Medialogies David R. Castillo, William

Egginton, 2017-01-01 We are living in a time of inflationary media. While technological change has periodically altered and advanced the ways humans process and transmit knowledge, for the last 100 years the media with which we produce, transmit, and record ideas have multiplied in kind, speed, and power. Saturation in media is provoking a crisis in how we perceive and understand reality. Media become inflationary when the scope of their representation of the world outgrows the confines of their culture's prior grasp of reality. We call the resulting concept of reality that emerges the culture's medialogy. Medialogies offers a highly innovative approach to the contemporary construction of reality in cultural, political, and economic domains. Castillo and Egginton, both luminary scholars, combine a very accessible style with profound theoretical analysis, relying not only on works of philosophy and political theory but also on novels, Hollywood films, and mass media phenomena. The book invites us to reconsider the way reality is constructed, and how truth, sovereignty, agency, and authority are understood from the everyday, philosophical, and political points of view. A powerful analysis of actuality, with its roots in early modernity, this work is crucial to understanding reality in the information age.

The Photomontages of Hannah Höch Hannah Höch, Peter W. Boswell, Maria Martha Makela, Carolyn Lanchner, Kristin Makholm, 1996 Here, in the first comprehensive survey of her work by an American museum, authors Peter Boswell, Maria Makela, and Carolyn Lanchner survey the full scope of Höch's half-century of experimentation in photomontage - from her politically charged early works and intimate psychological portraits of the Weimar era to her later forays into surrealism and abstraction.

Marketing Identities Through Language E.

Martin, 2005-11-30 Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.

Pierre Bonnard Pierre Bonnard, Nicole R. Myers, Allison Stielau, Metropolitan Museum of Art (New York, N.Y.), 2009 The vibrant late paintings of Pierre Bonnard (1867-1947) are considered by many to be among his finest achievements. Working in a small converted bedroom of his villa in the south of France, Bonnard suffused his late canvases with radiant Mediterranean light and dazzling color. Although his subjects were close at hand—usually everyday scenes taken from his immediate surroundings,

such as the dining room table being set for breakfast, or a jug of flowers perched on the mantelpiece - Bonnard rarely painted from life. Instead, he preferred to make pencil sketches in small diaries and then rely on these, along with his memory, once in the studio. This volume, which accompanies the first exhibition to focus on the interior and related still-life imagery from the last decades of Bonnard's long career, presents more than seventy-five paintings, drawings, and works on paper, many of them rarely seen in public and in some cases, little known. Although Bonnard's legacy may be removed from the succession of trends that today we consider the foundation of modernism, his contribution to French art in the early decades of the twentieth century is far more profound than history has generally acknowledged. In their insightful essays and catalogue entries the authors bring fresh critical perspectives to the ongoing reappraisal of Bonnard's reputation and to his place within the narrative of twentieth-century art.--Jacket

Originality, Imitation, and Plagiarism Martha Vicinus, Caroline Eisner, 2009-12-18 At long last, a discussion of plagiarism that doesn't stop at 'Don't do it or else,' but does full justice to the intellectual interest of the topic! ---Gerald Graff, author of *Clueless in Academe* and 2008 President, Modern Language Association This collection is a timely intervention in national debates about what constitutes original or plagiarized writing in the digital age. Somewhat ironically, the Internet makes it both easier to copy and easier to detect copying. The essays in this volume explore the complex issues of originality, imitation, and plagiarism, particularly as they concern students, scholars, professional writers, and readers, while also addressing a range of related issues, including copyright conventions and the ownership of original work,

the appropriate dissemination of innovative ideas, and the authority and role of the writer/author. Throughout these essays, the contributors grapple with their desire to encourage and maintain free access to copyrighted material for noncommercial purposes while also respecting the reasonable desires of authors to maintain control over their own work. Both novice and experienced teachers of writing will learn from the contributors' practical suggestions about how to fashion unique assignments, teach about proper attribution, and increase students' involvement in their own writing. This is an anthology for anyone interested in how scholars and students can navigate the sea of intellectual information that characterizes the digital/information age. Eisner and Vicinus have put together an impressive cast of contributors who cut through the war on plagiarism to examine key specificities that often get blurred by the rhetoric of slogans. It will be required reading not only for those concerned with plagiarism, but for the many more who think about what it means to be an author, a student, a scientist, or anyone who negotiates and renegotiates the meaning of originality and imitation in collaborative and information-intensive settings. ---Mario Biagioli, Professor of the History of Science, Harvard University, and coeditor of *Scientific Authorship: Credit and Intellectual Property in Science* This is an important collection that addresses issues of great significance to teachers, to students, and to scholars across several disciplines. . . . These essays tackle their topics head-on in ways that are both accessible and provocative. ---Andrea Lunsford, Louise Hewlett Nixon Professor of English, Claude and Louise Rosenberg Jr. Fellow, and Director of the Program in Writing and Rhetoric at Stanford University and coauthor of *Singular Texts/Plural Authors: Perspectives on Collaborative Writing*

Archigram Simon Sadler, 2005-06-24 The first book-length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings. In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In *Archigram: Architecture without Architecture*, Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitants of the 1960s, originating attitudes and techniques that became standard for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement—High Tech—and influencing the postmodern and deconstructivist trends of the late twentieth century. Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to

provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. Archigram: Architecture without Architecture—the first full-length critical and historical account of the Archigram phenomenon—traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the disappearance of architecture.

Emerging Concepts in Urban Space Design

Geoffrey Broadbent,2003-09-06 This important work, now available in paperback, from Professor Geoffrey Broadbent, provides a clear analysis of the nature of many of today's design problems, identifying their causes in history and suggesting a basis for co-ordinated solutions. The author discusses 'picturesque' and 'formal' tendencies in modern architecture, relating them to parallels between philosophic thought and design theory through the ages. Using a wealth of international examples from around the world including America, UK, Italy, Germany and France and with over 250 photographs and illustrations, *Emerging Concepts in Space Design* offers a fascinating insight into the history and likely future directions of urban design.

The Great Fire of London Sarah

Machajewski, 2015-07-15 In September 1666, a small fire broke out at the king's bakery in London, England, in the early morning. Several fateful factors worked together to turn this small blaze into a catastrophic conflagration that changed the city forever. This riveting account of a city set ablaze is supported by primary sources such as maps, diaries, and royal proclamations. Readers will be fascinated by old-fashioned firefighting techniques and people's reactions as the fire spread and burned for days. Images of London on fire will ignite their imaginations and further enable them to understand this era and setting in European history.
