#### Natural Gas Engines Kalyan Kumar

Srinivasan, Avinash Kumar Agarwal, Sundar Rajan Krishnan, Vincenzo Mulone, 2018-11-03 This book covers the various advanced reciprocating combustion engine technologies that utilize natural gas and alternative fuels for transportation and power generation applications. It is divided into three major sections consisting of both fundamental and applied technologies to identify (but not limited to) clean, high-efficiency opportunities with natural gas fueling that have been developed through experimental protocols, numerical and high-performance computational simulations, and zero-dimensional, multizone combustion simulations. Particular emphasis is placed on statutes to monitor fine particulate emissions from tailpipe of engines operating on natural gas and alternative fuels.

**Interactive Expertise** Yrjö Engeström, 1992 The four studies presented show how expertise, from the cultural-historical theory of activity, is constructed interactively in everyday problem situations. They also demonstrate that purely

situational analyses of discourse are insufficient as attempts to explain expertise. The four studies are presented as individual chapters: (1) Expertise as Mediated Collaborative Activity--a preliminary theoretical framework for the study of expertise as mediated collaborative activity; (2) The Tensions of Judging: Handling Cases of Driving under the Influence of Alcohol in Finland and California--a cross-cultural analysis of judicial expertise highlighting the multi-voicedness and internal tensions of expert work using tape recorded courtroom discourse; (3) Coordination, Cooperation, and Communication in Courts: Expansive Transitions in Legal Work--an analysis of expertise in a complex case of civil litigation in another California court setting using a court reporter's official transcripts of sidebar discussions as data on disturbances and innovations in the trial interactions; and (4) Twisting the Scripts: Heterogeneity and Shared Cognition in Multi-Professional Medical Teams--an analysis of expertise in multi-professional medical teams working in Finnish health centers which examines audio- and videotape recordings of their interactions using a three-pronged model of coordination, cooperation, and communication. Most of the 173 references listed are in English. (ALF).

*The Motor Industry* George Maxcy, Aubrey Silberston, 2017-07-06 Originally published in 1959, this book was one of the first to give a comprehensive view of the motor industry from an economic standpoint. Although the book concentrates on the UK motor industry, many references are made to that of the USA and other leading automobile manufacturers. Among the subjects discussed are the structure of the British motor industry, the demand for vehicles, the structure of costs, economies of large-scale production, the nature of competition and profits

and sources of funds.

The Decline of the British Economy Bernard Elbaum,William Lazonick,1986 This book attributes the long-term relative decline of the British economy to rigidities in institutions, established during a British-dominated nineteenth-century era of competitive capitalism.
