Wider Bagan: Ancient and Living Buddhist Traditions Elizabeth Moore, 2023-02-28 *Wider Bagan: Ancient and Living Buddhist Traditions* is the first book to define the area outside the renowned Buddhist capital where vestiges of Bagan era cultural traditions can be found. From nearly six hundred attributes inventoried in *Wider Bagan*, thematic and geographical analysis of the *Wider Bagan* data reveals a related but different trajectory from that of the capital. The Sasan[□] of the court was honoured, and though its economy profited many places across *Wider Bagan*, local resilience was foremost. While the capital and *Wider Bagan* existed in relation to each other, their aims and narratives differed. Much has been written about Bagan, but little attention on the ground has been devoted to areas beyond the capital. These places have stories to tell—ones of the past and of the present—that are narrated in this book. *Wider Bagan* is the most important recent publication on Myanmar's past. Tracing Bagan's ideational and material legacies, it recovers how this kingdom's successors related to their heritages. Meticulously researched, beautifully illustrated, studded with clear maps, tables and outlines—*Wider Bagan* reveals these legacies' custodians—inhabiting territories stretching as far as Yunnan and Bengal. Multiple topics are examined also in light of local scholarship, often ignored due to linguistic limitations. The resulting evocations of times and places make *Wider Bagan* an enduring guide to people's lives—also in the larger scheme of things—like the community tracing its founding to the Buddha Gotama's grandfather. No one interested in Myanmar's complex past and fractious present can ignore the author's conclusions.—Lilian Handlin, Member of the Harvard Faculty of Arts and Sciences CAMLab. In her detailed survey of hundreds of sites in the Ayeyarwady River basin, Moore and her collaborators have revealed a long-suspected, but hitherto undocumented, rural cultural landscape with origins well before and persisting long after the political heyday of metropolitan Bagan in the eleventh through thirteenth centuries. During their investigations, the authors had numerous encounters with local scholar-archaeologists who identified frequently overlooked physical attributes that define the local cultural landscape. In mapping these attributes, the authors reconstructed a narrative of local resilience that speaks to a long local history of diversity and adaptability over an extensive region, where other scholars—working mainly from historical chronicles—had observed only a rigid hegemony emanating from the political centre at Bagan. Moore's innovative methodology breaks new ground for the study of early urban formations, not only in Myanmar but throughout mainland Southeast Asia. This research contributes to a building body of evidence that suggests a fresh paradigm to replace the long-standing concentric circle model most often used to explain state formation throughout the region. In this new paradigm, the contradiction between urban and rural settlements is dismantled as the stories of the smaller villages and towns re-enact the iterative process between places, communities of users, and social memory of *Wider Bagan*, demonstrating, in the process, an ecology of resilient settlement that has endured through generations of political, social and economic upheaval.—Richard A. Engelhardt, UNESCO Chair Professor of Cultural Heritage Management and Regional Advisor for Culture in Asia and the Pacific

Large Rivers Avijit Gupta, 2022-05-02 An updated treatment of management and geomorphology of large rivers around the world The newly revised Second Edition of *Large Rivers: Geomorphology and Management* delivers a thoroughly updated exploration of the form and function of major rivers. The book brings together a set of papers on the large rivers of the world, offering readers an insightful examination of a demanding subject. The new Second Edition of the book includes fully updated and revised chapters, as well as two entirely new chapters on the Ayeyarwady and the Arctic rivers. This fascinating volume describes the environmental requirements for creating and maintaining a major river system, case studies on over a dozen large rivers from different continents in a variety of physical environments, and the measurement and management of large rivers. Unmatched in scope, *Large Rivers* sheds light on a subject lacking in comprehensive study. Readers will benefit from the inclusion of: A thorough introduction to the geology of large river systems, hydrology and discharge, transcontinental moving and storage of sediment, and the greatest floods and largest rivers An exploration of the classification, architecture, and evolution of large-river deltas Discussions of sedimentology and stratigraphy of large river deposits, including their recognition in the ancient record and the distinction from incised valley fills An examination of the effects of tectonism, climate change, and sea-level change on the form and behavior of the modern Amazon river and its floodplain Measurement and management of large rivers The effect of climatic change on large rivers Perfect for postgraduate students and researchers in fluvial geomorphology, hydrology, sedimentary geology, and river management, *Large Rivers: Geomorphology and Management* will also earn a place in the libraries of engineers and environmental consultants in the private and public sectors working on major rivers around the world.

