Rockin' Garages Tom Cotter,Ken Gross,2012-11-19 Ken Gross is one of the premiere auto writers in the United States. This is a terrific book... a great Father's Day gift and a great read. - Jay Leno
Cars and rock 'n roll have always gone hand in hand. Whether it's a garage band piling into some decrepit rig to get to the next gig or a killer guitar riff blasting from a Mustang, rock 'n roll keeps us moving when we're behind the wheel. It's no surprise, then, that some of the music world's big names are also serious car guys. Jimmie Vaughn, Billy Joel, Brian Johnson (AC/DC), J Geils, Brad Whitford (Aerosmith), and others each spend as much time behind the wheel as they can. Hot rods, customs, muscle cars, motorcycles, race cars, and sports cars—the variety of vehicles is as eclectic as rock 'n roll itself. Rockin' Garages showcases top performers, their cars, and their garages. Authors Tom

Cotter and Ken Gross profile each musician, revealing the story behind their moto-lust and what drives their car collecting. Each profile is complemented by Michael Alan Ross' top-notch photography. Rockin' Garages puts you behind the wheel with some of your favorite musicians.

Hot Rod Empire Matt Stone,2018-09-25 Hot Rod Empire details Robert E. Petersen's creation of Hot Rod Magazine in the 1940s and the Petersen Publishing empire that grew to the mainstream juggernaut we know today. The end of World War II marked the release of pent-up war-years energy and the desire to live. For many this meant indulging in long-denied purchases, like a new car. For another group, including young vets, it meant a return to car building and racing. Money, exciting new cars, and speed parts all flowed freely in post-war America. Robert Petersen, a young SoCal-based photographer and Army Air Corps vet, noted the rapidly growing hot rod scene in and around Los Angeles. His first move was to organize the Los Angeles Hot Rod Exhibition in 1948. His second, and brilliant, move was to launch at the same event the first edition of Hot Rod magazine. From this launch

pad, Petersen Publishing Company would grow to become the most influential enthusiast publisher in America. Petersen's magazines were rallying points for all aspects of the car, truck, and motorcycle hobbies, well as nurturing and promoting all aspects from car building to racing to show events. Hot Rod, Motor Trend, Car Craft, Motorcyclist, Off-Road and Four Wheel Drive and some 75 other enthusiast titles dominated magazine racks and provided substantial influence over transportation and numerous other hobbies. Hot Rod Empire celebrates the birth and explosive growth of the transportation hobby under Petersen's watch.

Passion for Cars Michael Köckritz, 2015 - The automobile in its contemporary context - Avant-garde photography meets modern storytelling In seven years and 30 issues ramp has lived up to its name with its stylish take on cars, filling its pages with fresh, pioneering imagery. ramp sees a car as much more than a means of transportation or a technical miracle: to ramp, cars equal culture. A car is a part of our lives that can become an extension of our identities, a place where we touch, get behind the wheel, drive, pursue our passions, and experience the world. As intensely and subjectively as

possible, ramp is on the road around the world, to people, ideas, places, things, and events. With its immediate, authentic, and creative images, and with its modern and surprising visual design, ramp has become the most-honored car magazine in the world in its seven-year existence. It has set the creative bar for both magazines and advertising. Coinciding with the 30th issue, the team headed by editor-in-chief and publisher Michael Köckritz, has brought the best pictures and stories out of the archives. In accordance with ramp's philosophy, they will be placed in a fresh new context, also providing an opportunity to show off many gorgeous pictures that, for one reason or another, did not make it into the magazine. The result: a wild jam session of automotive storytelling. Text in English, German, and French.

Automobile Manufacturers Worldwide Registry ,2015-11-17 This one-of-a-kind reference work provides essential data on some 10,700 manufacturers of automobiles, beginning with the earliest vehicle that might be so termed (Frenchman Nicolas Cugnot's steam carriage, in 1770) and covering all nations in which automobiles have been built--67 in all. Not an encyclopedia or collection of

histories, this is instead a very complete registry providing essential facts about the manufacturers: complete name, location, years active, type(s) of vehicles built, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger-carrying vehicles on at least two but no more than eight wheels, of any design, either mass produced or built as one-off specials, experimental cars, prototypes, or kit cars, is included. Builders of internal combustion, steam and electric powered vehicles are all covered; companies that built only trucks, buses, racing cars, or motorcycles are not included. From A.A.A. to Zzipper and Argentina to Yugoslavia, this is an astonishingly comprehensive resource.

Million Cars for Billion People Gautam Sen, 2014-10-11 Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was

expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

The Road to Socialism Lyubomir Pozharliev, 2023-07-10 The book is the first comprehensive empirical study of transport infrastructure in two socialist countries in the years 1945–1989. In the case

study of Yugoslavia, the construction of roads was interrelated with building socialist and trans-ethnic identities, uniting all federal republics. In practice, the “Brotherhood and Unity Highway” was an artery linking the capitals of the most industrialized republics, neglecting Kosovo, Bosnia and Herzegovina, Montenegro and parts of Macedonia. In socialist Bulgaria existed a clear ideological link between transport and nation building. Bulgarian roads’ disintegrative function was best seen in the example of the “Highway Ring” which, constructed as an inner circle, isolated the border regions and areas inhabited by Bulgarian Muslims and Turks.

The Cambridge Companion to Modern French Culture Nicholas Hewitt,2003-09-11 France entered

the twentieth century as a powerful European and colonial nation. In the course of the century, her role changed dramatically: in the first fifty years two World Wars and economic decline removed its status as a world power, whilst the immediate post-war era was marked by wars of independence in its colonies. Yet at the same time, in the second half of the century, France entered a period of unprecedented growth and social transformation. Throughout the century and into the new millennium France retained its former international reputation as a centre for cultural excellence and innovation and its culture, together with that of the Francophone world, reflected the increased richness and diversity of the period. This Companion explores this vibrant culture, and includes chapters on history, language, literature, thought, theatre, architecture, visual culture, film and music, and discuss the contributions of popular culture, Francophone culture, minorities and women.

The Racers: How an Outcast Driver, an American Heiress, and a Legendary Car Challenged Hitler's Best (Scholastic Focus) Neal Bascomb, 2020-10-06 The heart-pounding story of an unlikely band of ragtags who took on Hitler's Grand Prix driver. In the years before World War II, Adolf Hitler

wanted to prove the greatness of the Third Reich in everything from track and field to motorsports. The Nazis poured money into the development of new race cars, and Mercedes-Benz came out with a stable of supercharged automobiles called Silver Arrows. Their drivers dominated the sensational world of European Grand Prix racing and saluted Hitler on their many returns home with victory. As the Third Reich stripped Jews of their rights and began their march toward war, one driver, René Dreyfus, a 32-year-old Frenchman of Jewish heritage who had enjoyed some early successes on the racing circuit, was barred from driving on any German or Italian race teams, which fielded the best in class, due to the rise of Hitler and Benito Mussolini. So it was that in 1937, Lucy Schell, an American heiress and top Monte Carlo Rally driver, needed a racer for a new team she was creating to take on Germany's Silver Arrows. Sensing untapped potential in Dreyfus, she funded the development of a nimble tiger of a new car built by a little-known French manufacturer called Delahaye. As the nations of Europe marched ever closer to war, Schell and Dreyfus faced down Hitler's top drivers, and the world held its breath in anticipation, waiting to see who would triumph.
