Installation Art between Image and Stage Anne Ring Petersen,2015-09-21 Installationskunsten har gået sin sejrsgang verden over, og er her i det 21. århundrede en både vel- og anerkendt bestanddel af samtidskunsten. Med påvirkning fra og udveksling mellem billedkunst på den ene side og performanceteater på den anden befinder installationskunst sig – som bogens titel viser – netop i feltet mellem billede og scene. I *Installation Art: Between Image and Stage* undersøger Anne Ring Petersen grundstenene for en af nutidens mest udbredte kunstformer. Installationer er – ligesom skulpturer – tredimensionelle formationer eller billeddannelser, men i modsætning til skulpturen er installationen karakteriseret ved at være formet af rum eller rumlige scenografier, som skaber betydning og sanseoplevelser gennem sit billedsprog. Som resultat af dette er installationer ofte stort anlagte kunstværker, som beskueren kan gå ind i, og de lever dermed til fulde op til nutidens krav om spektakulære, æstetisk iscenesatte events og kulturoplevelser, der taler til sanserne. Gennem grundige

analyser af værker af kunstnere som Bruce Nauman, Olafur Eliasson, Jeppe Hein, Mona Hatoum, Pipilotti Rist og Ilya Kabakov som bagtæppe søges der i denne bog svar på, hvad en installation egentlig er, hvilke virkemidler den bruger, hvordan installationskunstens opståen kan forklares i et kulturhistorisk perspektiv og meget mere. Også installationskunstens rumlige, tidsmæssige og diskursive aspekter såvel som dens receptionsæstetik, der sættes ind i en overordnet kunst- og kulturhistorisk ramme, undersøges. *Installation Art: Between Image and Stage* er et nyttigt værk for alle, der ønsker at forstå denne mangefacetterede kunstforms konceptuelle fundament. Anne Ring Petersen, dr.phil., er lektor ved Institut for Kunst og Kulturvidenskab, Københavns Universitet. Har i 2009 udgivet *Installationskunsten mellem billede og scene* og er redaktør af *Contemporary Painting in Context* (2010). Despite its large and growing popularity – to say nothing of its near- ubiquity in the world’s art scenes and international exhibitions of contemporary art – installation art remains a form whose artistic vocabulary and conceptual basis have rarely been subjected to thorough critical examination. In *Installation Art: Between Image and Stage*, Anne Ring Petersen aims to change that.

She begins by exploring how installation art developed into an interdisciplinary genre in the 1960s, and how its intertwining of the visual and the performative has acted as a catalyst for the generation of new artistic phenomena. She investigates how it became one of today's most widely used art forms, increasingly expanding into consumer, popular and urban cultures, where installation's often spectacular appearance ensures that it meets contemporary demands for sense-provoking and immersive cultural experiences. The main trajectory of the book is directed by a movement aimed at addressing a series of basic questions that get at the heart of what installation art is and how it is defined: How does installation structure time, space and representation? How does it address and engage its viewers? And how does it draw in the surrounding world to become part of the work? Featuring the work of such well-known artists as Bruce Nauman, Pipilotti Rist, Ilya Kabakov and many others, this book breaks crucial new ground in understanding the conceptual underpinnings of this multifaceted art form. Anne Ring Petersen is associate professor in the Department of Arts and Cultural Studies at the University of Copenhagen and the editor of *Contemporary Painting in Context*.

Analogue Deyan Sudjic, 2024-03-14 The perfect antidote to your digital diet, this is a delightful exploration of analogue product design that crosses categories and generations, celebrating the timeless allure of the real and tactile over the merely virtual. Covering sound, vision, communication and information, *Analogue: A Field Guide* is an evocative trip through an era of innovative design, profiling 250 classic objects from radios to turntables, TVs to cameras, and typewriters to telephones. Along the way, it surveys all the iconic brands as well as the technological developments that have made these devices possible. There is a growing nostalgia for physical, real-world interaction with design and technology and a desire to reconnect with both things and people, something that has been eroded by the digital revolution. The wide-ranging approach of this book enables it to show the deeper cultural and social significance of the analogue era, with the authority to convince those who know a lot about each category and the breadth to attract the non-specialist. Ideal for those nostalgic for physical media, as well as those who collect, use and maintain these older technologies. Written by leading design historian, Deyan Sudjic, the book includes works by such renowned designers as Dieter

Rams, Philippe Starck, Ettore Sottsass and Richard Sapper, and taps into the ever-growing renaissance of interest in the analogue world.

