JACKIE SILBERG

📖 **Baby Smarts** Jackie Silberg, 2010-02 Babies don't need expensive toys-just this book and you! Did you know? A baby's brain is 250% more active than that of an adult. The networking of the brain's synapses is nearly complete after the first three years of life. Engaging your baby in stimulating experiences encourages brain development and paves the way for successful learning in the future. Visual stimulation enhances babies' curiosity, attentiveness, and concentration. Your baby's best toy is you! Interact with your baby as much as possible. Filled with developmental games based on the latest brain research, Baby Smart help you build your baby's brain power, one activity at a time! Baby Smart is divided into four chapters, each representing a three-month period. Each chapter begins with a chart to help you anticipate and activities develop and reinforce the skill babies need to reach those milestones. Each activity in Baby Smart uses common materials found in the home - there's no need for expensive toys or props. Roll a ball to a baby to develop muscle coordination. Sing songs and talk to your baby to develop language abilities. Create patterns with cereal boxes or blocks to develop math skills. Every activity in Baby Smart builds the foundation for future learning!

📖 **Baby Minds** Linda Acredolo, Ph.D., Susan Goodwyn, Ph.D., 2011-09-07 More than 65 delightful games and activities to jump-start your baby's amazing brainpower Can simply singing a song or blowing a dandelion under a toddler's nose help her mind to blossom? Can your baby count, remember events, and solve problems even before he can talk? The exciting answer to both questions is yes! Breakthrough research is revealing the extraordinary inborn abilities of infants. It is also showing how experiences during the first years of life profoundly influence intelligence, creativity, language development-and even later reading and math skills. Now two psychologists and child development experts-authors of the bestselling Baby Signs-have created a delightful guide for parents based on the most up-to-date knowledge of how babies discover the world. You'll learn how to: _ Create a homemade mobile to stimulate your three-month-old's delight in solving problems _ Play a patty-cake game to help your two-year-old make logical connections _ Initiate bedtime conversations that build your child's memory and sense of personal history _ Develop baby signs to help your toddler communicate before he or she can talk _ Stimulate your child's natural number skills with puppets and counting games _ Use nursery rhymes and special read-aloud techniques to foster reading readiness _ Nurture budding creativity with humor and fantasy play _ And much more! Baby Minds is not another program for creating super babies. Instead it builds on activities that babies instinctively love to develop their unique abilities and make your daily interactions full of the joy of discovery-for both of you. NOTE: This edition does not include photographs.

📖 **Building Brains** Suzanne R. Gellens, 2012-09-21 Building Brains expands young children's learning with six hundred brain-based, developmentally appropriate activity ideas. It combines the latest information on brain development with activities that support children's learning and enrich any early childhood curriculum. Rather than step-by-step activities, Building Brains is filled with open-ended ideas that early child professionals can execute in a variety of ways, depending on children's needs and interests. Ideas are organized by age—from age zero to five—and learning domains.

📖 **Grandparenting Grandchildren** Dr Jane Williams ,Dr Tessa Grigg , 2021-08-04 With people staying healthier for longer, grandparents are increasingly involved in raising their grandchildren. Grandparenting Grandchildren is the first guide of its kind written specifically for grandparents, and aims to help you raise well-rounded, ready-to-learn, happy grandchildren, even if you only look after them for a few hours a week. By explaining the latest neuro-developmental and neuro-educational research in accessible, applicable ways, it will reaffirm what you instinctively know, while providing new tools to build your grandchild's imagination, creativity and curiosity. Combining the authors' practical experience as childhood development professionals with international research, this book helps grandparents understand the key influences on healthy development in the first 5 years: movement, music, sleep and food. Grandparenting Grandchildren gives practical advice on how to integrate these 'super brain foods' best in your grandchild's life. This has been proven to have many positive benefits, including improving the ability to think creatively, building speech and language skills, promoting social skills, and driving curiosity. Learn to build a loving, supportive relationship that helps grandchildren feel positive about their future, while constructing essential life skills that ensure they are well-rounded, happy and capable, confident learners.

📖 **Brain Games for Babies, Toddlers & Twos** Jackie Silberg, 2004 Whether it is through singing, dancing, talking or cuddling, you can encourage the pathways of your child's brain to make new connections. This book contains 140 games that will promote brain power, improve hand-eye coordination and develop thought processes, imagination and memory. The activities are split into appropriate age groups, ranging from birth-3 months and 33-36 months.

