A Systems Approach to Cyber Security A. Roychoudhury, Y. Liu, 2017-02-24 With our ever-increasing reliance on computer technology in every field of modern life, the need for continuously evolving and improving cyber security remains a constant imperative. This book presents the 3 keynote speeches and 10 papers delivered at the 2nd Singapore Cyber Security R&D Conference (SG-CRC 2017), held in Singapore, on 21-22 February 2017. SG-CRC 2017 focuses on the latest research into the techniques and methodologies of cyber security. The goal is to construct systems which are resistant to cyber-attack, enabling the construction of safe execution environments and improving the security of both hardware and software by means of mathematical tools and engineering approaches for the design, verification and monitoring of cyber-physical systems. Covering subjects which range from messaging in the public cloud and the use of scholarly digital libraries as a platform for malware distribution, to low-dimensional bigram analysis for mobile data fragment classification, this book will be of interest to all those whose business it is to improve cyber security.

The WhatsApp India Story Sunetra Sen Narayan, Shalini Narayanan, 2024-02-13 WhatsApp is used by over half a billion people in India today in all fields – in business, corporate and informal sectors, in government, for education and among friends, families and acquaintances. This book critically explores the social messaging app's rapid expansion in India and its growing influence and looks at whether, as a form of horizontal communication, it poses a challenge to more traditional structures of communication. The book examines WhatsApp's spread in the personal and professional lives of Indians and the myriad ways in which people in India are using the app in social and business interactions, including among people living with disabilities. Using case studies, interviews, surveys and in-depth research, it analyses key aspects of WhatsApp's massive popularity and its impact on how people communicate. It also explores its impact on the psycho-social dynamics in India, including the dissemination of fake news and politically motivated content, and the consequent need for media regulation in the country. One of the first books to analyse the pervasiveness of WhatsApp and social media apps in different areas of Indian society, this book will be of interest to scholars and students of media studies, communication studies, digital media, cultural studies, cyberculture studies, sociology and social policy and media law.

Social Media in South India Shriram Venkatraman, 2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu, Social Media in South India provides an understanding of this subject in a region experiencing rapid transformation. The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life. While certain class tensions have emerged in response to this juxtaposition, a study of social media in the region suggests that similarities have also transpired, observed most clearly in the blurring of boundaries between work and life for both the old residents and the new. Venkatraman explores the impact of social media at home, work and school, and analyses the influence of class, caste, age and gender on how, and which, social media platforms are used in different contexts. These factors, he argues, have a significant effect on social media use, suggesting that social media in South India, while seeming to induce societal change, actually remains bound by local traditions and practices.

Research into Design for a Connected World Amaresh Chakrabarti, 2019-01-08 This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

Guide on digital agricultural extension and advisory services Food and Agriculture Organization of the United Nations,2023-03-30 Digital agricultural extension and advisory services (AEAS) have a great potential to enhance accessibility, delivery, transparency, scope and impacts of information and services for smallholder farmers. However, this potential is often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident, widening digital divide between rural and urban areas, gender, and different social groups both within and among regions. Due to low-level e-literacy and digital skills, particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS. Considering the above-mentioned benefits of digital AEAS, their poor uptake by smallholder farmers, and the importance of digital empowerment of smallholder farmers in particular, this guide, targeting smallholder farmers in need of digital AEAS as its principal users, provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools, methods of access to digital AEAS, methods of access to e-commerce, and capacity building.
