Handbook on Business Process Management 2 Jan vom Brocke, Michael Rosemann, 2014-08-28 Business Process Management (BPM) has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This second volume focuses on the managerial and organizational challenges of BPM such as strategic and cultural alignment, governance and the education of BPM stakeholders. As such, this book provides concepts and methodologies for the integration of BPM. Each chapter has been contributed by leading international experts. Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes in particular new technologies such as in-memory data and process management, social media and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.

Business Process Management John Jeston, Johan Nelis, 2010-05-14 *Business Process Management: Practical Guidelines to Successful Implementations* provides organizational leadership with an understanding of Business Process Management and its benefits to an organization. This is an easy-to-use, easy-to-read guide that provides a practical framework, complete with a set of tools and techniques, to successfully implement Business Process Management projects. In addition, it features vital organizational perspectives that not only provide an overall view of BPM and the move towards a process-centric organization, but also reveal how to embed BPM within an organization to ensure a continuous business process improvement culture.

Business Process Management Workshops Michael zur Muehlen, Jianwen Su, 2011-05-10 This book constitutes the thoroughly refereed post-workshop proceedings of nine international workshops held in Hoboken, NJ, USA, in conjunction with the 8th International Conference on Business Process Management, BPM 2010, in September 2010. The nine workshops focused on Reuse in Business Process Management (rBPM 2010), Business Process Management and Sustainability (SusBPM 2010), Business Process Design (BPD 2010), Business Process Intelligence (BPI 2010), Cross-

Enterprise Collaboration, People, and Work (CEC-PAW 2010), Process in the Large (IW-PL 2010), Business Process Management and Social Software (BPMS2 2010), Event-Driven Business Process Management (edBPM 2010), and Traceability and Compliance of Semi-Structured Processes (TC4SP 2010). In addition, three papers from the special track on Advances in Business Process Education are also included in this volume. The overall 66 revised full papers presented were carefully reviewed and selected from 143 submissions.

Rethinking the MBA Srikanth Datar, David A. Garvin, Patrick G. Cullen, 2010-04-22 Business Schools Face Test of Faith. Is It Time to Retrain B-Schools? As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of *Rethinking the MBA*, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors: · Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education · Provide case studies showing how leading MBA programs have begun reinventing themselves for the better · Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies Rich with examples and thoroughly researched, *Rethinking the MBA* reveals why and how business schools must define a better pathway for the future.

Best 143 Business Schools Nedda Gilbert, Princeton Review (Firm), 2004 Our Best 357 Colleges is the best-selling college guide on the market because it is the voice of the students. Now we let graduate students speak for themselves, too, in these brand-new guides for selecting the ideal business, law, medical, or arts and humanities graduate school. It includes detailed profiles; rankings based on student surveys, like those made popular by our Best 357 Colleges guide; as well as student quotes about classes, professors, the social scene, and more. Plus we cover the ins and outs of admissions and financial aid. Each guide also includes an index of all schools with the most pertinent facts, such as contact information. And we've topped it all off with our school-says section where participating schools can talk back by providing their own profiles. It's a whole new way to find the perfect match in a graduate school.

The New Russian Business Leaders Manfred F. R. Kets de Vries, Stanislav V. Shekshnia, Konstantin Korotov, Elizabeth Florent-Treacy, 2005-01-01 As a study of Russian business leadership, the depth of research and cogency of argument in the book is well ahead of anything else seen to date and to that end it deserves to be highly regarded. The Delta Intercultural Academy This book is obligatory reading for those planning to do business in Russia or wishing to understand how business is conducted. The New Russian Business Leaders is written by a distinguished group of international management specialists, including two Russians. Using models and case studies of leading Russian companies and entrepreneurs, the authors draw conclusions about Russia's evolving business climate, the requirements for entrepreneurial success, and the value of international business education for Russia's business leaders. Paul Gregory, Slavonic and East European Review This highly talented multinational team has produced a rich and meaningful contribution to the literature on Russian business. These authors know the very essence of Russia from their extensive academic and practitioner experience. They deliver fascinating, original in-depth case studies of the pioneering men and women business leaders of modern Russia's first capitalist decade. They also interpret the cases in the context of Russia's history and culture, and offer a comprehensive framework for how Russian business and leadership could evolve to build the country's economy. The New Russian Business Leaders will surely serve for years to come as an authoritative source for academics and practitioners seeking to understand the underlying dynamics of Russian business and its leaders. Sheila M. Puffer, Northeastern University, Boston, US In order to work effectively with Russian organizations, it is essential for potential Western partners and shareholders to fully understand their leadership style, organizational practices and business expectations. Based on extensive interviews with the pioneers of Russian business and the authors' own experiences, this perceptive new book attempts to decipher the enigma of Russia's new generation of business leaders. The authors present six in-depth case studies focusing on companies of vastly differing sizes, ranging from a newly-privatized operation, and the creation and organization of an oligarch's empire, to several entrepreneurial start-ups in different service industries. The case studies document the changes and developments that have occurred in Russia since the privatization era of the 1990s, highlighting the strengths and weaknesses of the emerging business leadership orientations. Grounded in Russian culture and history, the book takes a balanced view of the rapid development and transformation of the country's business leadership over the past ten years. The authors also offer perceptive conclusions and practical advice that will not only contribute to the success of Western businesses operating in Russia and other former communist countries in Eastern Europe but also help business people in Eastern Europe create high performance organizations. As we move towards a globalized economy, the need to recognise executive behaviour in Russia is becoming increasingly important. This book will provide a great source of information for academics and researchers of entrepreneurship, leadership studies and international business. Although the focus is on Russian entrepreneurs, the lessons in the book are equally as relevant for other cultures and leadership styles.

