Archaeology in Latin America Benjamin Alberti,Gustavo G. Politis,2005-08-16 This pioneering and comprehensive survey is the first overview of current themes in Latin American archaeology written solely by academics native to the region, and it makes their collected expertise available to an English-speaking audience for the first time. The contributors cover the most significant issues in the archaeology of Latin America, such as the domestication of camelids, the emergence of urban society in Mesoamerica, the frontier of the Inca empire, and the relatively little known archaeology of the Amazon basin. This book draws together key areas of research in Latin American archaeological thought into a coherent whole; no other volume on this area has ever dealt with such a diverse range of subjects, and some of the countries examined have never before been the subject of a regional study.

The products listed in the directory find applications in a wide variety of branches of the chemical manufacturing industry including detergent and cleaning products, agrochemicals, construction, cosmetics, food, oil, paint, paper, pharmaceuticals, plastics and textiles. The directory is edited by Dr Gordon Hollis, an established consultant in the surfactants field and author of four respected surfactants directories. Surfactants Europa 3rd Edition will be an essential reference directory for research and development personnel and laboratory staff in general. It will also be useful for technical departments and purchasing/sales departments, not only in the detergent industry but in many industries where surfactants are used.

Presidents and Democracy in Latin America Manuel Alcántara,Jean Blondel,Jean-Louis Thiébault,2017-09-07 This new textbook provides students with a comprehensive and accessible introduction to the presidents and presidential leadership in Latin America. Unlike other texts, Presidents and Democracy in Latin America integrates both political analysis and major theoretical perspectives with extensive country-specific material. Part One examines the developments in recent years in Latin American presidentialism and identifies different characteristics of society and politics which have influenced Latin American governments. The personalization of political life and of presidential government help to illustrate the character of Latin American politics, specifically on the type of political career of those who occupied the presidential office, the leadership style of these presidents and the type of government which they led. Part Two studies two presidents in each of six countries in the region which reflect the broad trends in the political and electoral life: Argentina, Brazil, Chile, Colombia, Mexico, and Peru. Each case study first provides the biographical background of the president; it outlines the political career of the president both inside and outside of a party, including at the local level; the popularity of the president at the time of the presidential election is given, as well as the mode of selection of the candidates (selection by party leaders only, by party members or by a primary). The relation of the president with the government or ministers, especially if there is a coalition government, is detailed. This textbook will be essential reading for all students of Latin American Politics and is highly recommended for those studying executive politics, political leadership, and the state of democratic governance in Latin America.

Transition to Sustainability William Mark Adams,Sally Jeanrenaud,2008 The environmental movement has made huge progress over the last decades. Among others, it has raised awareness of challenges facing humanity, helped develop a critical mass of policies, and worked towards the implementation of many of these policies in collaboration with other stakeholders. Now, however, we are at a turning point in the history of the global environmental movement. In order to rise to challenges of the twenty-first century such as climate change and peak oil, it will not be possible to do business as usual; a step change will be needed. As IUCN celebrates its 60th anniversary, and marks six decades of global conservation achievement, it is also taking stock of the urgent challenges facing life on earth and reviewing its strategies. The key to future conservation action will lie in reconciling the needs of the environment with those of society in a manner that is equitable and just, and in promoting sustainable lifestyles and livelihoods as well as protecting endangered species and spaces. This document outlines IUCN's Future of Sustainability initiative, the rationale for its implementation, and describes how the conservation movement can play new and decisive roles in the transition to sustainability.

The Presented Past B. L. Molyneaux,P. G. Stone,2003-09-02 The Presented Past is concerned with the differences between the comparatively static, well-understood way in which the past is presented in schools, museums and at historic sites compared to the approaches currently being explored in contemporary archaeology. It challenges the all-too-frequent representation of the past as something finished, understood and objective, rather than something that is 'constructed' and therefore open to co-existing interpretations and constant re-interpretation. Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non-documentary sources derived from archaeological study and oral histories. The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught. The Presented Past will be of interest to teachers, archaeologists, cultural resource managers, in fact anyone who is concerned with how the past is presented.

The Consumer's Guide to Effective Environmental Choices Michael Brower,Warren Leon,2009-11-04 From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear, practical, and rational overview of the relationship between consumers and the environment. Paper or plastic? Bus or car? Old house or new? Cloth diapers or disposables? Some choices have a huge impact on the environment; others are of negligible importance. To those of us who care about our quality of life and what is happening to the earth, this is a vastly important issue. In these pages, the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment. For example, a few major decisions--such as the choice of a house or vehicle--have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison. This book identifies the 4 Most Significant Consumer-Related Environmental Problems, the 7 Most Damaging Spending Categories, 11 Priority Actions, and 7 Rules for Responsible Consumption. Learn what you can do to have a truly significant impact on our world from the people who are at the forefront of scientific research.
