Frequently Asked Questions

The Safe Baby Debra Smiley Holtzman, 2004 Protecting their children is the greatest concern for most parents and grandparents. The Safe Baby provides them comprehensive help in making their homes safer for the entire family.

Baby Safe Mark A. Brandenburg, 2012-03-01 *A guide for parents, grandparents, teachers, nannies, babysitters, and health care professionals *Age-specific recommendations for creating a baby-safe environment *Hidden hazards that infants and young children have a knack for finding Everyone who has young children knows just how easily they can get hurt. Each year, for example, approximately 9,000 infants suffer injuries related to their high chairs. Thousands more are poisoned by common household substances. In total, more than 25 million children are injured annually, and more than

3,000 children under the age of six succumb to their injuries. What makes these incidents even more tragic is that they can be prevented. Baby Safe provides valuable information that teaches you how to create a safe environment for babies and toddlers. Written by Mark Brandenburg, M.D., a practicing emergency physician and child safety consultant, Baby Safe is a practical parenting book that will help you keep babies and toddlers out of trouble. Written from a developmental perspective, this book will help you recognize the dangers to young children, and provide concrete ways of preventing specific injuries. Baby Safe is the most complete, organized, and reader-friendly baby safety book ever written for the general public. It addresses the most pressing safety issues from birth to age six, issues that change dramatically as your baby develops and grows. This invaluable guide for parents, grandparents, nannies, teachers, day care providers, and babysitters has the information to prevent millions of early childhood injuries. Dr. Mark Brandenburg, with his years of medical and research experience, shows how to keep your environment baby safe.

Emergency Mark Wilhelmsson, 2022-12-16 Every year in the United States, approximately 8,000 families lose a child. That's nearly one child per hour, and this isn't due to war, disease, or famine. Mothers and fathers are losing their children to accidental injuries-most of which can be prevented. Knowing this fact now puts the responsibility squarely back on us, the parents. This is a problem only we can fix, and that's the purpose of this book: to empower parents with knowledge and a fundamental set of life-saving skills we all should have. Author Mark Wilhelmsson lived every parent's worst nightmare when he found his toddler-son choking and unable to breathe. Panicked and with no training, Mark could only watch helplessly as his son tried to clear the blockage on his

own. Amazingly, young Marcus was able to cough it up on his own, but thousands of parents every year do not get so lucky. Now a certified CPR instructor by the American Red Cross, Mark shares exactly what every parent needs to do and learn to keep their kids safe, from developing and practicing a fire escape plan to using a portable defibrillator and, of course, rescuing a choking child. More than just an emergency first aid manual, Wilhelmsson presents detailed steps on performing CPR and AED use. Each chapter covers a specific skill and preparedness lesson, including the prevention of that mysterious silent killer, SIDS (Sudden Infant Death Syndrome). These are not fringe skills to be left to first responders and medical personnel; these are the foundational parenting skills that every child should be guarded by. This book was written primarily for expecting and new parents with children under the age of five; however, what you'll learn in this book can help protect and keep your entire family safe. You'll also learn why parents shouldn't rely on 911 or emergency services to save their children, why everything can be Googled, but not everything should be Googled and SO much more! Visit www.OurChildsKeeper.com for additional resources, including an unlimited, all-access family pass to our life-saving skills training program and online community.
