Russia Mauricio Borrero, 2009 A reference guide to the world's largest country. Covering influential individuals, significant places, and important policies, it provides readers with a greater understanding of Russian history. A narrative history, chronology, and A-Z entries are included.

Introduction to Azerbaijan Gilad James, PhD, Azerbaijan is a country located at the crossroads of Eastern Europe and Western Asia. It is bordered by Russia to the north, Georgia to the northwest, Armenia to the west, Iran to the south, and the Caspian Sea to the east. Azerbaijan has a rich history and has been inhabited by various peoples and empires throughout its history. The country gained independence from the Soviet Union in 1991 and has since undergone significant political and economic reforms. Azerbaijan is known for its oil and natural gas reserves, which have helped fuel its economic growth. The capital of Azerbaijan is Baku, a city famous for its oil industry and the iconic Flame Towers. Other major cities include Ganja, Sumgait, and Mingachevir. The official language of Azerbaijan is Azerbaijani, although Russian and English are also widely spoken. The majority of the population is Muslim, but the country is known for its religious tolerance and the coexistence of various religious communities. Azerbaijan is a member of several international organizations, including the UN, the Council of Europe, and the Non-Aligned Movement.

Foreign Actors' Influence on Azerbaijan's Energy Policy Tina Flegel, 2015-10-03 The author traces several energy policy decisions taken between 2006 and 2013 in Azerbaijan to find out how international actors tried to influence policy-making. The book facilitates understanding of the political mechanisms, threats and opportunities that characterize activities in Azerbaijan's energy sector illustrating strategic pitfalls and chances. Based on a detailed country analysis and the in depth comparison of four policy cases, the book deduces the political elite's rationale, and its practical consequences for transnational relations. It is relevant for scholars studying the political economy of rentier states and regimes in the authoritarian realm, as well as for young strategists in organizations that conduct business in countries dominated by tight informal networks.

Political Handbook of the World 2020-2021 Tom Lansford,2021-03-23 The Political Handbook of the World by Tom Lansford provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2020-2021 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. The Political Handbook of the World 2020-2021 also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. And this update will aim to include coverage of current events, issues, crises, and controversies from the course of the last two years.

New World Order and Small Regions Emil Avdaliani,2022-08-29 The book provides a comprehensive understanding of the unfolding geopolitical changes in the South Caucasus in the age of increased great power competition across Eurasia. Recent research on the geopolitics of the South Caucasus focuses either on interstate relations among Armenia, Azerbaijan and Georgia or on each of regional actor's (Russia, Turkey and Iran) ties with the region's one or all three states. Little attempt has been made to see the region's shifting geopolitical importance from a global perspective: growing US-China rivalry and shifting balance of power in Eurasia; recalibration of the US' military and diplomatic vision in western Eurasia to adjust to the Chinese challenge. The book argues, from a theoretical point of view, that the increased competition in the region fits into the global pattern of unfolding great power competition, when military and economic calculations drive regional powers to increase their influence on immediate neighborhoods sidelining the collective West from the negotiating table and the emerging new security architecture.

Agree to Differ UNESCO,Tudor Rose,2015-05-11 The International Decade for the Rapprochement of Cultures (IDRC) builds on the strong momentum created by and the achievements of both the International Decade for a Culture of Peace and Non-Violence for the Children of the World (2001-2010) and the International Year for the Rapprochement of Cultures (2010). It is to be understood as a commitment for addressing the urgent need to take into account and clearly demonstrate new articulations between cultural diversity and universal values. The rapprochement of cultures implies that international security and social inclusion cannot be attained sustainably without a commitment to such principles as compassion, conviviality, hospitality, solidarity and brotherhood which are the corner stones of human coexistence inherent in all faiths and secular ideologies. The current surge of flaring conflicts, acts of violence and intolerance demands urgent actions. Peoples and nations have to join forces for the development of a universal global consciousness free from racial, ethnic and social prejudices. The United Nations have proclaimed the period 2013-2022 as International Decade for the Rapprochement of Cultures to address these

global challenges, with UNESCO as the lead agency for the United Nations system.

