non-fiction bestseller SHORTLISTED FOR THE FINANCIAL TIMES BUSINESS BOOK OF THE YEAR AWARD CHOSEN AS A BOOK OF THE YEAR BY APPLE, AMAZON, THE TIMES AND FINANCIAL TIMES Epic feats. Epic failures. An epic story. Walter Isaacson charts Elon Musk's journey from humble beginnings to one of the wealthiest people on the planet – but is Musk a genius or a jerk? From the author of *Steve Jobs* and other bestselling biographies, this is the astonishingly intimate story of Elon Musk, the most fascinating and controversial innovator of our era – a rule-breaking visionary who helped to lead the world into the era of electric vehicles, private space exploration and artificial intelligence. Oh, and took over

Twitter. When Elon Musk was a kid in South Africa, he was regularly beaten by bullies. One day a group pushed him down some concrete steps and kicked him until his face was a swollen ball of flesh. He was in the hospital for a week. But the physical scars were minor compared to the emotional ones inflicted by his father, an engineer, rogue and charismatic fantasist. His father's impact on his psyche would linger. He developed into a tough yet vulnerable man-child with an exceedingly high tolerance for risk, a craving for drama, an epic sense of mission, and a maniacal intensity that was callous and at times destructive. At the beginning of 2022 – after a year marked by SpaceX launching thirty-one rockets into orbit, Tesla selling a million cars, and him becoming the richest man on earth – Musk spoke ruefully about his compulsion to stir up dramas. 'I need to shift my mindset away from being in crisis mode, which it has been for about fourteen years now, or arguably most of my life,' he said. It was a wistful comment, not a New Year's resolution. Even as he said it, he was secretly buying up shares of Twitter, the world's ultimate playground. Over the years, whenever he was in a dark place, his mind went back to being bullied on the playground. Now he had the chance to own the playground. For two years, Walter Isaacson

had unprecedented access. He shadowed Musk, attended his meetings, walked his factories with him and spent hours interviewing him, his family, friends, coworkers and adversaries. The result is the revealing inside story, filled with amazing tales of triumphs and turmoil, that addresses the question: are the demons that drive Musk also what it takes to drive innovation and progress? The book includes over 100 integrated black and white images.
