Pregnancy, Childbirth, Postpartum, and Newborn Care ,2003 This guide provides a full range of updated, evidence-based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period, considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. They apply to all women attending antenatal care, in delivery, postpartum or post abortion care, or who come for emergency care, and to all newborns at birth and during the first week of life (or later) for routine and emergency care. This guide is a guide for clinical decision-making. It facilitates the collection; analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations, and recommending appropriate research-based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment, including time referral, if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world, thereby making pregnancy and childbirth safer.

Pregnancy, Childbirth, Postpartum and Newborn Care World Health Organization,2015 Intended to provide evidence-based recommendations to guide health care professionals in the management of women during pregnancy, childbirth and postpartum, and newborns, and the post abortion, including management of endemic diseases like malaria, HIV/AIDS, TB and anaemia. These include pre-eclampsia & eclampsia; postpartum haemorrhage; postnatal care for the mother and baby; newborn resuscitation; prevention of mother-to- child transmission of HIV; HIV and infant feeding; malaria in pregnancy, interventions to improve preterm birth outcomes, tobacco use and second-hand exposure in pregnancy, post-partum depression, post-partum family planning and post abortion care.

Five Days at Memorial Sheri Fink,2016-01-26 NEW YORK TIMES BESTSELLER • The award-winning book that inspired an Apple Original series from Apple TV+ • A landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina—and the suspenseful portrayal of the quest for truth and justice—from a Pulitzer Prize-winning physician and reporter “An amazing tale, as inexorable as a Greek tragedy and as gripping as a whodunit.”—Dallas Morning News After Hurricane Katrina struck

and power failed, amid rising floodwaters and heat, exhausted staff at Memorial Medical Center designated certain patients last for rescue. Months later, a doctor and two nurses were arrested and accused of injecting some of those patients with life-ending drugs. *Five Days at Memorial*, the culmination of six years of reporting by Pulitzer Prize winner Sheri Fink, unspools the mystery, bringing us inside a hospital fighting for its life and into the most charged questions in health care: which patients should be prioritized, and can health care professionals ever be excused for hastening death? Transforming our understanding of human nature in crisis, *Five Days at Memorial* exposes the hidden dilemmas of end-of-life care and reveals how ill-prepared we are for large-scale disasters—and how we can do better. ONE OF THE TEN BEST BOOKS OF THE YEAR: The New York Times Book Review • ONE OF THE BEST BOOKS OF THE YEAR: Chicago Tribune, Seattle Times, Entertainment Weekly, Christian Science Monitor, Kansas City Star WINNER: National Book Critics Circle Award, J. The World of Deaf Infants Kathryn P. Meadow-Orlans, Patricia Elizabeth Spencer, Lynne Sanford Koester, 2004-06-17 What is the impact of an infant's diminished hearing on the infant and its parents? How does communication develop in cases of diminished hearing? How does diminished hearing affect social and cognitive development? What types of early interventions can improve communication and development in infants with diminished hearing? *The World of Deaf Infants* presents the results of a 15-year research study that addresses these questions. Through their research, perhaps the largest, long-term comparison of deaf and hearing infants, Meadow-Orlans's team provides a comprehensive and intimate look into the world of deaf infants. For a core group of 80 families that includes all four combinations of parent-infant hearing status, data was collected longitudinally at 9, 12, 15, and 18 months, and mother-infant interactions were recorded and observed in both structured and unstructured settings. Mothers' facial, vocal, and tactile behaviors during interactions were related to infants' temperament and stress; mothers' linguistic and communication behaviors, as well as their overall responsiveness, were related to children's language; and the effects of support provided to mothers were evaluated and explored. The results were dramatic, particularly those on infant attachment behaviors and the importance of visual

attention to the overall development of deaf infants. This comprehensive work provides a foundation on which researchers, teachers, students, and parents can build to improve communication, cognitive and social development, and to enhance the world of deaf infants.
