Using Investor Relations to Maximize Equity Valuation Thomas Ryan, Chad Jacobs, 2005-02-18 A practical guide to proactive investor relations (IR) Investor relations (IR) has traditionally been an administrative function within corporate communications, responsible for disseminating public information and answering investor and media questions. Using Investor Relations to Maximize Equity Valuation challenges this approach, by arguing that IR has been underutilized and then illustrating how it should be elevated to lead a strategic communications effort to preserve or enhance corporate value and lower a company's cost of capital. Divided into four comprehensive parts, this book clearly describes capital markets strategies and tactical operations that these former, senior-level equity analysts and portfolio managers employ. Chad A. Jacobs (Westport, CT) and Thomas M. Ryan (Westport, CT) are the cofounders and co-CEOs of Integrated Corporate Relations.

Annual Report on the OECD Guidelines for Multinational Enterprises 2011 A New Agenda for the Future OECD, 2012-01-02 The report provides a first assessment of the outcome of the 2011 Update of the Guidelines adopted at the OECD Ministerial Meeting and a compilation of ideas for future implementation. It also reports the actions taken by the 42 adhering governments from June 2010 to June 2011.

Investor Relations: The Art and Philosophy of Effective Corporate Communications Thomas J. Lauria, 2008 The primary objective of this handbook is to create a comprehensive knowledge base on the broad and sometimes misunderstood topic of investor relations, the center of most corporate communications programs. The approach taken was to first develop a thorough understanding of Wall Street itself. Having been a Fortune 25 Investor Relations Director as well as a Sr. Equity Analyst and Equity Research Director, the perception of what is needed by the financial community is quite different than what many investor relations officers believe. Driving a hyperactive Investor Relations program is the ultimate aim of this text. The author believes that the insight provided herein will enable new IROs to best understand their new profession and enable existing practitioners to add additional elements to their marketing programs that will enhance shareholder understanding and value. The author's website can be viewed at www.tomlauria.com.

Intelligence and State Surveillance in Modern Societies Frederic Lemieux, 2018-11-16 Since the dissolution of the Soviet Union in the early 1990's, Western state surveillance and intelligence activities have drastically adapted to new domestic and global challenges. This book examines the evolution of state surveillance in modern societies and provides an international perspective on influential trends affecting these activities.

Visual Activism in the 21st Century Stephanie Hartle, Darcy White, 2022-07-28 The world is in crisis, bringing activists and protesters onto the streets and into the public eye. More than ever, activism relies on spectacle and visibility in order to be noticed in

the era of globalized capitalism and networked media. At the same time, a growing number of artists employ creative strategies to critique the establishment, act in resistance, and demand change. Visual activism of this kind is not new, but it is rapidly evolving. This anthology presents 16 case-studies of visual activism from across the globe, providing an up-to-date picture of the impact of contemporary visual and art activism, and combining a scholarly interrogation of visual activism with an examination of how it works in practice. The case studies address a wide range of issues including human rights abuses; state violence; gender and sexuality; racism; migration; and climate breakdown. They examine a range of approaches from playful carnivalesque parades to extreme practices such as 'lip-sewing', and are drawn from a wide range of international contexts – from Europe and the US, to Iran, India, Pakistan, Tunisia, and China. This diverse scope enables readers to consider examples comparatively – noticing emerging trends and key differences to reveal how geopolitical and cultural factors play an important role in shaping activist practices. This rich and timely collection provides a fresh perspective on the possibilities, limitations and politics of visual activism, as activists, artists, and curators respond to the changing world around them in this most uncertain of times.

The Integrated Reporting Movement Robert G. Eccles, Michael P. Krzus, 2014-10-20 An in-depth, enlightening look at the integrated reporting movement The Integrated Reporting Movement explores the meaning of the concept, explains the forces that provide momentum to the associated movement, and examines the motives of the actors involved. The book posits integrated reporting as a key mechanism by which companies can ensure their own long-term sustainability by contributing to a sustainable society. Although integrated reporting has seen substantial development due to the support of companies, investors, and the initiatives of a number of NGOs, widespread regulatory intervention has yet to materialize. Outside of South Africa, adoption remains voluntary, accomplished via social movement abetted, to varying degrees, by market forces. In considering integrated reporting's current state of play, the authors provide guidance to ensure wider adoption of the practice and success of the movement, starting with how companies can improve their own reporting processes. But the support of investors, regulators, and NGOs is also important. All will benefit, as will society as a whole. Readers will learn how integrated reporting has evolved over the years, where frameworks and standards are today, and the practices that help ensure effective implementation—including, but not limited to an extensive discussion of information technology's role in reporting and the importance of corporate reporting websites. The authors introduce the concepts of an annual board of directors' "Statement of Significant Audiences and Materiality" and a "Sustainable Value Matrix" tool that translates the statement into management decisions. The book argues that the appropriate combination of market and regulatory forces to speed adoption will vary by country, concluding with four specific recommendations about what must be done to accelerate high quality adoption of integrated reporting around the world.

