Dr Fred's Weather Watch Fred Bortz,Marshall Shepherd,2014-06-30 This perennial favorite is a how-to book for junior meteorologists. Dr. Fred Bortz and Dr. Marshall Shepherd (former NASA meteorologist and the 2013 President of the American Meteorological Society) show kids how to predict the weather in their own backyards - using simple, inexpensive, self-built meteorological instruments that add up to a fully operational weather station. Newly updated (2014) to include additional sources for online research.

Making a Weather Station Natalie Lunis,2005

Weather Watch Ellen Labrecque,2020 Weather affects us every day. How do we know what the weather will be like where we live? How can we prepare for it? Find out the science behind weather observation and prediction.

The Journal of the Royal Institution of Great Britain ,1831

Discover! Weather (eBook) Nancy Moore,Cindy Barden,1999-09-01 The activities in this book explain elementary concepts in the study of weather including uneven heating of Earth, the water cycle, relative humidity, measuring rain, air, winds, pressure, reading weather symbols, and maps. Activities include directions for constructing an operational classroom weather station. General background information, suggested activities, questions for discussion, and answers are included. Encourage students to keep completed pages in a folder or notebook for further reference and review.

The Layman's Weather Guide Sheridan D. Jones,Wally E. Kohl,2005-11-30 The weather by Pogonips will answer questions about the weather and give you realistic tips on how to make your own weather guess. Despite the fact we focus on the central Oregon coast, our weather tips and facts will serve you well wherever you are in the world. You do not need to read Pogonips from front to back like a novel in order for it to make sense. The sections are discreet and inclusive so you can open it up wherever you choose. Pogonips will provide you a pleasant and informative read. When you have a weather related question you will easily find it answered in an understandable way regardless how technical the concept may be. This book is a good educational tool at any level of experience and knowledge. We think the most valuable parts of the book are the parts that help you interpret data and set up your own weather station. Combined with these sections we recommend the information on how to estimate events like wind speed, even though you are not at your weather station. By reading this book you might get hooked like we did on fun weather indicators like weather rocks or the Vermont weather stick. Our hope is that by reading Pogonips you will join us in the fun of being a weather watcher and start your own weather records. Who knows, locals in your area may call you for your weather guess when they plan outdoor weddings or a barbecue.

How to Build 35 Great Clocks Joseph William Daniele,1984-01-01

Short-Term Load Forecasting 2019 Antonio Gabaldón,María Carmen Ruiz-Abellón,Luis Alfredo Fernández-Jiménez,2021-02-26 Short-term load forecasting (STLF) plays a key role in the formulation of economic, reliable, and secure operating strategies (planning, scheduling, maintenance, and control processes, among others) for a power system and will be significant in the future. However, there is still much to do in these research areas. The deployment of enabling technologies (e.g., smart meters) has made high-granularity data available for many customer segments and to approach many issues, for instance, to make forecasting tasks feasible at several demand aggregation levels. The first challenge is the improvement of STLF models and their performance at new aggregation levels. Moreover, the mix of renewables in the power system, and the necessity to include more flexibility through demand response initiatives have introduced greater uncertainties, which means new challenges for STLF in a more dynamic power system in the 2030–50 horizon. Many techniques have been proposed and applied for STLF, including traditional statistical models and AI techniques. Besides, distribution planning needs, as well as grid modernization, have initiated the development of hierarchical load forecasting. Analogously, the need to face new sources of uncertainty in the power system is giving more importance to probabilistic load forecasting. This Special Issue deals with both fundamental research and practical application research on STLF methodologies to face the challenges of a more distributed and customer-centered power system.

The North American Journals of Prince Maximilian of Wied Prince Alexander Philipp Maximilian of Wied,2014-04-09 Few historical chronicles are as informative and eloquent as the journal written by Prince Maximilian of Wied as a record of his journey into the North American interior in 1833, following the route Lewis and Clark had taken almost thirty years earlier. Maximilian's memorable descriptions of topography, Native peoples, and natural history were further brought to life through the now-familiar watercolors and sketches of Karl Bodmer, the young Swiss artist who accompanied him. The first of the three volumes of the North American Journals recounts the prince's journey from Europe to St. Louis—then the edge of the frontier. Volume II vividly narrates his experiences on the upper Missouri and offers an unparalleled view of the region and the peoples native to it. In these pages, we accompany Maximilian as he travels far up the Missouri River to Fort McKenzie, a trading post some 2,500 river miles from St. Louis near what is now Fort Benton, Montana. The handsome, oversize volume not only reproduces this historic document but also features every one of Maximilian's illustrations—more than 200 in all, including nearly 50 in color—from the original journal now housed at Joslyn Art Museum in Omaha, Nebraska. Maximilian recorded detailed observations of flora, fauna, geology, and climate. From his unique, scientifically trained perspective, he also undertook a serious field study of the cultures and languages of the central and northern Great Plains Indians he encountered. His journal contains important, firsthand descriptions of tribal social customs, religious rituals, material culture, and art, as well as an account of Native interactions with Euro-Americans engaged in the then-burgeoning fur trade. This book is published with the assistance of the National Historical Publications and Records Commission.
