*Drawn to Yellowstone* Peter H. Hassrick,2016-07 The first national park in the world, from the moment of its inception in 1872 Yellowstone National Park has been perceived as a vast visual spectacle. By the 1890s it was known as the Nation's Art Gallery. Peter Hassrick traces the artistic history of the park from its earliest explorers to the present day in this new edition of *Drawn to Yellowstone*, a richly illustrated account of the artists who

traveled to and were inspired by Yellowstone.

**Aircraft of The Royal Australian Air Force** Air Force History Branch,2021-06-01 Aircraft of The Royal Australian Air Force tells the story of the RAAF's first one hundred years by describing the acquisition, operation, and service record of the multitude of aircraft types flown by the RAAF. The 176 aircraft types include the flimsy wood and canvas aircraft typical of World War I, through the technological advances during and after World War II, to modern fifth-generation, complex aircraft like the F-35 Lightning II. Even before its formation Sir Richard Williams, the Father of the RAAF, had decided to employ an alpha-numeric numbering system to identify and account for each aircraft in service. This system started with A1, A2, A3 etc as each type of aircraft came into service. Each individual aircraft within each series was identified as A1-1, A1-2 and so on and the aircraft serial became known colloquially as the 'A-number'. With some exceptions over the century since the A-number system started, aircraft entered RAAF service in broadly the sequence of the A-numbers, and so this book is intended to assist in charting the 100-year history of the RAAF by listing aircraft operated in A-number sequence, rather than by listing them by role (such as Fighter, Bomber, Maritime, Trainer, Transport etc) or alphabetically by name or by manufacturer. The inclusion of a comprehensive Index and the Quick

Reference Guide to aircraft by role is intended to facilitate the location of the entry for any specific type of aircraft for those who may not already know its A-number. Aircraft of The Royal Australian Air Force is a must have for all those who have served in the RAAF, those with a passion for military aviation and aircraft in general, and the broader members of the public wishing to gain an appreciation of the Royal Australian Air Force in its centenary year.

**Superficial** Andy Cohen, 2016-11-15 The star-studded and sidesplitting follow up to The Andy Cohen Diaries The megapopular host of Watch What Happens: Live and executive producer of The Real Housewives franchise is back, better than ever, and telling stories that will keep his publicist up at night. Since the publication of his last book, Andy has toured the country with his sidekick Anderson Cooper, hit the radio waves with his own Sirius station, Radio Andy, appeared on Real Time with Bill Maher despite his mother's conviction he was not intellectually prepared, hosted NBC's Primetime New Year's Eve special, guest edited Entertainment Weekly, starred in Bravo's Then & Now with Andy Cohen, offended celebrities with his ongoing case of foot-in-mouth disease, and welcomed home Teresa "Namaste" Giudice, from a brief stint in jail. Hopping from the Hamptons to the Manhattan dating world, the dog park to the red carpet, Cardinals superfan and mama's boy Andy Cohen, with Wacha in tow,

is the kind of star that fans are dying to be friends with. This book gives them that chance. If *The Andy Cohen Diaries* was deemed “the literary equivalent of a Fresca and tequila” by Jimmy Fallon, *Superficial* is a double: dishier, juicier, and friskier. In this account of his escapades—personal, professional, and behind-the-scenes—Andy tells us not only what goes down, but exactly what he thinks of it.

*The Multitasking Myth* Loukia D. Loukopoulos, R. Key Dismukes, Immanuel Barshi, 2016-03-03 Despite growing concern with the effects of concurrent task demands on human performance, and research demonstrating that these demands are associated with vulnerability to error, so far there has been only limited research into the nature and range of concurrent task demands in real-world settings. This book presents a set of NASA studies that characterize the nature of concurrent task demands confronting airline flight crews in routine operations, as opposed to emergency situations. The authors analyze these demands in light of what is known about cognitive processes, particularly those of attention and memory, with the focus upon inadvertent omissions of intended actions by skilled pilots. The studies reported within the book employed several distinct but complementary methods: ethnographic observations, analysis of incident reports submitted by pilots, and cognitive task analysis. They showed that concurrent task management comprises a set of issues distinct from (though related to) mental workload, an area that has been studied extensively by human factors researchers for more than 30 years.

This book will be of direct relevance to aviation psychologists and to those involved in aviation training and operations. It will also interest individuals in any domain that involves concurrent task demands, for example the work of emergency room medical teams. Furthermore, the countermeasures presented in the final chapter to reduce vulnerability to errors associated with concurrent task demands can readily be adapted to work in diverse domains.
