*Komé - Kribi* Philippe Lavachery, Scott MacEachern, T. Bouimon, Christophe Mbida Mindzie, 2010 This book presents the first preview of discoveries made in the longest archaeological trench ever dug in Africa. From the forests of coastal south Cameroon towards the dry savannas in southern Chad, the construction of the underground pipeline of the Chad Export Project enabled an international research team to investigate a transect of 1070 kilometers (!) length. The Kome-Kribi project demonstrates the exemplary application of rescue or preventive archaeology and of cultural heritage management with regard to a variety of involved political and commercial institutions. In areas previously almost unknown archaeologically an impressive number of 472 new sites from the Middle Stone Age to the Iron Age, many considered to be important, were located. Their description, including quantities of cultural materials, a chronological outline based on about sixty radiocarbon dates, and the integration of the new and known evidence in a synoptic consideration of the cultural development of Central Africa, provides a substantial base for further studies and, for those archaeologists less familiar with the region, also offers an introduction into the local prehistory. Finally, the authors have given us a vision on the abundance of information about Africa's past that is still preserved in the ground and scarcely touched, so far.

**Straits of Messina** William P. Mack, 1994 In World War II, an allied ship would be extremely vulnerable to attack if it sailed into the Straits of Messina, but the crew of the destroyer USS Lawrence has become accustomed to long odds.--Jacket.

**The USS Constitution's Finest Fight, 1815** Asheton Y. Humphreys, 2000 On 17 December 1814, Captain Charles Stewart slipped past the Royal Navy's

blockade of Boston and sailed his ship on a sweep through the Atlantic Ocean, capturing merchantmen as he went. His capture of HMS Cyane and HMS Levant off the Madeira Islands was a spectacular success. Humphreys was fortunate to be a crew member during the Constitution's most successful war cruise towards the end of the War of 1812. His eyewitness account is as fresh today as it was when he wrote it, soon after the great ship tied up in Boston to the cheers of its welcoming citizens. The fledgling Republic and her new navy had endured the trial of war with the Constitution bringing back honor and a new self-confidence to the embattled nation.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **Soldiers of the Sea** Robert Debs Heinl,1991 From the War of Independence through the dark days of the Cold War, the Marines have fought in all the nation's wars. Their readiness and prompt action at Harper's Ferry stopped John Brown's insurrection in its tracks. In 1917, as the First to Fight slogan demonstrated its electric effect, the 5th Marines sailed for France and joined up with the first convoy at sea, anxious to get on with the war. With courage, discipline, and typical small-unit initiative, the Marines triumphed at Belleau Wood, a victory that was to advantageously affect the quality and thinking of the Marine Corps ever after. Yet it is no accident that so much of the Marine Corps' fighting and expeditionary service has taken place between the major wars. Marines could be found detaining Abraham Lincoln's suspected assassins aboard the Montauk, conducting minor landings in Nicaragua or Korea in the late nineteenth century, or battling rebels in Haiti or Cuba in the twentieth century. Their flexibility and adaptability has earned them a solid reputation as a preeminent fighting force. Their contributions to America's military force have been many. Development of amphibious warfare during World War II was undoubtedly one of the most important tactical innovations in our history. As larger military services are reduced between wars, the Corps' traditional role as a force in readiness becomes more essential for peacetime strength. And when the Marines are called to action, their preparedness and effectiveness as a maritime fighting team is unequalled.

When the O'Leary takes a few more hits, Sorenson is forced to take command just as she faces her greatest challenge - the pursuit of the Seawolf. This is the first of a powerful new class of German U-boat, faster, more elusive and deadlier than its predecessors. The Seawolf is a monster submarine as large as a destroyer, more heavily armed and protected, and.