📖 **My Body Sends a Signal** Natalia Maguire, 2020-09-10 How to teach kids about emotions and feelings? Like teaching them everything else - using clear words, familiar situations, exciting pictures and a lot of hands-on activities (games, puzzles, coloring pages, etc.) One can, of course, spend time and find various resources online. Or one can get just one book. This book is an excellent educational source that has it all. The book includes a cute story that kids can relate to, beautiful illustrations that capture children's attention, calming-down activities for kids, instructions to adults on the follow-up activities, emotions cards, feelings cards, coloring pages and related short stories to teach kids empathy.

📖 **Brain Rules for Baby (Updated and Expanded)** John Medina, 2014-04-22 What's the single most important thing you can do during pregnancy? What does watching TV do to a child's brain? What's the best way to handle temper tantrums? Scientists know. In his New York Times bestseller Brain Rules, Dr. John Medina showed us how our brains really work—and why we ought to redesign our workplaces and schools. Now, in Brain Rules for Baby, he shares what the latest science says about how to raise smart and happy children from zero to five. This book is destined to revolutionize parenting. Just one of the surprises: The best way to get your children into the college of their choice? Teach them impulse control. Brain Rules for Baby bridges the gap between what scientists know and what parents practice. Through fascinating and funny stories, Medina, a developmental molecular biologist and dad, unravels how a child's brain develops – and what you can do to optimize it. You will view your children—and how to raise them—in a whole new light. You'll learn: Where nature ends and nurture begins Why men should do more household chores What you do when emotions run hot affects how your baby turns out, because babies need to feel safe above all TV is harmful for children under 2 Your child's ability to relate to others predicts her future math performance Smart and happy are inseparable. Pursuing your child's intellectual success at the expense of his happiness achieves neither Praising effort is better than praising intelligence The best predictor of academic performance is not IQ. It's self-control What you do right now—before pregnancy, during pregnancy, and through the first five years—will affect your children for the rest of their lives. Brain Rules for Baby is an indispensable guide.

📖 **Transforming the Workforce for Children Birth Through Age 8** National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the

Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

📖 **9 Things** Maggie Dent,2018-12-01 It is easy in our fast-paced, competitive, consumer-driven world to forget that children are not mini-adults, projects to be managed or problems to be solved. This common-sense guide to parenting and caring for children under eight, reminds us that a child’s development cannot be rushed, or cruelly measured against milestones. It takes an entire childhood to grow and there is no perfect when it comes to parenting. In her informed, heartfelt way, one of Australia’s favourite parenting authors Maggie Dent takes a comprehensive look at the 9 things that truly matter in raising children, and why they matter so much. She uses the metaphor of a wise aunty, Wilma — a voice of ancient wisdom that seems to be disappearing amidst the chaos. With passion, warmth and humour, Maggie draws on current research and her extensive experience as an educator, counsellor and mother of four to guide parents and caregivers in their endless decision-making, to raise children who are happy, healthy, strong, kind and resilient. Commonly known as the ‘Queen of Common Sense’, Maggie Dent has become one of Australia’s favourite parenting authors and educators, with a particular interest in the early years, adolescence and resilience. Maggie’s experience includes teaching, counselling, and working in palliative care/funeral services and suicide prevention. She is a dedicated advocate to quietly changing lives in our families and communities. She is the mother of four sons and a very grateful grandmother. Maggie is the author of 11 books including her 2018 release Mothering Our Boys which is already a bestseller.

📖 **Moo, Baa, La La La!** Sandra Boynton,2004-06 Various humorously drawn animals demonstrate the very different, and often amusing sounds they make, in a lap-sized version of a best-selling board book.

📖 **Games to Play with Babies** Jackie Silberg,2010-05-07 Over 240 fun-filled games include lots of hugs and kisses to help babies bond with their caregivers and parents as they develop necessary skills. Babies experience the interaction and nurturing they need for healthy self-esteem. This book encourages the development of happy, trusting babies who will become happy, trusting toddlers. If there’s a baby in your child care center or in your family, you won’t want to miss these wonderful games.
