LARRY LYLES

📖 **PROJECT CHARGER** LARRY LYLES,2012-06-12 Join the restoration craze with the first automotive book from BowTie Press. This is a comprehensive, nuts and bolts approach to automotive restoration that will demonstrate the best way to bring a car back to its original brilliance. Restoration expert Larry Lyles makes the process come alive with over 200 color images and step-by-step details. While the vehicle being restored is a 1970 Dodge Charger, the techniques and ideas presented here can be employed to restore any vehicle. Originally conceived and written as a twenty-four article series for Auto Restorer magazine (the premier publication for die-hard restoration enthusiasts), this compilation delves into a complete, ground up restoration of a classic muscle car. It offers as much real-world information on how to accomplish such a restoration.

📖 **PROJECT STREET ROD** LARRY LYLES,2012-10-02 Project Street Rod is a complete guide to restoring a vintage car, written by auto-restoration guru Larry Lyles, a regular contributor to Auto Restorer magazine. In this detailed 21-chapter volume, Lyles walks the car owner through every step of the modification, from the disassembly of the car and to the finish touches, all with detailed instructions. Lyles transforms a beat-up 1946 Ford into a car the “looks nice, is very dependable, and is decked out with many of the [necessary] modern-day trappings.” The title of each chapter is straightforward and tells the restorer exactly which step Lyles is explaining. The contents includes: beginning the disassembly, exterior and interior, and taking proper measurements of each component; installing the front suspension; installing the engine; shocks, spring and metal lines; floor pan installation, “suicide” doors, chopping the top, completing the top chop, seats, air-conditioning, and brake pedal; first project mock-up; working with body filler; color selection; new parts and fresh primer; ordering critical parts; the final clear coats; buildup; interior trim; headliner and center console; and finishing touches. Each step in every chapter is photographed as the author progresses along, with captions to spell out exactly what has to happen. The book offers helpful advice about choice of tools and tips to make even beginners feel confident about tackling the many steps involved. With nearly forty years experience in repairing, rebuilding, and restoring classic cars (and lots of unclassic ones like this 1946 Ford!), Lyles emphasizes the reader’s need to organize his or her project by determining the course of the project, researching suppliers, making lists of parts and their conditions, creating spreadsheets of estimated and actual costs, and photographing each component as a reference for later in case the restoration goes off track. Each chapter ends with a “notes” page for the reader to record his or her progress, making this manual a practical workbook as well. When the reader gets to the final pages of the book and reads the sections “Starting Up” and “The Walk Around,” there will be a true sense of accomplishment. An appendix of part suppliers and an index complete the book.

📖 **PROJECT MUSTANG** LARRY LYLES,2012-06-12 Project Mustang is a complete guide to restoring America’s favorite muscle car, written by auto-restoration guru Larry Lyles, a regular contributor to Auto Restorer magazine. In this detailed 23-chapter volume, Lyles walks the car owner from the in-depth inspection of the vehicle and the beginning of the teardown to re-covering the seats and replacing the frame rail;and every step in between. The car restored for the project in the book is a 1968 California Special Mustang. The chapter titles themselves speak for what a straightforward DIY manual Lyles has written, as he details the step-by-step procedure of bringing a very cool rod back to life. Beginning the teardown, exterior and interior; repairing the sheet metal, door, and deck up; removing the major parts (driveshaft, engine, transmission, front suspension, steering system, etc.); removing old paint and replacing rust floors; no-weld rust repair; perfecting the metal; working with plastic body filler; priming and sanding; refinishing the components and underside, the door, interior, trunk, and body; wiring the car and installing the doors; applying the coatings, rebuilding the suspension, and installing the brake lines; installing the vinyl top cover, the headliner, and the glass; rebuilding and installing the engine; installing the front sheet metal, emblems, bumpers, stripes, carpet, and console; re-covering the seats; and replacing the frame rails.Each step in every chapter is photographed as the author progresses along, with captions to spell out exactly what has to happen. The book offers helpful advice about choice of tools and tips to make even beginners feel confident about tackling the many steps involved. With nearly forty years experience in repairing, rebuilding, and restoring classic cars (and lots of non-classic ones!), Lyles emphasizes the reader’s need to organize his or her project by determining the course of the project, researching suppliers, making lists of parts and their conditions, creating spreadsheets of estimated and actual costs, and photographing each component as a reference for later in case the restoration goes off track. Each chapter ends with a notes page for the reader to record his or her progress, making this manual a practical workbook as well. When the reader gets to the final pages of the book and reads the sections Start the Engine and Test Drive the Car, there will be a true sense of accomplishment. An appendix of part suppliers and an index complete the book.