A review of major river basins and large lakes relevant to inland fisheries Ainsworth, R., Cowx, I.G., Funge-Smith, S.J., 2021-01-21 This review presents summary information on 45 river and great lake basins of the world, which support inland fisheries. The information presented is drawn from published information in peer-reviewed journals as well as grey literature. Each basin summary is presented in a common format, covering the description of the fishery, estimates of catch and numbers of people engaged in the fishery, important biodiversity features and threats to the fishery. An analysis of the replacement costs of inland fish of the basin is also presented. This is expressed in terms of the water, land and greenhouse gas footprint that would arise if the inland fish that are currently produced had to be replaced with other forms of food (such as aquaculture fish, livestock or field crops).

Social Transformations in India, Myanmar, and Thailand: Volume II Chosein Yamahata, 2022-03-02 This book explores the multifaceted obstacles to social change that India, Myanmar and Thailand face, and ways to overcome them. With a collection of essays that identify common challenges and salient features affecting diverse communities, this volume examines topics from subnational and local perspectives across the peripheries. The book argues that identity-based divisions have created a system of oppression and political contention that have led to conflicts of different kinds, and hence serving as the common cause of different social issues. At the same time, such issues have created space for marginalized groups around the world to call for change. The volume recognizes that social transformation comes into being through an active process of deconstructing and reconstructing shared norms and ideas. The contents in this book are thus centered around two focuses: the impacts of identities and grassroots. Both of these aspects are at the heart of each country's transformations towards democracy, peace, justice, and freedom. Under this framework, the chapters cover a diverse range of common issues, such as, minority grievances, gender inequality, ethnic identity, grassroots power in alliance-making towards community peace, recovery and resilience, digital freedom, democracy assistance and communication, and bridging multiple divides. As identity-based cleavages are daily lived experiences for individuals and communities, it requires grassroots initiatives and alliances as well as democratic communication to tackle obstacles at the root. Ultimately, the book convinces readers that social transformations must begin at the individual to communal level and local to national level.

A Land Like None You Know Patrick Forsyth, 2014-08-27 Burma (or Myanmar as it is now called) is in the news for all the wrong reasons. It has been ruled for many years by a ruthless, repressive junta, it suffers regular earthquakes and the cyclone of May 2008 left more than a hundred thousand people injured, homeless or dead. Yet this is a magical place: a country of contrasts with a rambunctious history and a culture that is both awesome and fascinating. Largely on a whim, prompted by sitting next to the neighbour from hell on a long-haul flight, the author decides to visit Mandalay, the Golden City foreseen by ancient Buddhist prophesies. Despite controversy - there are campaigns suggesting you do not travel to Burma on the grounds that doing so supports the government - he makes a trip, flying to Bangkok and on to Yangon (previously Rangoon) and makes much of the journey on the river cruiser Road to Mandalay sailing along the famous Ayeyarwady. Along the way he encounters taxis pulled by oxen; rings the largest bell in the world; learns how to wear a skirt, the difference between a stupa and a pagoda and why florescent pink tiles are used in temples. In this lively and light-hearted account of his journey he watches the best sunset in the world on the plains of Bagan, and as the sun sinks behind the towers of pagodas stretching in countless numbers to the horizon, concludes that this wonderful country is worthy of everyone's attention, and perhaps help too.

Continental Shelves of the World F.L. Chiocci ,A.R. Chivas ,2014-11-06 The world's continental shelves are the sites of vast resources of food, energy and minerals, the exploitation of which is continuously increasing. Fluctuating global sea levels throughout the Quaternary period produced multiple transgressive and regressive cycles that profoundly affected and shaped these shelves. The complex interactions among climate, sea level, tectonics, oceanography and sediment input have formed distinctive sediment packages on each shelf and provide a guide to the interpretation of older shelf sequences throughout the geological record. This Memoir compiles studies on 23 selected shelves from all the continents, focusing on their evolution and examining the patterns of sedimentation during the past approximately 125 000 years. In addition to providing basic background information for each area, the chapters consider specific aspects of continental shelf research, from seismic stratigraphy to geomorphology, from palaeoceanography to palaeo sea-level reconstruction and from palaeontology to geochemistry.