Cities around the World [2 volumes] Jing Luo, 2019-07-10 This two-volume set offers a comprehensive overview of major challenges faced by cities worldwide in the 21st century, and how cities in different geographic, economic, and political conditions are finding solutions to them. This two-volume encyclopedia examines ten critical issues that face cities across the globe today—environmental and societal struggles that affect the daily lives of city dwellers. Readers will gain a better understanding of our global neighbors and will be able to use this book in order to compare and contrast different approaches to critical issues in our world. Volume One examines employment and jobs; energy and sustainability; green spaces; housing and infrastructure; and migration and demographic changes. Volume Two discusses pollution; schools; traffic and transportation; violence, corruption, and organized crime; and waste management. Each issue begins with an introduction providing an overview of the issue from a global perspective. Following the introduction are ten alphabetically arranged world city profiles of cities that are struggling with the issue and cities that have found innovative solutions to deal with the crisis. The profiles explain how the problem came to be; consequences inhabitants face, such as compromised health, limited access to education, and high taxes with low wages; and failed and successful initiatives taken by city management.

European Foreign Policy in a Decarbonising World Sebastian Oberthür, Dennis Tänzler, Emily Wright, Gauri Khandekar, 2021-12-24 Contributing to the emerging literature on the geopolitical and foreign policy implications of decarbonisation and energy transition processes, this book sheds light on the future of the European Union's (EU) external relations under decarbonisation. Under the Paris Agreement on climate change, adopted in 2015, governments are committed to phasing out the emissions of carbon dioxide and other greenhouse gases over the coming decades. This book addresses the many questions around this process of decarbonisation through detailed analyses of EU external relations with six fossil-fuel exporting countries: Nigeria, Indonesia, Azerbaijan, Colombia, Qatar, and Canada. The authors systematically examine the six countries' varying dependence on fossil fuels, the broader political and security context, current relations with the EU, and the potential for developing these towards decarbonisation. In doing so, they put forward a series of findings that should hold across varying circumstances and provide a steppingstone to enrich and inspire further research on foreign policy, external relations, and international relations under decarbonisation. The book also makes an important contribution to understanding the external implications of the 2019 European Green Deal. This volume will be of great interest to students and scholars of European environmental and climate policy, climate diplomacy, energy policy, foreign policy, and climate/energy geopolitics. The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/9781003183037>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Community-Based Disaster Risk Management in Azerbaijan Rovshan Abbasov, 2017-10-31 This book illustrates the main factors of vulnerability and gives a clear picture about the possible interventions to reduce disaster risks both in schools and communities in Azerbaijan. A new methodology for

child centered vulnerability assessments both on school and community levels has been developed. This methodology can be used to assess the level of vulnerability of schools and communities. The book is a newly prepared training manual which will help practitioners conduct trainings for government and community organizations. While the book is focused on a specific region, the suggested approach is generic and can be used elsewhere.

World Architecture and Society [2 volumes] Peter Louis Bonfitto, 2021-12-06 This two-volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day, providing students with an essential understanding of architectural development and its impact on human societies. This two-volume encyclopedia provides an in-depth look at buildings and sites of global significance throughout history. The volumes are separated into four regional sections: 1) the Americas, 2) Europe, 3) Africa and the Middle East, and 4) Asia and the Pacific. Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe. Entries explore the unique importance of buildings and sites, including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat. Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions. Other entries highlight remarkable stories of architectural achievement and memory, like those of Tuskegee University, a site hand-built by former slaves, or the Hiroshima Peace Memorial Park, which was built at the site of the atomic detonation. Each entry focuses on the architectural but includes strong consideration of the social impact, importance, and significance each structure has had in the past and in the present.
