**Good Faith in Insurance and Takaful Contracts in Malaysia** Haemala Thanasegaran,2016-01-22 This book examines good faith in non-marine insurance and takaful (Islamic insurance) contracts in Malaysia, and proposes holistic law reform of the same. The first two-thirds of the book comprise an extensive comparative legal analysis of the issues between Malaysia, Australia and the United Kingdom, with the final third dedicated to a socio-economic analysis of law reform and suggestions for law reform particularly suited to Malaysia. The book evaluates whether the duty of utmost good faith (the cornerstone of insurance and takaful contracts) is effectively regulated and, in turn, observed by insurers (and takaful operators) and insureds alike in Malaysia. The adequacy of the Insurance Act 1996 (Malaysia), the Takaful Act 1984 (Malaysia), the Financial Services Act 2013 (Malaysia) and the Islamic Financial Services Act 2013 (Malaysia) is evaluated, along with the supporting infrastructure and oversight measures introduced by the Malaysian government. In doing so, The book examines the duty of utmost good faith from both a doctrinal and a social science perspective, in order to propose suitable legal reform.

**Higher Education Finance and Islamic Endowments** Nurul Adilah Hasbullah,Asmak Ab Rahman,2023-11-09 Public debt pressures due to the global economic crisis in several countries have impacted higher education, compelling governments to curtail the funding of higher education institutions (HEIs). Various instruments have been proposed as a platform for the private sector to channel funding to HEIs. This book introduces readers to the issues surrounding the financing of HEIs, especially public universities, which are dependent on government budgets. It discusses the sources of funding for HEIs, focusing on philanthropic instruments through endowment and waqf funds. Since both forms of income are obtained via contributions from third parties, such as alumni, individuals, business corporations etc., it is essential that they are managed in such a way to ensure their sustainability and that their benefits can be accessed without interruption. It explains the theory of successful endowment and waqf at HEIs, namely appropriate investment planning, superior investment committees, highly skilled investment managers, alumni networks, diversity of income sources and effective fundraising. These elements have been studied empirically in this book through case studies of several selected Malaysian public universities. The book considers policy implications and offers recommendations of strategies that Universities can adopt, such as the appointment of fund managers. No specific guidelines currently exist for appointing fund managers to enable universities to invest in assets such as bonds, equities, and property. Therefore, the book encourages universities to grow the endowment and waqf funds through proper investment strategies executed by professional fund managers. The book contributes new knowledge to scholars, students and researchers, as well as informing university administrators how to collect, manage and invest funds from endowment and waqf.