The state of food security and nutrition in Myanmar 2022-23: Findings from five rounds of the Myanmar Household Welfare Survey Myanmar Agricultural Policy Support Activity (MAPSA), 2023-10-27 This working paper explores the state of food security and nutrition in Myanmar using 5 rounds of nationally representative household panel data collected from December 2021 to June 2023. Overall, the state of food security and nutrition has deteriorated in Myanmar in 2022-23. More than 3 percent of households were in moderate to severe hunger in April-June 2023. Hunger was highest in Chin (10.1 percent), Rakhine (7.6 percent), and Kayin (5.9 percent). Households with a low food consumption score increased from 9.4 percent in December 2021-February 2022 to 17.7 percent in April-June 2023. The shares in April-June were highest in Chin (48.4 percent), Kayah (27 percent), and Kachin (22 percent). Inadequate diet diversity among adults rose from 20.6 percent to 27.1 percent over the same period. Women saw a faster decline in diet quality from December-February 2022 to April-June 2022 (9.1 percentage points increase in poor diet quality vs 3.8 percentage points for men). Decreases in diet quality among adults are driven by lower consumption of milk and dairy products as well as Vitamin A rich fruits, meat, fish, and eggs. 40 percent of all children aged 6-23 months and nearly a quarter (24.9 percent) of children aged 6-59 months had inadequate diet quality in the latest round of survey. Regression analysis reveals low income and limited assets to be important risk factors for food security and adequate diet quality. Wage workers and low wage communities are found to be particularly vulnerable. Rising food prices, conflict and physical insecurity increase the likelihood of poor diet quality. Receiving remittances is a source of resilience; remittance-receiving households are less likely to experience hunger or poor dietary diversity at the household, adult, and child level. To avert a full-blown nutrition crisis in Myanmar, effective multisectoral steps are required

to protect nutritionally vulnerable populations. Expanded implementation of nutrition- and gender-sensitive social protection programs, including maternal and child cash transfers, particularly to vulnerable groups is called for. Further, given the importance of remittances as an effective coping mechanism, supporting migration and the flow of remittances would help to improve the welfare of the Myanmar population.

Biological Resources and Migration Dietrich Werner,2013-04-17 Migration of humans and animals, plants and even microbes is a ubiquitous global phenomenon. This book covers all forms of migration - plant, microbial, animal or human - and their mutual impact in detail. The contributions in this book are the result of an innovative International Conference and OECD Workshop aimed at triggering off the interdisciplinary dialogue between natural scientists and socioeconomists.

Developing the Digital Economy in ASEAN Lurong Chen,Fukunari Kimura,2019-04-26 This book advances the international debate on the development of e-commerce with focus on emerging ASEAN economies. It provides readers insights on Asia's needs and efforts to improve the regional legal and economic conditions to support e-commerce. This book looks at the rules and regulations on e-commerce, and e-commerce for inclusiveness growth. It provides insights from several ASEAN member states and discovers the requirements for Asian countries to better grasp the new juncture of growth associated with economic digitalization, which also have deep implications on continuous regional integration and community-building.

Food Security and Development Udaya Sekhar Nagothu,2014-11-13 The global food system is characterized by large numbers of people experiencing food insecurity and hunger on the one hand, and vast amounts of food waste and overconsumption on the other. This book brings together experiences from different countries addressing the challenges associated with food security. Seen through various disciplinary lenses the different cases included are countries at various stages of food security, with diverse stories of success as well as failures in their efforts. China, Brazil and India, as well as less developed countries in Africa and Asia, such as Malawi, Ethiopia, Tanzania, Myanmar, Bangladesh and the Philippines. The authors pay special attention to the environmental and socio-economic challenges in the respective chapters and how they contribute to food insecurity. Each of the case studies identifies and analyzes which factors or drivers (environmental, economic, policy, technology, markets) have been the most powerful shapers of the food system and their future impact. The case studies identify interventions at regional, national and local level that contribute positively to food security, highlighting solutions that are effective and easy to implement for all levels of decision makers, from farmers to policy makers. Overall, the book provides insights in order to foster a greater understanding of the issues surrounding food security and support progress towards the goal of a sustainable food system for all.

APAC 2019 Nguyen Trung Viet,Dou Xiping,Tran Thanh Tung,2019-09-25 This book presents selected articles from the International Conference on Asian and Pacific Coasts (APAC 2019), an event intended to promote academic and technical exchange on coastal related studies, including coastal engineering and coastal environmental problems, among Asian and Pacific countries/regions. APAC is jointly supported by the Chinese Ocean Engineering Society (COES), the Coastal Engineering Committee of the Japan Society of Civil Engineers (JSCE), and the Korean Society of Coastal and Ocean Engineers (KSCOE). APAC is jointly supported by the Chinese Ocean Engineering Society (COES), the Coastal Engineering Committee of the Japan Society of Civil Engineers (JSCE), and the Korean Society of Coastal and Ocean Engineers (KSCOE).

