*Financial Planning and Counseling Scales* John E. Grable,Kristy L. Archuleta,R. Roudi Nazarinia Roy,2010-11-17 The personal, household, and consumer finance field is growing quite rapidly, especially as universities and policy makers see the need for additional research and clinical application in this dynamic area of study. Currently, the profession is advancing towards the stage where professional practice becomes increasingly evidenced-based. Financial Planning and Counseling Scales provides educators, researchers, students, and practitioners with a much needed review of reliable and valid personal assessment scales and instruments that can be used for both research and clinical practice. In addition to presenting actual scales and instruments with applicable psychometric details, the book also includes an overview of measurement issues and psychometric evaluation.

Motivational Interviewing and Stages of Change in Intimate Partner Violence Dr. Roland Maiuro, PhD,Dr. Christopher Murphy, PhD,2009-05-18 Motivational Interviewing has becoming increasingly widespread among counselors and therapists, but no book to date has focused exclusively on applying Motivational Interviewing to domestic and partner violence. Written by established authorities in the field, the chapters in this volume represent important applications of motivational enhancement strategies to intimate partner violence with both victims and batterers. These studies include descriptive research on victims and perpetrators of abuse, measurement issues in assessing stages of change, and real-world applications of motivational interviewing. Murphy and Maiuro illustrate both the benefits and challenges inherent in this growing area of research.

*Exercise Adherence in Persons with Type 2 Diabetes and Relationship to Diabetes Control* Sarah S. Ferguson,1998 The purpose of this pilot study was to examine exercise adherence in persons with Type 2 diabetes and how the stages of change in exercise are related to metabolic control. A sample of 28 persons with Type 2 diabetes in ages ranging from 53 to 77 (16 males and 12 females), was studied using the Transtheoretical Theory, of Change. Surveys on the Stages of Change, Processes of Change and Self-Efficacy, developed by Marcus, Rossi, Selby, Niaura, & Abrams (1992) were mailed to participants and followed-up with a telephone Stanford 7-day activity, recall. Subjects were assigned a stage of exercise adoption (Precontemplation, Contemplation, Preparation, Action, and Maintenance) based on answers to questions in the mailed survey. Metabolic control was related to stage of exercise adoption. Reported physical activity, ' also were related to stages of change in exercise. The telephone survey was used as an internal validation of the mailed self-report. Processes of change in exercise and self-efficacy also were explored in relation to stages of change. Distribution among the stages was unusual. Half of the participants fell into the highest stage of exercise adoption (maintenance). Marcus, Rossi, et al. (1992) only found 22% of their sample to be in this stage. Also two of the stages (precontemplation and action) only had one individual and therefore the stages were collapsed into three stages combining precontemplation with contemplation and action with maintenance for many statistical calculations. In addition, for some calculations, the group was divided into exercisers (Stages 1,2, & 3) and non-exercisers (Stages 4 & 5), The most frequent type of exercise reported was walking. Thirty-five percent chose walking alone and an additional 60% who chose walking or treadmill as part of their fitness program.

**Topical Themes in Argumentation Theory** Frans H. van Eemeren,Bart Garssen,2012-05-05 Topical Themes in Argumentation Theory brings together twenty exploratory studies on important subjects of research in contemporary argumentation theory. The essays are based on papers that were presented at the 7th Conference of the International Society for the Study of Argumentation (ISSA) in Amsterdam in June 2010. They give an impression of the nature and the variety of the kind of research that has recently been carried out in the study of argumentation. The volume starts with three essays that provide stimulating theoretical perspectives on argumentation. Subsequently, some views are explained on the intriguing topics of 'dissensus' and 'deep disagreement'. After a discussion of three different approaches to the treatment of types of argumentation some classical themes from antique argumentation theory are revisited. The new research area of visual argumentation is explored in the next part. The volume concludes with three reports of experimental studies concerning argumentative discourse.
