The U.S. 37-mm Gun in World War II Charles C Roberts, 2023-11-30 A detailed history of the most widely used 37-mm gun of WWII and its applications. Developed in response to the 1899 Hague Convention, the 37-mm gun met the restrictions on the size of weapons that could fire explosive shells, yet was also light and lethal enough to be used in battle. After World War I, in which the French Model 1916 37-mm was used extensively, several countries developed or adopted the 37-mm gun. Behind in their development of an antitank gun, the United States relied on the German Pak 36 37-mm design as a basis for development. By the mid 1930s, the US Ordnance Department designed the M3 37-mm gun and M4 carriage resulting in a towed antitank gun, the first antitank gun in the US Army. This gun proved effective at the beginning of World War II, but as German armor protection increased, it could not penetrate the frontal armor of many German tanks and was relegated to lesser roles. However, the gun proved effective against the Japanese tanks and Japanese strong points in the Far East. The US military used the gun on several production and experimental armored vehicles including the M3 Lee Medium Tank, the M3 Stuart Light Tank, the M5 Stuart Light Tank, the M8 Armored Car, the T17E1 Staghound Armored Car and the M3A1E3 Scout Car. The gun was also used on several non-armored vehicles, the P39 Aeracobra, and selected naval vessels. Despite its small size, the US M3 37-mm gun served throughout the war, on many vehicles and performed exactly as designed. Fully illustrated, this is the first complete account of the development and use of the US 37-mm gun in World War II.

Girls, Performance, and Activism Dana Edell, 2021-08-30 Girls, Performance, and Activism offers artists, activists, educators, and scholars a comprehensive analysis, celebration, and critique of the ways in which teenage girls create and perform activist theater. Girls, particularly Black and Latinx teenagers, are using the tools of performance to share their stories, devise new ones, and use the stage to advocate for social change. Interweaving interviews, poetic text, drama, and theory, this book provides readers with a comprehensive understanding of how and why this field erupted and the ways in which girls are using performance to transform

themselves and enact change in their communities. As a white woman who has collaboratively created theater with hundreds of girls of color over the past 20 years, Dana Edell offers strategies for engaging with girls across difference through an intersectional lens in order to acknowledge the ways in which race, gender, age, class, ability, and sexuality influence girls' experiences and relationships with adult collaborators as they work to create meaningful, impactful, and often personal activist performances. This is the go-to handbook for teachers, theater directors, and performance makers who want to create politically engaged work with teenage girls.

Modern Management Based on Big Data II and Machine Learning and Intelligent Systems III A.J. Tallón-Ballesteros, 2021-12-03 It is data that guides the path of applications, and Big Data technologies are enabling new paths which can deal with information in a reasonable time to arrive at an approximate solution, rather than a more exact result in an unacceptably long time. This can be particularly important when dealing with an urgent issue such as that of the COVID-19 pandemic. This book presents the proceedings of two conferences: MMBD 2021 and MLIS 2021. The MMBD conference deals with two main subjects; those of Big Data and Modern Management. The MLIS conference aims to provide a platform for knowledge exchange of the most recent scientific and technological advances in the field of machine learning and intelligent systems. Both conferences were originally scheduled to be held from 8-11 November 2021, in Quanzhou, China and Xiamen, China respectively. Both conferences were ultimately held fully online on the same dates, hosted by Huaqiao University in Quanzhou and Xiamen respectively. The book is in two parts, and contains a total of 78 papers (54 from MMBD2021 and 24 from MLIS2021) selected after rigorous review from a total of some 300 submissions. The reviewers bore in mind the breadth and depth of the research topics that fall within the scope of MMBD and MLIS, and selected the 78 most promising and FAIA mainstream-relevant contributions for inclusion in this two-part volume. All the papers present original ideas or results of general significance supported by clear reasoning, compelling evidence and rigorous methods.