Photography and the Optical Unconscious Shawn Michelle Smith, Sharon Sliwinski, 2017-05-05

Photography is one of the principal filters through which we engage the world. The contributors to this volume focus on Walter Benjamin's concept of the optical unconscious to investigate how photography has shaped history, modernity, perception, lived experience, politics, race, and human agency. In essays that range from examinations of Benjamin's and Sigmund Freud's writings to the work of Kara Walker and Roland Barthes's famous Winter Garden photograph, the contributors explore what photography can teach us about the nature of the unconscious. They attend to side perceptions, develop latent images, discover things hidden in plain sight, focus on the disavowed, and perceive the slow. Of particular note are the ways race and colonialism have informed photography from its beginning. The volume also contains photographic portfolios by Zoe Leonard, Kelly Wood, and Kristan Horton, whose work speaks to the optical unconscious while demonstrating how photographs

communicate on their own terms. The essays and portfolios in Photography and the Optical Unconscious create a collective and sustained assessment of Benjamin's influential concept, opening up new avenues for thinking about photography and the human psyche. Contributors. Mary Bergstein, Jonathan Fardy, Kristan Horton, Terri Kapsalis, Sarah Kofman, Elisabeth Lebovici, Zoe Leonard, Gabrielle Moser, Mignon Nixon, Thy Phu, Mark Reinhardt, Shawn Michelle Smith, Sharon Sliwinski, Laura Wexler, Kelly Wood, Andrés Mario Zervigón

Death Makes the News Jessica M. Fishman, 2017-11-21 Winner of the 2018 Media Ecology Association's Erving Goffman Award for Outstanding Scholarship in the Ecology of Social Interaction Winner of the Eastern Communication Association's Everett Lee Hunt Award A behind-the-scenes account of how death is presented in the media Death is considered one of the most newsworthy events, but words do not tell the whole story. Pictures are also at the epicenter of journalism, and when photographers and editors illustrate fatalities, it often raises questions about how they distinguish between a “fit” and “unfit” image of death. Death Makes the News is the story of this controversial

news practice: picturing the dead. Jessica Fishman uncovers the surprising editorial and political forces that structure how the news and media cover death. The patterns are striking, overturning long-held assumptions about which deaths are newsworthy and raising fundamental questions about the role that news images play in our society. In a look behind the curtain of newsrooms, Fishman observes editors and photojournalists from different types of organizations as they deliberate over which images of death make the cut, and why. She also investigates over 30 years of photojournalism in the tabloid and patrician press to establish when the dead are shown and whose dead body is most newsworthy, illustrating her findings with high-profile news events, including recent plane crashes, earthquakes, hurricanes, homicides, political unrest, and war-time attacks. *Death Makes the News* reveals that much of what we think we know about the news is wrong: while the patrician press claims that they do not show dead bodies, they are actually more likely than the tabloid press to show them—even though the tabloids actually claim to have no qualms showing these bodies. Dead foreigners are more likely to be shown than American bodies. At the same time, there are other unexpected but vivid patterns that

offer insight into persistent editorial forces that routinely structure news coverage of death. An original view on the depiction of dead bodies in the media, *Death Makes the News* opens up new ways of thinking about how death is portrayed.

Images Rights Paolo Cirio, Louise Wolthers, 2020 Paolo Cirio presents the three series of works *Attention*, *Property*, and *Derivatives* in his solo show *Images Rights* at NOME Gallery in Berlin. The exhibition *Images Rights* expands upon Cirio's concept of Internet Photography, with a particular focus on the economic, legal, and semantic values of photos circulating online. These Cirio's works explore modes of appropriation art to address the political economy of images. Rather than authorship, these artworks problematize the ownership, liability, and social responsibility of the production and

distribution of photos on the Internet. The series Attention, Property, and Derivatives each examine, respectively: images as currency of the attention economy, images as capital, and images as finance.

