Model-Driven Development and Operation of Multi-Cloud Applications Elisabetta Di Nitto,Peter Matthews,Dana Petcu,Arnor Solberg,2016-12-22 This books is open access under a CC BY 4.0 license. This book summarizes work being undertaken within the collaborative MODAClouds research project, which aims to facilitate interoperability between heterogeneous Cloud platforms and remove the constraints of deployment, portability, and reversibility for end users of Cloud services. Experts involved in the project provide a clear overview of the MODAClouds approach and explain how it operates in a variety of applications. While the wide spectrum of available Clouds constitutes a vibrant technical environment, many early-stage issues pose specific challenges from a software engineering

perspective. MODAClouds will provide methods, a decision support system, and an open source IDE and run-time environment for the high-level design, early prototyping, semiautomatic code generation, and automatic deployment of applications on multiple Clouds. It will free developers from the need to commit to a fixed Cloud technology stack during software design and offer benefits in terms of cost savings, portability of applications and data between Clouds, reversibility (moving applications and data from Cloud to non-Cloud environments), risk management, quality assurance, and flexibility in the development process.

The Goda War Deborah Chester, 2015-02-10 One man and one woman are locked in battle for control of a terrifying weapon . . . in this novel from the “masterful” national bestselling author (Extrapolations). For eons, countless races have feared the godas—planet-sized doomsday machines that could destroy all time and space. But no one has ever dared unleash their awesome powers. Until now. Brock, dire-lord of the Held, is the only man alive who knows where the godas are hidden. As his empire crumbles, he vows to activate the godas—no matter what the cost. But Brock has a rival: Col. Kezi Falmah-Al of the ruthless Colonids. She too seeks the godas, to further her dreams of conquest. So begins the Goda War. Now, not even the stars are safe . . . From Sea to Shining Sea Frank M. Panek, 2014-11-07 From Sea to Shining Sea is a story of exploration and discovery in the depths of the seas of Earth and on the Jovian moon of Europa. In the height of the Cold War, a submarine operating out of Portsmouth Shipyard was diverted to investigate a potential Soviet threat in the North Atlantic. That submarine suffers a tragic accident and is lost with all hands. One hundred years later, the crew of an experimental research submersible, the R/S Balanus, was sent by the United Nations and the US Navy to investigate something unusual in some of the deepest waters of the North Atlantic. What Jack Wolfe and Wil Nelson thought was a demonstration dive of Sea Technologies and Explorations newest design was actually something quite

different. The final test dive of the R/S Balanus would take the crew to explore the darkness and a dangerous unknown. Dr. Arnie Hanson of the UN Interplanetary Space Corps suspected that what drew the R/S Balanus to investigate the abyss was in some way related to what the crew of the spaceship Endeavor had discovered on Europa miles under the ice in the Sea of Conamara Chaos. If he was correct, what these two groups of explorers found could change the world forever.
