Ross Coen

Fu-go Ross Coen,2014-11-01 Near the end of World War II, in an attempt to attack the United States mainland, Japan launched its fu-go campaign, deploying thousands of high-altitude hydrogen balloons armed with incendiary and high-explosive bombs designed to follow the westerly winds of the upper atmosphere and drift to the west coast of North America. After reaching the mainland, these fu-go, the Japanese hoped, would terrorize American citizens and ignite devastating forest fires across the western states, ultimately causing the United States to divert wartime resources to deal with the domestic crisis. While the fu-go offensive proved to be a complete tactical failure, six Americans lost their lives when a discovered balloon exploded. Ross Coen provides a fascinating look into the obscure history of the fu-go campaign, from the Japanese schoolgirls who manufactured the balloons by hand to the generals in the U.S. War Department who developed defense procedures. The book delves into panic, propaganda, and media censorship in wartime. Fu-go is a compelling story of a little-known episode in our national history that unfolded virtually unseen.

Peace Is a Chain Reaction: How World War II Japanese Balloon Bombs Brought People of Two Nations Together Tanya Lee Stone,2022-09-13 In May, 1945 two teenagers contemplated carrying out a plot to blow up the Tule Lake Relocation Center, in California. At its peak there were nearly nineteen thousand people of Japanese descent being held there by the American government. Stone lays the global groundwork for the event, before zeroing in on the lives of the people involved. She provides an intimate look at how their changing perspectives affected their actions. Despite the devastating pain and destruction caused by war, peace can be a chain reaction. -- Adapted from Chapter One and jacket.

The Cloud Atlas Liam Callanan,2004-02-03 Set against the magnificent backdrop of Alaska in the waning days of World War II, The Cloud Atlas is an enthralling debut novel, a story of adventure and awakening—and of a young soldier who came to Alaska on an extraordinary, top-secret mission...and found a world that would haunt him forever. Drifting through the night, whisper-quiet, they were the most sublime manifestations of a desperate enemy: Japanese balloon bombs. Made of rice paper, at once ingenious and deadly, they sailed thousands of miles across the Pacific...and once they started landing, the U.S. scrambled teams to find and defuse them, and then keep them secret from an already anxious public. Eighteen-year-old Louis Belk was one of those men. Dispatched to the Alaskan frontier, young Sergeant Belk was better trained in bomb disposal than in keeping secrets. And the mysteries surrounding his mission only increased when he met his superior officer—a brutal veteran OSS spy hunter who knew all too well what the balloons could do—and Lily, a Yup’ik Eskimo woman who claimed she could see the future. Louis’s superior ushers him into a world of dark secrets; Lily introduces Louis to an equally disorienting world of spirits—and desire. But the world that finally tests them all is Alaska, whose vastness cloaks mysteries that only become more frightening as they unravel. Chasing after the ghostly floating weapons, Louis embarks upon an adventure that will lead him deep into the tundra. There, on the edge of the endless wilderness, he will make a discovery and a choice that will change the course of his life. At once a heart-quickenning mystery and a unique love story, The Cloud Atlas is also a haunting, lyrical rendering of a little-known chapter in history. Brilliantly imagined, beautifully told, this is storytelling at its very best.

Survival City Tom Vanderbilt,2010-04-15 On the road to Survival City, Tom Vanderbilt maps the visible and invisible legacies of the cold war, exhuming the blueprints for the apocalypse we once envisioned and chronicling a time when we all lived at ground zero. In this road trip among ruined missile silos, atomic storage bunkers, and secret test sites, a lost battleground emerges amid the architecture of the 1950s, accompanied by Walter Cotten’s stunning photographs. Survival City looks deep into the national soul, unearthing the dreams and fears that drove us during the latter half of the twentieth century. “A crucial and dazzling book, masterful, and for me at least, intoxicating.”—Dave Eggers “A genuinely engaging book, perhaps because [Vanderbilt] is skillful at conveying his own sense of engagement to the reader.”—Los Angeles Times “A retracing of Dr. Strangelove as ordinary life.”—Greil Marcus, Bookforum

Before The Bomb John Chappell,2021-12-14 Almost forgotten in the haze of events that followed Nagasaki and Hiroshima, the summer of 1945 witnessed an intense public debate over how best to end the war against Japan. Weary of fighting, the American people were determined to defeat the imperial power that had so viciously attacked them in December 1941, but they were uncertain of the best means to accomplish this goal. Certain of victory—the inevitable triumph promised by Franklin Roosevelt immediately after Pearl Harbor—Americans became increasingly concerned about the human cost of defeating Japan. Particularly after the brutal Iwo Jima and Okinawa campaigns, syndicated columnists, newspaper editorialists, radio commentators, and others questioned the necessity of invasion. A lengthy naval and aerial siege would have saved lives but might have protracted the war beyond the public's patience. Advertisers filled the media with visions of postwar affluence even as the government was exhorting its citizens to remain dedicated to the war effort. There was heated discussion as well about the morality of firebombing Japanese cities and of using poison gas and other agents of chemical warfare. Chappell provides a balanced assessment of all these debates, grounding his observations in a wealth of primary sources. He also discusses the role of racism, the demand for unconditional surrender, and the government's reaction to public opinion in the decision to drop the atomic bomb. Compelling and controversial, this is the first work to examine the confusing and contradictory climate of the American home front in the months leading up to V-J Day.