Winning in Business with Enterprise Project Management Paul C. Dinsmore, 1998-12-31 Winning in Business With Enterprise Project Management is a breakthrough book that shows you how to harness the power of project management for your company ... turn it into an organizational philosophy (where companies are perceived as dynamic enterprises consisting of portfolios of projects) ... and use it to plan and take care of daily business. With project management principles operating on an enterprise-wide level, your company will generate more organizational synergy, add speed to ongoing processes, boost productivity, and maximize growth - ultimately delivering faster, cheaper, and better products and services. And in the no-holds-barred business arena of today, there's no better way to ensure survival and prosperity.

Training in Information Management for Army Brigade and Battalion Staff , 1997 Training, training Support

software, and measurement instruments were developed to help Army brigade and below staff manage information and overcome information overload in a digital messaging environment. Development of the training was guided by two theoretical models: a model of team adaptations to stress and a model of adaptive decision making. The instruction focused on selected skills concerning critical thinking and team coordination. The results of a pilot study suggest that training may have beneficial effects on the targeted skills. Measures of decision accuracy, decision making processes, information filtering, and information production were developed. Methods of automating the training and measures, and approaches to feedback and adaptation of instruction, practice, and testing are described. Concepts for a system architecture are presented.--DTIC.

HR Business Partners Ian Hunter,Jane Saunders,Simon Constance,2016-04-29 This book highlights the changes and challenges to the role of the HR Business Partner, overviewing the emerging service delivery models for the HR function (in particular the development of shared services and outsourcing options) and what this means for the HR Business Partner (HRBP) in the modern enterprise. The purpose of this book is to provide a conceptual framework and practical advice, based on real life case studies and recent research, into how HR Business Partners best add value to the organization. The authors have extensive experience of working in the area of HR restructuring (having been HR Directors in blue chip organizations and senior advisers in leading consultancies) and have consistently come up against confusion and contradiction about what is the new role of the HR Manager/Business Partner in supporting business managers in the delivery of strategic and tactical objectives. Theory and conceptual models are used to underpin this book but it has been written as a pragmatic, hands-on guide that will help its readers think through how best they might fulfil the role of the HRBP. The book contains checklists, case study examples and self-assessment tools. It is supported by supplementary material (updates, further case studies, templates and tools) which are available via the authors' website.

Teaching Business Sustainability Chris Galea,2017-11-28 In a world where corporate governance scandals have become the everyday, the role of business schools in producing the managers of today – and tomorrow – has come into sharp focus. Today's managers and the MBAs that will follow them are in need of an education that grounds business ethics and the overarching concerns of sustainable development into the curriculum. As some, but by no means all, organisations are coming to realise, bad performance in environmental protection, labour practices and human rights is no longer a soft issue but one that can hit the bottom line with a vengeance. So, what is the state of the art in teaching business sustainability worldwide, and what teaching practices and tools are achieving successful results? This book begins to answer these questions and more. There are many challenges facing educators in the field of sustainability. It is an evolving field still in its infancy as a management discipline; and there is also the need to combat the unstated but often underlying assumption that many environmental and social issues represent non-valued-added effort. Teaching Business Sustainability acknowledges this problem, while helping students explore the various ways in which the theoretical value of business sustainability can result in valuable and value-added practical outcomes. A wide mix of approaches is therefore indicated; while many of these are experimental and on the leading edge of management learning, they all share an experiential (and often a team-based) element, and attempt to bring together the theory in a way that makes it relevant to practitioners in the field. The implication is that, whenever possible, educators need to link the learning to the students' immediate and pressing real-world realities. This applies equally to undergraduates or high-level executives. However, in the absence of immediate examples of such realities (as may often be the case in undergraduate settings) educators need to introduce experientially based approaches that recreate such settings in the classroom. The book also argues the case for holistic and interdisciplinary learning. It is clear from much of the literature on sustainability that the concept does not easily lend itself to being pigeonholed and that it crosses many of the functional areas of business. Indeed, it goes beyond just business learning to encompass many fields such as ecology, engineering and biology. If students are to move beyond the narrow perspective that conventional business studies often entail, they need to be introduced to the wider vision that an interdisciplinary approach engenders. The final point that emerges from this collection is that experiential learning of business sustainability often can, and should be, fun! Be it a heated exchange in a case-study discussion, a role-play exercise or a hands-on student consulting project, much experiential learning seems to excite the imagination of the students and to release their creative juices. The 23 contributions to Teaching Business Sustainability have been divided into three thematic groups. In the first section, 'Theory, Critique and Ideas', the authors explore and critique some of the overarching ideas and thinking behind the teaching of sustainability. The next section, 'Learning from Current Practice', contains the experiences of a number of educators and the successful and leading-edge approaches that they have used. The final section then outlines tools, methods and approaches that can be used to teach business sustainability. This last section also serves as an introduction to a second volume – Teaching Business Sustainability Vol. 2 – which provides educators of sustainability with a series of case studies, role plays and experiential exercises. Teaching Business Sustainability is an invaluable resource both for educators working in a wide range of academic disciplines, looking for inspiration and guidance on how to teach business sustainability, as well as for organisations looking to reinvigorate internal management education programmes to factor in corporate responsibility and sustainability issues.
