Human-Computer Interaction - INTERACT 2009 Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-18 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human-Computer Interaction. This year, INTERACT was held in Uppsala (Sweden), organized by the Swedish Interdisciplinary Interest Group for Human-Computer Interaction (STIMDI) in cooperation with the Department of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted, both to the academic and to the industrial world, the importance of the human-computer interaction (HCI) area and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of HCI, found in INTERACT 2009 a great forum for communication with people of similar interests, to encourage collaboration and to learn. INTERACT 2009 had Research and Practice as its special theme. The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community.

Handbook on Innovation and Project Management Andrew Davies, Sylvain Lenfle, Christoph H. Loch, Christophe Midler, 2023-10-06 Identifying the origins and evolution of innovation and project management, this unique Handbook explains why and how the two fields have grown and developed as separate disciplines, highlighting how and why they are now converging. It explores the theoretical and practical connections between the management of innovations and projects,

examining the close relationship between the disciplines.

Advanced Fibrous Composite Materials for Ballistic Protection Xiaogang Chen, 2016-01-21

Advanced Fibrous Composite Materials for Ballistic Protection provides the latest information on ballistic protection, a topic that remains an important issue in modern times due to ever increasing threats coming from regional conflicts, terrorism, and anti-social behavior. The basic requirements for ballistic protection equipment are first and foremost, the prevention of a projectile from perforating, the reduction of blunt trauma to the human body caused by ballistic impact, the necessity that they are thermal and provide moisture comfort, and that they are lightweight and flexible to guarantee wearer's mobility. The main aim of this book is to present some of the most recent developments in the design and engineering of woven fabrics and their use as layering materials to form composite structures for ballistic personal protection. Chapter topics include High Performance Ballistic Fibres, Ultra-High Molecular Weight Polyethylene (UHMWPE), Ballistic Damage of Hybrid Composite Materials, Analysis of Ballistic Fabrics and Layered Composite Materials, and Multi-Scale Modeling of Polymeric Composite Materials for Ballistic Protection. Contributions from leading experts in the field Cutting edge developments on the engineering of ballistic materials Comprehensive analysis of the development and uses of advanced fibrous composite materials

Bulletproof Fashion Barbara Sutton, 2023-05-23 In the context of gun proliferation and persistent gun violence in the United States, a controversial security strategy has gained public attention: bulletproof fashion. This book examines concerns about security focusing on armored clothing and accessories for civilians. Available for children and adults, such ballistic products include colorful backpacks, elegant suits, sports jackets, feminine dresses, trendy vests, and medical lab coats. These products are paradigmatic of a fashion of fear—the practice of outfitting the body with apparel aimed at maximizing personal security. This fashion encourages the emergence of both a fortress body and an armored society. Sutton also explores the wider social factors influencing the bulletproof fashion phenomenon, including the inequalities associated with neoliberalism and the militarization of civilian life. The book sheds light on the role of emotions in relation to discourses and perceptions of security, and encourages feminist and sociological studies to pay attention to the linkages between security, bodies, and dress. It is ideal for students and scholars interested in security and gun violence, culture and politics, neoliberalism and consumption, and bodies and emotions.
