Balloons Of The Civil War L-Cmdr Steven D. Culpepper,2014-08-15 This historical study investigates the military effectiveness and combat power of Civil War balloons. The categories inherent to military effectiveness include timeliness, accuracy, usefulness, operational considerations, and logistics. Limited by available material, especially those documenting Confederate efforts, this paper highlights the history of ballooning prior to the Civil War, and focuses on the Union balloon operations during the initial fall and winter of 1861-2, the Peninsular campaign, and Chancellorsville. The analysis of the measures of effectiveness from these three periods indicates the Union balloon corps amply validated its worth. War, however, is more than just a science. In this case, the art of warfare better explains the collapse of Thaddeus Lowe's organization after Chancellorsville. The first two modern implications of this case study involve both the unfavorable impact of personality, and the commander's influence on the assimilation of new

technology. Are we better today at bringing on line the benefits associated with technology? The final point links to the concept of battle command. With the massive infusion of information available to the modern commander, are we still sending him to the lions without a whip?

In addition to informal meetings, nineteen prepared talks were presented, all of which are contained herein. Subjects include: tethered balloon motion, balloon design, fiberglass tether cables, tethered balloon instrumentation, a tethered balloon winch, and several operational programs that used tethered balloon systems.

**Postcards from Dora** Christine Ricci,2008-02-05 As Dora and Boots travel the world in a hot-air balloon, they send postcards back home to their friends to describe the sights they see.

The Delaware Hot Air Balloon Mystery Carole Marsh, 1997

**General Notions of Organization and Tactical Suggestions Indispensable to the Balloon Observer** United States. War Department. Division of Military Aeronautics, 1918

**Proceedings, Seventh AFCRL Scientific Balloon Symposium** George F. Nolan, 1973 The report contains the papers presented at the Seventh AFCRL Scientific Balloon Symposium held in September 1972. The papers were presented in three sessions: Tethered and powered balloons, balloon-borne experiments, and instrumentation and balloon technology. In the area of tethered balloons, papers were presented on cables, drag and stability characteristics, hull design and analysis, and the results of scientific experiments using tethered balloons as sensor platforms. Papers were presented on a powered spherical balloon and a survey of possible power sources for use by this system. Presentations during the balloon-borne experiments and instrumentation session included manned balloon flights, precision pointing and control platforms and instrumentation, recovery parachute performance, gondola motion analyses, a balloon radar altimeter, and an overview of French scientific ballooning activities. During the balloon technology session a review was made of the flight results and performance of balloons with volumes in excess of 20 million cubic feet, shape and stress analysis of both nonreinforced and reinforced materials, and fabric tinting to increase solar absorptivity.

Fu-go Ross Coen, 2014-11-01 Near the end of World War II, in an attempt to attack the United States mainland, Japan launched its fu-go campaign, deploying thousands of high-altitude hydrogen balloons armed with incendiary and high-explosive bombs designed to follow the westerly winds of the upper atmosphere and drift to the west coast of North America. After reaching the mainland, these fu-go, the Japanese hoped, would terrorize American citizens and ignite devastating forest fires across the western states, ultimately causing the United States to divert wartime resources to deal with the domestic crisis. While the fu-go offensive proved to be a complete tactical failure, six Americans lost their lives when a discovered balloon exploded. Ross Coen provides a fascinating look into the obscure history of the fu-go campaign, from the Japanese schoolgirls who manufactured the balloons by hand to the generals in the U.S. War Department who developed defense procedures. The book delves into panic, propaganda, and media censorship in wartime. Fu-go is a compelling story of a little-known episode in our national history that unfolded virtually unseen.
