### **Public Engagement on Facilitating Access to Antiviral Medications and Information in an Influenza Pandemic**

Institute of Medicine, Board on Health Sciences Policy, Forum on Medical and Public Health Preparedness for Catastrophic Events, 2012-08-20 Influenza pandemics overwhelm health care systems with thousands or hundreds of thousands of sick patients, as well as those worried they may be sick. In order to ensure a successful response to the patient swell caused by a pandemic, robust planning is essential to prepare for challenges public health officials may face. This includes the need to quickly distribute and dispense antiviral medications that can reduce the severity and duration of disease to large numbers of people. In response to a request from the Centers for Disease Control, the Institute of Medicine's Forum on Medical and Public Health Preparedness for Catastrophic Events held a series of workshops that explored the public's perception of how to facilitate access to antiviral medications and treatment during an influenza pandemic. To help inform potential strategies still in the development stages at the CDC, workshops were held in Fort Benton, Montana; Chattanooga, Tennessee; and Los Angeles, California during February and March 2012 to consider the usefulness of several alternative strategies of delivering antiviral medication to the public. Participants considered how the normal systems for prescribing and dispensing antiviral medications could be adjusted to ensure that the public has quick, safe, and equitable access to both potentially life-saving

drugs and information about the pandemic and treatment options. This document summarizes the workshops.

**Special Events Medical Services** American Academy of Orthopaedic Surgeons (AAOS),,AAOS,2010-08-30 From staffing to set-up, Special Events Medical Services (SEMS) prepares EMS personnel to properly plan for and manage medical response at any type of special event in their community. This concise, highly interactive continuing education course consists of the SEMS textbook and online course. Since no two special events are alike; SEMS covers the basic principles to apply when planning for and working at any type of special event, including: • Preplanning • First aid station planning and set-up • Communications • Safety concerns • Mass-casualty considerations Chapters on specific types of events include weather and outdoor events, stadium and mega-events, equestrian events and rodeos, and extreme and combat sports events. The SEMS online course walks students through the process of creating an emergency medical response plan and implementing it during a special event. An access code for the SEMS online course is printed on the inside front cover of this textbook. Upon successful completion of the course, students will receive a Course Completion Certificate from the American Academy of Orthopaedic Surgeons. Providing standby services for special events requires specialized knowledge and skills beyond initial EMS training. With special events medical services training, new and seasoned EMS personnel alike can ensure a timely and appropriate medical response regardless of the special event size or type.

*Events in the City* Andrew Smith, 2015-11-19 Cities are staging more events than ever. Within this macro-trend, there is another less acknowledged trend: more events are being staged in public spaces. Some events have always been staged in parks, streets and squares, but in recent years events have been taken out of traditional venues and staged in prominent urban spaces. This is favoured by organisers seeking more memorable and more spectacular events, but also by authorities who want to animate urban space and make it more visible. This book explains these trends and outlines the implications for public spaces. Events play a positive role in our cities, but turning public spaces into venues is often controversial. Events can denigrate as well as animate city space; they are part of the commercialisation, privatisation and securitisation of public space noted by commentators in recent years. The book focuses on examples from London in particular, but it also covers a range of other cities from the developed world. Events at different scales are addressed and, there is dedicated coverage of sports events and cultural events. This topical and timely volume provides valuable material for higher level students, researchers and academics from events studies, urban studies and development studies.

Synthesis and Control of Discrete Event Systems Benoît Caillaud, Philippe Darondeau, Luciano Lavagno, Xiaolan Xie, 2013-04-17 This book aims at providing a view of the current trends in the development of research on Synthesis and Control of Discrete Event Systems. Papers collected in this volume are based on a selection of talks given in June and July 2001 at two independent meetings: the Workshop on Synthesis of Concurrent Systems, held in Newcastle upon Tyne as a satellite event of ICATPN/ICACSD and organized by Ph. Darondeau and L. Lavagno, and the Symposium on the Supervisory Control of Discrete Event Systems (SCODES), held in Paris as a satellite event of CAV and organized by B. Caillaud and X. Xie. Synthesis is a generic term that covers all procedures aiming to construct from specifications given as input objects matching these specifications. Theories and applications of synthesis have been studied and developed for long in connection with logics, programming, automata, discrete event systems, and hardware circuits. Logics and programming are outside the scope of this book, whose focus is on Discrete Event Systems and Supervisory Control. The stress today in this field is on a better applicability of theories and algorithms to practical systems design. Coping with decentralization or distribution and caring for an efficient realization of the synthesized systems or controllers are of the utmost importance in areas so diverse as the supervision of embedded or manufacturing systems, or the implementation of protocols in software or in hardware.