Field identification guide to the living resources of Myanmar Food and Agriculture Organization of the United Nations,Ministry of Agriculture, Livestock and Irrigation,2019-12-12 This field guide covers the major resource groups likely to be encountered in the fisheries of Myanmar. This includes stomatopods, shrimps, lobsters, crabs, bivalves, gastropods, brachiopods, sea cucumbers, cephalopods, sharks, batoids and bony fishes. Each resource group is introduced by a general section on technical terms and measurements pertinent to that group and an illustrated guide to orders and families of the group. The more important species are treated in detail with accounts providing scientific nomenclature, FAO names in English and French (where available), local names used in Myanmar, diagnostic features, one or more illustrations, maximum size, and notes on fisheries and habitat. Colour plates for a large number of the species are included. The guide is fully indexed and a list of further literature is appended.

The Role of Tropics in Climate Change Neloy Khare,2023-11-28 The Role of Tropics in Climate Change: Global Case Studies uses a 20-chapter, easy-to-understand format to centralize the practical application ideas for functional metagenomics. This important resource not only includes chapters on next-generation sequencing technologies to study important biogeochemical cycles, degradation pathways and detoxification, but also gives insight into several tools that have been developed to integrate metadata and sequence data, allowing downstream comparative analyses of different datasets using several ecological indices. The book further explains newly developed techniques for sequencing DNA, generating shorter fragments than Sanger sequencing techniques to quickly read larger sequences in a shorter amount of time. Provides a wealth of information to readers on state-of-the-art applications of metagenomics Summarizes our current knowledge of the use of metagenomics and gives a novel and powerful insight into the already existing bioremediation process Gives an overall picture of metagenomics and its application, processes, and future prospects in the field of bioremediation

Remote Sensing of Water-Related Hazards Ke Zhang, Yang Hong, Amir AghaKouchak, 2022-03-18 Applications of remote sensing technology for monitoring and predicting water-related hazards Water-related hazards such as floods and droughts have serious impacts on society. Their incidence has increased in recent decades, a trend set to continue with ongoing climate change. Adaptation and mitigation measures require accurate detection, monitoring, and forecasting, much of which comes from remote sensing technologies. Remote Sensing of Water-Related Hazards takes an interdisciplinary approach, presenting recent advances in the available data, sensors, models, and indicators developed for monitoring and prediction. Volume highlights include: Progress in remote sensing of precipitation, storms, and tornados Different techniques for flood mapping, forecasting, and early warning Integrated approach for predicting flood and landslide cascading hazards Satellite monitoring of water cycle variation, water scarcity, and drought conditions Multi-indicator and multi-sensor approaches for quantifying drought impacts The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and provide resources for researchers, students, and professionals.

The Andaman Islands and Adjoining Offshore: Geology, Tectonics and Palaeoclimate Jyotiranjana S. Ray, M. Radhakrishna, 2020-02-28 This book gathers peer-reviewed research articles on recent advances concerning the geology, geophysics, tectonics, geochronology, sedimentology, igneous petrology, paleo-climate and paleo-oceanography of the Andaman and Nicobar Islands of India and the adjoining ocean basins. Accordingly, it contributes significantly to readers' understanding of the origin and evolution of the Andaman subduction zone and its various components. It also provides much-needed information on the evolution of the South Asian monsoon system since the Eocene and its link to Himalayan weathering and erosion.

A Savage Dreamland David Eimer, 2019-06-13 The first of its kind: an exploration of one of the most mysterious countries in the world, as told by one of the first outsiders to access the country in its entirety For almost fifty years Burma was ruled by a paranoid military dictatorship and isolated from the outside world. A historic 2015 election swept an Aung San Suu Kyi-led civilian government to power and was supposed to usher in a new golden era of democracy and progress, but Burma remains unstable and undeveloped, a little-understood country. Nothing is straightforward in this captivating land that is home to a combustible mix of races, religions and resources. A Savage Dreamland: Journeys in Burma reveals a country where temples take priority over infrastructure, fortune tellers thrive and golf courses are carved out of war zones. Setting out from Yangon, the old capital, David Eimer

travels throughout this enigmatic nation, from the tropical south to the Burmese Himalayas in the far north, via the Buddhist-centric heartland and the jungles and mountains where rebel armies fight for autonomy in the longest-running civil wars in recent history. The story of modern Burma is told through the voices of the people Eimer encounters along the way: former political exiles, the squatters in Yangon's shanty towns, radical monks, Rohingya refugees, princesses and warlords, and the ethnic minorities clustered along the country's frontiers. In his vivid and revelatory account of life, history, culture and politics, David Eimer chronicles the awakening of a country as it returns to the global fold and explores a fractured nation, closed to foreigners for decades. Authoritative and ground-breaking, A Savage Dreamland: Journeys in Burma is set to be a modern classic of travel writing.