Enforcing Shareholders' Duties Hanne S Birkmose, Konstantinos Sergakis, 2019 A heavily debated topic, the evolution of shareholders' duties risks the transformation of the very concept of shareholder primacy, crucially associated with shareholder rights. Offering a distinctive and comprehensive examination of both current and forthcoming enforcement mechanisms in the area of shareholder duties, this timely book provides an exhaustive analysis of the many issues related to these mechanisms, and considers the ongoing challenges surrounding their implementation.

Development of Integrated Reporting in the SME Sector Joanna Dyczkowska, Andrea Szirmai Madarasine, Adriana Tiron-Tudor, 2021-11-12 This book examines on an international basis how small and medium-sized enterprises (SMEs) cope with the changing

economic and social challenges, which are also reflected in financial and non-financial reporting. To this end, it presents six case studies from Germany, Hungary, Romania, Poland, Italy, and the United Kingdom, with a particular focus on integrated reporting (IR). The cases presented are drawn from collaborative research within the international network of INTEREST, an international project on integrated reporting for SME transparency. The book will be of interest to researchers and practitioners.

Mechatronic Futures Peter Hehenberger, David Bradley, 2016-06-10 Offering a comprehensive overview of the challenges, risks and options facing the future of mechatronics, this book provides insights into how these issues are currently assessed and managed. Building on the previously published book 'Mechatronics in Action,' it identifies and discusses the key issues likely to impact on future mechatronic systems. It supports mechatronics practitioners in identifying key areas in design, modeling and technology and places these in the wider context of concepts such as cyber-physical systems and the Internet of Things. For educators it considers the potential effects of developments in these areas on mechatronic course design, and ways of integrating these. Written by experts in the field, it explores topics including systems integration, design, modeling, privacy, ethics and future application domains. Highlighting novel innovation directions, it is intended for academics, engineers and students working in the field of mechatronics, particularly those developing new concepts, methods and ideas.

Defence Industrial Cooperation in the European Union Daniel Fiott, 2019-03-28 This book provides an empirical understanding of how EU-level defence industrial cooperation functions in practice. Using the Liberal Intergovernmental theoretical model, the book argues that while national economic preferences are an essential factor of government interests they only explain part of the dynamic that leads to the development of defence industrial policy at EU level. Moving beyond a simple adumbration of economic preferences, it shows how the EU's institutional framework and corpus of law are used by governments to reaffirm their position as the ultimate arbiter and promoter of national economic preferences in the defence industrial sector. To this end, the work asks why and how EU member state governments, European defence firms, and EU institutions developed EU-level defence industrial policy between 2003 and 2009. The book also analyses significant policy developments, including the establishment of a European Defence Agency and two EU Directives on equipment transfers and defence procurement. This book will be of much interest to students of EU policy, defence studies, security studies and International Relations in general.

Indefensible Paul Holden, 2017-02-15 Although there is often opposition to individual wars, most people continue to believe that the arms industry is necessary in some form: to safeguard our security, provide jobs and stimulate the economy. Not only conservatives, but many progressives and liberals, support it for these reasons. *Indefensible* puts forward a devastating challenge to this conventional wisdom, which has normalised the existence of the most savage weapons of mass destruction ever known. It is the essential handbook for those who want to debunk the arguments of the industry and its supporters: deploying case studies, statistics and irrefutable evidence to demonstrate they are fundamentally flawed, both factually and logically. Far from protecting us, the book shows how the arms trade undermines our security by fanning the flames of war, terrorism and global instability. In countering these myths, the book points to ways in which we can combat the arms trade's malignant influence, reclaim our democracies and reshape our economies.