Taste the Wind Robert Livingston,2021-05-19 In the last years of World War II, the Japanese Imperial Army

launched 9,000 balloons bombs in a last ditch effort to attack the American mainland. Each balloon carried one high explosive bomb and a number of incendiaries. In theory, these weapons would cause forest fires on the West Coast, and, if used to carry biological agents, create panic. Traveling in the easterly jet stream many of the balloons did reach the United States and detonate as planned. Many, however, simply disappeared into the forests of the northwest, armed and dangerous. This is the story of one missing balloon bomb that set off a terrifying forest fire near the California-Oregon border, and of three men who were inexplicably linked by time and history to the to the resulting inferno. In a moment of truth, when the fire crowned and torched the land, and survival depended on “tasting the wind,” these men did.

Thirty Minutes Over Oregon Marc Tyler Nobleman,2018-10 In this important and moving true story of reconciliation after war, beautifully illustrated in watercolor, a Japanese pilot bombs the continental U.S. during WWII--the only enemy ever to do so--and comes back 20 years later to apologize. The devastating attack on Pearl Harbor, Hawaii, drew the United States into World War II in 1941. But few are aware that several months later, the Japanese pilot Nobuo Fujita dropped bombs in the woods outside a small town in coastal Oregon. This is the story of those bombings, and what came after, when Fujita returned to Oregon twenty years later, this time to apologize. This remarkable true story, beautifully illustrated in watercolor, is an important and moving account of reconciliation after war.

War on Our Doorstep Brendan Coyle,2011-09-15 In June 1942, Japanese troops occupied the Aleutian islands of Attu and Kiska in Alaska, the first enemy occupation of US territory since the War of 1812. For the next year a bloody conflict raged that was nearly invisible to most North Americans as Canadian and American soldiers, airmen and sailors went north to hold the Japanese in check. This is the complete story of the war in the North Pacific, including details of: Japanese subs lurking off the west coast, sinking ships and shelling the coast of British Columbia; the submarine-launched airplane that bombed Oregon's forests; the surreal tale of balloon-bombs crossing the Pacific to North America. Brendan Coyle has done a magnificent job in this comprehensive review of the war on the West Coast. No other single volume has so neatly tied together the myriad stories of how the war affected people in British Columbia, California, Oregon, Washington, and Alaska. –Jim Delgado

The Hot Air Balloon Book Clive Catterall,2013 More than a century before the Wright brothers' first flight, humans were taking to the skies in hot air balloons. Today, with basic craft skills, you can build and safely launch your own balloons using inexpensive, readily available materials. Author and inventor Clive Catterall provides illustrated, step-by-step instructions for eight different homemade models, as well as the science and history behind them. Some, like the Solar Tetroom or the Trash Bag Sausage, are made from plastic bags and tape. Others, like the Khom Loi or the Kongming Lantern, are built using tissue paper and wire. The Hot Air Balloon Book also shows readers ways to heat the interior air that lifts these balloons, from tea candles to hair dryers, kitchen toasters to the sun's warming rays. Always keeping safety in mind, the author includes detailed guidelines on when and where open flames are appropriate and the proper weather conditions to launch these lighter-than-air craft.

Software Language Engineering Anthony Sloane,Uwe Aßmann,2012-04-25 This book constitutes the thoroughly refereed post-proceedings of the 4th International Conference on Software Language Engineering, SLE 2011, held in Braga, Portugal, in July 2011. The 18 papers presented together with 4 tool/language demonstration papers were carefully reviewed and selected from numerous submissions. SLE’s foremost mission is to encourage and organize communication between communities that have traditionally looked at software languages from different, more specialized, and yet complementary perspectives. SLE emphasizes the fundamental notion of languages as opposed to any realization in specific technical spaces.

V1 Flying Bomb Aces Andrew Thomas,2013-09-20 Shortly after the Allied landings in France the Germans unleashed the first of their so-called 'revenge weapons', the V1 flying bomb. Launched from specially constructed sites in northern France, the fast, small, pulse-jet powered pilotless aircraft were aimed at London with the sole intent of destroying civilian morale to the point where the British government would be forced to sue for peace. This dangerous new threat drew an immediate response, and the Air Defence of Great Britain (as Fighter Command had been temporarily renamed) established layers of defence that included a gun line and balloon barrage. The main element, however, were standing patrols by the fastest piston-engined fighters available to the RAF – the new Tempest V and Griffon-powered Spitfire XIV. Other types were allocated too, most notably the Polish Mustang wing, while night defence was left in the capable hands of several dedicated Mosquito squadrons. Although pilotless, the V1 was no easy foe thanks to its speed, powerful warhead and sheer unpredictability. Nevertheless, 154 pilots became V1 aces, 25 of whom were also aces against manned aircraft.
