Ford GT Preston Lerner, 2015-09-10 Get the whole story on the car built to beat the world--

Ford's GT. Henry Ford II, the Deuce, wanted a race car capable of winning top-flight sports car events in Europe. Specifically, he wanted to win Le Mans. Ford learned that Enzo Ferrari would consider selling his company and negotiations quickly ensued. But after Ford spent considerable time and money reviewing Ferrari's operations and negotiating with Enzo, Ferrari abruptly backed out of the talks. The Deuce took Ferrari's actions as a personal insult. Word was sent down from on high: beat Ferrari. Ford settled on UK-based Eric Broadley's Lola GT, a cutting-edge car that featured a mid-engine chassis and small-block Ford V-8 power. The Lola GT would morph into the Ford GT. Carroll Shelby helped shape it into the Mark II GT40. The result was one of the most legendary wins in racing history: Ford's 1-2-3 sweep of Le Mans in 1966. Ford GT celebrates the 50th anniversary of Ford's iconic victory, providing the detailed back story leading to that historic win, as well as the follow-up win in 1967. The GT40's last two competitive seasons in 1968 and 1969 are also covered, for a complete view of this remarkable era in racing. Author Preston Lerner details the ups and downs of Ford's GT program, accompanied by Shelby American photographer Dave Friedman's historic images. Come re-live one of the most exciting stories in all of racing history!

The Ford GT, 2004 In the 1960's very little science and engineering had been applied to the art of motor racing. As a result, there was no general agreement about the best technical approach to generating speed on a road racing track. Each car maker viewed the problem through the lenses of their own history and capabilities. The cars on the starting grid demonstrated how varied these histories were. When Ford first assaulted Le Mans in 1964, the company followed a similarly casual approach by initially purchasing a race car design from the English firm Lola. This car's numerous shortcomings soon led Ford to apply its considerable engineering and developmental resources to the project, and the result was the one-two-three finish in 1966. First place finishes followed in 1967, 1968 and 1969. It is the fabulous victories by Ford in the 1960's that inspired the new 2005 Ford GT. Based on a concept car the new production car embodies the characteristic proportions and styling elements of the original GT. Under its skin, however, it has little in common with the original other than its mid-engine layout. The 2005 Ford GT must function as a street car, with a climate control system, moderate interior noise levels, a reasonable ride, and the ability to operate in extremes of hot and cold. The seven original SAE papers from the 1960's contained in this book provide a wonderful insight into the development of the original Ford GT, during what many consider to be the technically most interesting period of sports car racing. The 11 SAE papers about the new GT included in this volume explain how Ford engineers managed to meet numerous modern-day requirements while staying true to the spirit of the original.

How to Build Max-Performance Mitsubishi 4G63t Engines Robert Bowen,2008-12 Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. *How to Build Max-Performance Mitsubishi 4G63t Engines* covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.