Manufacturing Processes for Design Professionals Rob Thompson,2007-11-30 An encyclopaedic guide to production techniques and materials for product and industrial designers, engineers, and architects. Today's product designers are presented with a myriad of choices when creating their work and preparing it for manufacture. They have to be knowledgeable about a vast repertoire of processes, ranging from what used to be known as traditional crafts to the latest technology, to enable their designs to be manufactured effectively and efficiently. Information on the internet about such processes is often unreliable, and search engines do not usefully organize material for designers. This fundamental new resource explores innovative production techniques and materials that are having an impact on the design industry worldwide. Organized into four easily referenced parts—Forming, Cutting, Joining, and Finishing—over seventy manufacturing processes are explained in depth with full technical

descriptions; analyses of the typical applications, design opportunities, and considerations each process offers; and information on cost, speed, and environmental impact. The accompanying step-by-step case studies look at a product or component being manufactured at a leading international supplier. A directory of more than fifty materials includes a detailed technical profile, images of typical applications and finishes, and an overview of each material's design characteristics. With some 1,200 color photographs and technical illustrations, specially commissioned for this book, this is the definitive reference for product designers, 3D designers, engineers, and architects who need a convenient, highly accessible, and practical reference.

Picture This ,2016-08-16 Molly Bang's brilliant, insightful, and accessible treatise is now revised and expanded for its 25th anniversary. Bang's powerful ideas—about how the visual composition of images works to engage the emotions, and how the elements of an artwork can give it the power to tell a story—remain unparalleled in their simplicity and genius. Why are diagonals dramatic? Why are curves calming? Why does red feel hot and blue feel cold? First published in 1991, Picture This has changed the way artists, illustrators, reviewers, critics, and readers look at and understand art.

Theravada Traditions John Clifford Holt, 2017-03-31 *Theravada Traditions* offers a unique comparative approach to understanding Buddhism: it examines popular rituals of central importance in the predominantly Theravada Buddhist cultures of Laos, Sri Lanka, Thailand, Myanmar, and Cambodia. Instead of focusing on how religious ideas have impacted the ideals of government or ethical practice, author John Holt tries to ascertain how important changes, or shifts, in the trajectories of the political economies of societies have impacted the character of religious cultures. Each of the five chapters focuses on a particular rite and provides detailed historical, political, or social context: Holt shows how worship of the Phra Bang Buddha image in the annual pi mai or New Year's rites in Luang Phrabang, Laos, has changed dramatically since the 1975 communist revolution and the subsequent opening up of the country to tourism; he describes how, in the face of insurrections and a prolonged civil war, the annual asala perahara processions in Kandy, Sri Lanka, have come to reflect a robust assertion of a Sinhala Buddhist nationalist identity; how ordination rites among Thai Buddhists

reflect the manner in which Thai culture has been ever more “commodified” in the context of its dramatically developing economy; and how in tightly controlled Myanmar the kathina rite, the act of giving new robes to members of the sangha after the completion of the rain-retreat season, transformed into a season of campaigning for gift-giving and merit-making; finally, he demonstrates how, in light of the devastating losses inflicted by the Khmer Rouge, pchum ben, the annual rite of caring ritually for one’s deceased kin, became the most popular and perhaps most emotionally observed of all rites in the Khmer calendar year. In short, Theravada Traditions illustrates how popular, public ritual performance, far from being static, clearly indexes patterns of social and political change. Broad but deep, rigorous yet accessible, this rich, innovative volume provides a provocative introduction to the practice of Theravada Buddhism and the nature of social change in contemporary Sri Lanka and Southeast Asia.

Ten Thousand Birds Tim Birkhead, Jo Wimpenny, Bob Montgomerie, 2014-03-01 Ten Thousand Birds provides a thoroughly engaging and authoritative history of modern ornithology, tracing how the study of birds has been shaped by a succession of visionary and often-controversial personalities, and

by the unique social and scientific contexts in which these extraordinary individuals worked. This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum-based discipline focused almost exclusively on the anatomy, taxonomy, and classification of dead birds. It describes how in the early 1900s pioneering individuals such as Erwin Stresemann, Ernst Mayr, and Julian Huxley recognized the importance of studying live birds in the field, and how this shift thrust ornithology into the mainstream of the biological sciences. The book tells the stories of eccentrics like Colonel Richard Meinertzhagen, a pathological liar who stole specimens from museums and quite likely murdered his wife, and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack, Niko Tinbergen, Robert MacArthur, and others who through their studies of birds transformed entire fields of biology. *Ten Thousand Birds* brings this history vividly to life through the work and achievements of those who advanced the field. Drawing on a wealth of archival material and in-depth interviews, this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any

other group of organisms.