Standards of Practice for Investor Relations, 1998

Defence Offsets and the Global Arms Trade Jonata Anicetti, 2024-02-06 This book offers the first comprehensive study of defence offsets and its economic, security, political and theoretical implications. Originating in the second half of the 19th century, defence

offsets - additional economic, industrial and technological benefits to states for buying foreign weapons - have since been a key feature of the global arms trade and defence industry. And yet, offsets are an under-researched and under-theorised phenomenon. This book fills this gap in the literature by offering the first general theory of defence offsets, as well as the first systematic analysis of the offset phenomenon. By building on the insights of scholars of defence economics and drawing from the International Relations liberal paradigm, as well as reviving and adapting Robert Putnam's two-level game framework, the book proposes a liberal-rationalist theory of defence offsets. It then proves the worth of such a theory through Qualitative Comparative Analysis (QCA) of fifty-four fighter aircraft transfers from 1992 to 2021 inclusive, and three in-depth case studies addressing offsets negotiated and agreed to as part of fighter aircraft competitions in Brazil, India, and South Korea. This book will be of interest to students of defence studies, defence economics, security studies and international relations.

The Colonialism of Human Rights Colin Samson, 2020-07-10 Do so-called universal human rights apply to indigenous, formerly enslaved and colonized peoples? This trenchant book brings human rights into conversation with the histories and afterlives of Western colonialism and slavery. Colin Samson examines the paradox that the nations that credit themselves with formulating universal human rights were colonial powers, settler colonists and sponsors of enslavement. Samson points out that many liberal theorists supported colonialism and slavery, and how this illiberalism plays out today in selective, often racist processes of recognition and enforcement of human rights. To reveal the continuities between colonial histories and contemporary events, Samson connects British, French and American colonial theories and practice to the notion of non-universal human rights. Vivid illustrations and case studies of racial exceptions to human rights are drawn from the afterlives of the enslaved and colonized, as well as recent events such as American police killings of black people, the treatment of Algerian harkis in France, the Windrush scandal in Britain and the militarized suppression of the Standing Rock Water Protectors movement. Advocating for reparative justice and indigenizing law, Samson argues that such events are not a failure of liberalism so much as an inbuilt racial dynamic of it.

Defence Industries in the 21st Century Çağlar Kurç, Richard A. Bitzinger, Stephanie G. Neuman, 2021-05-14 *Defence Industries in the 21st Century* explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors. With the global defence industry and arms market likely continue to expand and mature, the ways in which this progression could influence international politics remain obscure. In practice, as the contents of this book show, the defence industrial bases and arms export policies of emerging states display significant variance. This variance is the result of a unique balance between domestic and international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states. One of the most important conclusions of the book is that the interplay between domestic and international factors

clearly influences the variation in the emerging states' defence industrialisation policies, as well as their success or failure. While international factors create opportunities, they also limit the options available to emerging economies. Domestic factors also play an important role by shaping the policy choices of the states' decision makers. Exploring the balance between international and domestic factors and the ways in which they influence defence industrialisation in emerging states, Defence Industries in the 21st Century will be of great interest to scholars of Defence Industries, Arms Manufacturing, and Defence, Strategic and Security Studies more generally. The chapters were originally published in Defence Studies, Comparative Strategy and All Azimuth.

Understanding UK Defence Exports John Louth, 2023-04-28 This book offers a comprehensive overview of UK defence exports, as an example of the international trade in defence capabilities. The work explores the subject of defence exports from the UK through various lenses, ranging from ethics, geopolitics, and national resilience to technology transfer, industrial partnering and military cooperation. By unveiling a multi-perspective model of defence exports, the book reveals the arms trade to be possessed of many meanings and understandings. At a moment in world history when the threat of state-on-state conflict has re-emerged, wedded to rapid technological changes in the practice of warfare, it is time to reassess the dynamics of the trade in arms through the experiences of the UK – a case study of defence exports from a mature democracy with a well-established military and defence industrial sector. Building upon extensive applied research across the UK defence environment, the work positions defence exports at the centre of a cat's cradle of multiple drivers and understandings, from the geopolitical to the commercial. Traditional and refreshed ethical arguments relating to the arms trade in the 21st century are also presented and explored which, together, reshape our knowledge and consideration of the roles of defence exports and the challenges that reside in its practice. With extensive access to ministers, policymakers, industrialists, campaigners and military commanders, the author is well-placed to deliver an appreciation of these multiple perspectives and explanations of defence exports, which are presented in an accessible manner for readers. This book will be of much interest to students of defence and security studies, British politics and International Relations, as well as policymakers.
