The Political Economy of Celebrity Activism Nathan Farrell, 2019-08-02 This edited collection brings together scholarly works of both a theoretical and empirical nature to critically analyse the forms and functions of the contemporary celebrity activist and to examine how these intersect with the political economic structures in which celebrity activists operate. Collectively, the volume illuminates some of the inherent tensions between the ethos of solidarity and compassion that the celebrity activist works to generate on the one hand and the processes of corporate sponsorship and discourses of individualism upon which the celebrity often depends, on the other. By offering empirical case studies that situate instances of celebrity activism within specific political contexts, the collection highlights how celebrity activism intersects with some of the underlying structures of gender politics and political discourses such as neoliberalism. In addition, the volume discusses how the tensions between, for example, individualism and solidarity can raise important questions about the authenticity of individual celebrity activists and how individual celebrity activists work, with varying degrees of success, to obfuscate such tensions and obscure the potential contradictions of their work. This book will be of great interest to students and academics within the fields of politics, international development, political communication, social movements, activism studies, and celebrity culture.

Culture, Environment and Ecopolitics Nick Heffernan, David A. Wragg, 2020-05-15 *Culture, Environment and Ecopolitics* brings together a series of new reflections on historical and current ecological and environmental predicaments. By way of critical interventions in environmental thought, and through engagements with literary, visual, architectural, philosophical, and more general cultural studies scholarship, this collection of essays by an international panel of writers breaks new interpretative ground. While techno-science has in some quarters been elevated to a master discourse of humanity’s salvation, charged with providing a magical ‘fix’ for planetary ecological dilemmas, the focus of our volume is on the importance of cultural reflection for bringing matters of local and global import to light. Moving from the abstractions of eco-critical utopianisms to the concrete identity of the land in the poetry of John Clare, from British Petroleum’s attempts to re-brand climate change to examples of eco-architecture, and much more besides, these essays exemplify ways in which eco-political thought and practice might now be theorized. The collection is framed by a substantial editors’ introduction which offers but one contextualization of the ideas and critical trajectories that follow. *Culture, Environment and Ecopolitics* will allow readers to discover original intersections and argumentative cross-references across contested terrains in a world increasingly troubled by ecological crises.

Industrial Society and the Science Fiction Blockbuster Mark T. Decker,2016-03-01 Can blockbuster films be socially relevant or are they just escapist diversions to entertain the masses and enrich the studios? Not every successful film contains thoughtful commentary, but some that are marketed as pure entertainment do seriously engage social issues. Popular science fiction films of the late 1970s and early 1980s--such as George Lucas' Star Wars trilogy, Ridley Scott's Alien and Aliens, and James Cameron's Terminator films--present a critique of our engagement with technology in a way that resonates with 1960s counterculture. As challengers of the status quo's technological underpinnings, Luke Skywalker, Ellen Ripley and Sarah Connor echo the once-popular social criticism of philosopher Herbert Marcuse and speak directly to the concerns of people living in a technologically complex society. The films of Lucas, Scott and Cameron made money but also made us think about the world we live in.

Moving Environments Alexa Weik von Mossner,2014-07-15 In Moving Environments: Affect, Emotion, Ecology, and Film, international scholars investigate how films portray human emotional relationships with the more-than-human world and how such films act upon their viewers' emotions. Emotion and affect are the basic mechanisms that connect us to our environment, shape our knowledge, and motivate our actions. Contributors explore how film represents and shapes human emotion in relation to different environments and what role time, place, and genre play in these affective processes. Individual essays resituate well-researched environmental films such as An Inconvenient Truth and March of the Penguins by paying close attention to their emotionalizing strategies, and bring to our attention the affective qualities of films that have so far received little attention from ecocritics, such as Stan Brakhage's Dog Star Man. The collection opens a new discursive space at the disciplinary intersection of film studies, affect studies, and a growing body of ecocritical scholarship. It will be of interest not only to scholars and students working in the field of ecocriticism and the environmental humanities, but for everyone with an interest in our emotional responses to film.

