Separated as girls, sisters Celie and Nettie sustain their loyalty to and hope in each other across time, distance, and silence. Fountas,Gay Su Pinnell,2006 For ten years and in two classic books, Irene Fountas and Gay Su Pinnell have described how to analyze the characteristics of texts and select just-right books to use for guided reading instruction. Now, for the first time, all of their thinking and research has been updated and brought together into *Leveled Books*, K-8 to form the ultimate guide to choosing and using books from kindergarten through middle school. The Other End of the Leash Patricia McConnell, Ph.D.,2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Speculative Everything Anthony Dunne,Fiona Raby,2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction.

They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

Robert W. Tebbs, Photographer to Architects Richard Anthony Lewis, 2011-12-05 One of the finest architectural photographers in America, Robert W. Tebbs produced the first photographic survey of Louisiana's plantations in 1926. From those images, now housed in the Louisiana State Museum, and not widely available until now, 119 plates showcasing fifty-two homes are featured here. Richard Anthony Lewis explores Tebbs's life and career, situating his work along the line of plantation imagery from nineteenth-century woodcuts and paintings to later twentieth-century photographs by John Clarence Laughlin, among others. Providing the family lineage and construction history of each home, Lewis discusses photographic techniques Tebbs used in his alternating panoramic and detail views. A precise documentarian, Tebbs also reveals a poetic sensibility in the plantation photos. His frequent emphasis on aspects of decay, neglect, incompleteness, and loss lends a wistful aura to many of the images -- an effect compounded by the fact that many of the homes no longer exist. This noticeable vacillation between objectivity and sentiment, Lewis shows, suggests unfamiliarity and even discomfort with the legacy of slavery. Poised on the brink of social and political reforms, Louisiana in the mid-1920s had made significant strides away from the slave-based agricultural economy that the plantation house often symbolized. Tebbs's Louisiana plantation photographs capture a literal and cultural past, reflecting a burgeoning national awareness of historic preservation and presenting plantations to us anew. Select plantations included: Ashland/Belle Helene, Avery Island, Belle Chasse, Belmont, Butler-Greenwood, L'Hermitage, Oak Alley, Parlange, René Beauregard House, Rosedown, Seven Oaks, Shadows-on-the-Teche, The Shades, and Waverly.

The Willpower Instinct Kelly McGonigal, 2013-12-31 Based on Stanford University psychologist Kelly McGonigal's wildly popular course The Science of Willpower, The Willpower Instinct is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, The Willpower Instinct explains exactly what willpower is, how it works, and why it matters. For example, readers will learn: • Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep. • Willpower is not an unlimited resource. Too much self-control can actually be bad for your health. • Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower • Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control. • Giving up control is sometimes the only way to gain self-control. • Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models. In the groundbreaking tradition of Getting Things Done, The Willpower Instinct combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

Pandemonium Daryl Gregory, 2008-08-26 It is a world like our own in every respect . . . save one. In the 1950s, random acts of possession begin to occur. Ordinary men, women, and children are the targets of entities that seem to spring from the depths of the collective unconscious, pop-cultural avatars some call demons. There’s the Truth, implacable avenger of falsehood. The Captain, brave and self-sacrificing soldier. The Little Angel, whose kiss brings death, whether desired or not. And a string of others, ranging from the bizarre to the benign to the horrific. As a boy, Del Pierce is possessed by the Hellion, an entity whose mischief-making can be deadly. With the help of Del’s family and a caring psychiatrist, the demon is exorcised . . . or is it? Years later, following a car accident, the Hellion is back, trapped inside Del’s head and clamoring to get out. Del’s quest for help leads him to Valis, an entity possessing the science fiction writer formerly known as Philip K. Dick; to Mother Mariette, a nun who inspires decidedly unchaste feelings; and to the Human League, a secret society devoted to the extermination of demons. All believe that Del holds the key to the plague of possession—and its solution. But for Del, the cure may be worse than the disease. “Look out, Lethem! Daryl Gregory mixes pop culture and pathos, flavoring it with Philip K. Dick. Pandemonium possesses every quality you want in a great novel, and the good news is it’s only his debut.” –Charles Coleman Finlay, Hugo and Nebula Award-nominated author of The Prodigal Troll

Blink Malcolm Gladwell, 2007-04-03 From the #1 bestselling author of The Bomber Mafia, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller The Tipping Point, Malcolm Gladwell redefined how we understand the world around us. Now, in Blink, he revolutionizes the way we understand the world within. Blink is a book about how we think without thinking, about choices that seem to be made in an instant—in the blink of an eye—that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work—in the office, in the classroom,

in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In Blink we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of blink: the election of Warren Harding; New Coke; and the shooting of Amadou Diallo by police. Blink reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of thin-slicing--filtering the very few factors that matter from an overwhelming number of variables.