The Fight Against Impunity in EU Law Luisa Marin, Stefano Montaldo, 2020-11-26 The fight against impunity is an increasingly central concept in EU law-making and adjudication. What is the meaning and the scope of impunity as a legal concept in the EU legal order? How does the fight against impunity influence policy and adjudication? This timely first piece of comprehensive research aims to address these largely unexplored questions, which involve structural institutional and substantive dilemmas underpinning the most recent developments of the European integration process. In recent years, the fight against impunity has become a pressing concern for the European institutions. It has shaped several EU policies and has led to a recurring argument in the case law of the Court of Justice. The book sheds light on this elusive notion, providing a much needed conceptual appraisal. The first section examines the scope of the notion of impunity, and its role in the EU decision-making process and in the development of EU competences. Subsequent sections discuss the implications of impunity - and of the fight against it - in a variety of complementary domains, namely the allocation of criminal jurisdiction, mutual recognition instruments, the rise of new surveillance technologies and the external dimension of the Area of Freedom, Security and Justice. This book is an original and timely contribution to scholarship, which is of interest to academics, researchers and policy-makers alike.

User-Avatar Bond: Risk and Opportunities in Gaming and Beyond Vasileios Stavropoulos, Rabindra Ratan, Kwan Min Lee, 2022-06-07

Prophecy in the New Millennium Suzanne Newcombe, Sarah Harvey, 2016-04-15 Secular and spiritual prophets of doom abound in the information-rich twenty-first century - as they have for millennia. But there has yet to be worldwide floods, meteor impact, global computer failure, obvious alien contact, or direct intervention from God to end the world as we know it. Considering the frequency with which prophecy apparently fails, why do prophecies continue to be made, and what social functions do they serve? This volume gives a concise, but comprehensive, overview of the rich diversity of prophecy, its role in major world religions as well as in new religions and alternative spiritualities, its social dynamics and its impact on individuals' lives. Academic analyses are complimented with contextualized primary source testimonies of those who live and have lived within a prophetic framework. The book argues that the key to understanding the more dramatic, apocalyptic and millenarian aspects of prophecy is in appreciating prophecy's more mundane manifestations and its role in providing meaning and motivation in everyday life.

Digital Youth Kaveri Subrahmanyam, David Smahel, 2010-11-02 Youth around the world are fittingly described as digital natives because of their comfort and skill with technological hardware and content. Recent studies indicate that an overwhelming majority of children and teenagers use the Internet, cell phones, and other mobile devices. Equipped with familiarity and unprecedented access, it is no wonder that adolescents consume, create, and share copious amounts of content. But is there a cost? *Digital Youth: The Role of Media in Development* recognizes the important role of digital tools in the lives of teenagers and presents both the risks and benefits of these new interactive technologies. From social networking to instant messaging to text messaging, the authors create an informative and relevant guidebook that goes beyond description to include developmental theory and implications. Also woven throughout the book is an international sensitivity and understanding that clarifies how, despite the widespread popularity of digital communication, technology use varies between groups globally. Other specific topics addressed include: Sexuality on the Internet. Online identity and self-presentation. Morality, ethics, and civic engagement. Technology and health. Violence, cyberbullying, and victimization. Excessive Internet use and addictive behavior. This comprehensive volume is a must-have reference for researchers, clinicians, and graduate students across such disciplines as developmental/clinical child/school psychology, social psychology, media psychology, medical and allied health professions, education, and social work.

Readers' Guide to Periodical Literature, 1923

Projecting Tomorrow James Chapman, Nicholas J. Cull, 2013-01-30 Cinema and science fiction were made for each other. Science fiction has been at the cutting edge of film technology and the genre has produced some of the most ambitious, imaginative and visually spectacular films ever made. Yet science fiction cinema is about more than just state-of-the-art special effects. It has also provided a vehicle for film-makers and writers to comment on their own societies and cultures. In this new study of the genre, James Chapman and Nicholas Cull examine a series of landmark science fiction films from the 1930s to the present. They include genre classics, including 'Things to Come', 'Forbidden Planet', 'Planet of the Apes' and '2001: A Space Odyssey', alongside modern blockbusters 'Star Wars' and 'Avatar'. They consider both screen originals and adaptations of the work of major science fiction authors

such as H.G. Wells and Arthur C. Clarke. They range widely across the genre from pulp adventure and space opera to political allegory and speculative documentary- there is even a science fiction musical. Chapman and Cull explore the contexts and document the production histories of each film to show how they made their way to the screen- and why they turned out the way they did. Informed throughout by extensive original research in US and British archives, *Projecting Tomorrow* will be essential reading for all students and fans of science fiction cinema.
